Scan Sarah Fine,Walter Jury,2014-05-01 Tate and his father don't exactly get along. As Tate sees it, his father has unreasonably high expectations for Tate to be the best—at everything. Tate finally learns what he's being prepared for when he steals one of his dad's odd tech inventions and mercenaries ambush his school, killing his father and sending Tate on the run from aliens who look just like humans. All Tate knows—like how to make weapons out of oranges and lighter fluid—may not be enough to save him as he's plunged into a secret interspecies conflict that's been going on for centuries. Aided only by his girlfriend and his estranged mother, with powerful enemies closing in on all sides, Tate races to puzzle out the secret behind his father's invention and why so many are willing to kill for it. A riveting, fast-paced adventure, Scan is a clever alien thriller with muscle and heart.

  CT Scan in Abdominal Emergency Surgery Fausto Catena,Salomone Di Saverio,Luca Ansaloni,Federico Coccolini,Massimo Sartelli,2018-06-26 This book focuses on the diagnostic impact of CT scans in severe abdominal trauma and in non-traumatic acute abdomen, the two clinical entities that constitute the main reasons for referrals for this imaging technique from the intensive care unit. The concept behind it is that emergency surgeons and physicians not only need the clinical knowledge to manage the different pathological conditions, but that they must also have a full understanding of diagnostic imaging modalities. To this end, each chapter includes a description of a specific acute abdominal disorder. In addition to the clinical presentation

and the diagnosis and management guidelines, there is a special focus on imaging studies with clear and concise descriptions, high-quality images and the evolution grading scale to aid interpretation. This easy-to-read book is an ideal source of practical information for acute care surgeons, radiologists and for all the members of the emergency team.
