## **The Ringtone Dialectic Sumanth**

Gopinath, 2013-07-19 The rise and fall of the ringtone industry and its effect on mobile entertainment, music, television, film, and politics. A decade ago, the customizable ringtone was ubiquitous. Almost any crowd of cell phone owners could produce a carillon of tinkly, beeping, synthy, musicalized ringer signals. Ringtones quickly became a multi-billion-dollar global industry and almost as quickly faded away. In *The Ringtone Dialectic*, Sumanth Gopinath charts the rise and fall of the ringtone economy and assesses its effect on cultural production. Gopinath describes the technical and economic structure of the ringtone industry, considering the transformation of ringtones from monophonic, single-line synthesizer files to polyphonic MIDI files to digital sound files and the concomitant change in the nature of capital and rent accumulation within the industry. He discusses sociocultural practices that seemed to wane as a result of these shifts, including ringtone labor, certain forms of musical notation and representation, and the creation of musical and artistic works quoting ringtones. Gopinath examines "declines," "reversals," and "revivals" of cultural forms associated with the ringtone and its changes, including the Crazy Frog fad, the use of ringtones in political movements (as in the Philippine "Glorigate" scandal), the ringtone's narrative function in film and television (including its striking use in the films of the Chinese director Jia Zhangke), and the ringtone's

relation to pop music (including possible race and class aspects of ringtone consumption). Finally, Gopinath considers the attempt to rebrand ringtones as “mobile music” and the emergence of cloud computing.

**Music in Science Fiction Television** Kevin J. Donnelly, Philip Hayward, 2013 The music for science fiction television programs, like music for science fiction films, is often highly distinctive, introducing cutting-edge electronic music and soundscapes. There is a highly particular role for sound and music in science fiction, because it regularly has to expand the vistas and imagination of the shows and plays a crucial role in setting up the time and place. Notable for its adoption of electronic instruments and integration of music and effects, science fiction programs explore sonic capabilities offered through the evolution of sound technology and design, which has allowed for the precise control and creation of unique and otherworldly sounds. This collection of essays analyzes the style and context of music and sound design in Science Fiction television. It provides a wide range of in-depth analyses of seminal live-action series such as Doctor Who, The Twilight Zone, and Lost, as well as animated series, such as The Jetsons. With thirteen essays from prominent contributors in the field of music and screen media, this anthology will appeal to students of Music and Media, as well as fans of science

fiction television.

**Advancing Multimodal and Critical Discourse Studies** Sumin Zhao, Emilia Djonov, Anders Björkvall, Morten Boeriis, 2017-09-08  
As a founder and leading figure in multimodality and social semiotics, Theo van Leeuwen has made significant contributions to a variety of research fields, including discourse analysis, sociolinguistics, communication and media studies, education, and design. In celebration of his illustrious research career, this volume brings together a group of leading and emerging scholars in these fields to review, explore and advance two central research agendas set out by van Leeuwen: the categorisation of the meaning potential of various semiotic resources and the examination of their uses in different forms of communication, and the critical analysis of the interaction between semiotic forms, norms and technology in discursive practices. Through 11 cutting-edge research papers and an experimental visual essay, the book investigates a broad range of semiotic resources including touch, sound, image, texture, and discursive practices such as community currency, fitness regime, film scoring, and commodity upcycling. The book showcases how social semiotics and multimodality can provide insights into the

burning issues of the day, such as global neoliberalism, terrorism, consumerism, and immigration.

**Bonkers: The Story of Dizze Rascal** Paul Lester, 2011-08-01  
Dylan Kwabena Mills, better known as Dizze Rascal, has evolved from cutting-edge pioneer of grime and hip-hop into one of Britain's biggest pop stars. And the East London rapper, songwriter and record producer did it without compromising his startlingly original vision and persona. Paul Lester traces Dizze's career, first as a pirate radio DJ aged 16, then as a member of grime collective the Roll Deep Crew, and finally as a solo artist. In this no-holds-barred account, read about Dizze's brush with death in Ayia Napa, his unlikely appearance on BBC2's Newsnight, where he was grilled about

politics by Jeremy Paxman, and the stories behind his hits and special projects.

**Musical Instruments in the 21st Century** Till Bovermann,Alberto de Campo,Hauke Egermann,Sarah-Indriyati Hardjowirogo,Stefan Weinzierl,2016-12-09 By exploring the many different types and forms of contemporary musical instruments, this book contributes to a better understanding of the conditions of instrumentality in the 21st century. Providing insights from science, humanities and the arts, authors from a wide range of disciplines discuss the following questions: · What are the conditions under which an object is recognized as a musical instrument? · What are the actions and procedures typically associated with musical instruments? · What kind of (mental and physical)

knowledge do we access in order to recognize or use something as a musical instrument? · How is this knowledge being shaped by cultural conventions and temporal conditions? · How do algorithmic processes 'change the game' of musical performance, and as a result, how do they affect notions of instrumentality? · How do we address the question of instrumental identity within an instrument's design process? · What properties can be used to differentiate successful and unsuccessful instruments? Do these properties also contribute to the instrumentality of an object in general? What does success mean within an artistic, commercial, technological, or scientific context?

*The Musician's Business and Legal Guide, Fifth Edition* Mark Halloran,2017-03-16 The Musician's Business and Legal Guide provides vital information to help demystify the music business and the complex body of law that shapes it. This book answers such questions as how to protect name and copyright; what is and is not legal about sampling; what are the legal issues surrounding digital downloads and streaming; what are the jobs of managers, talent agents and publishers; what are common contractual relationship between independent and major labels. The new edition includes chapters not covered in depth by other books: social media law, TV talent shows, YouTube, and international copyright. As in previous editions, the book features clause-by-clause contract analyses for 360 record deals, music publishing, management, and producer agreements.

## Cell U.R. - Tales from The Script Mark

Plimsoll, 2009-12-31 CELL U.R. - Tales from the Script A 'more-than-complete' novel, the script plus lyrics, to the twenty-three half-hour Podcasts (audiodrama), over nine hours of a Gothic Sci-Fi Vampire Musical Comedy Romance with sound effects, accompaniment, poems, and songs. Over nine hours of THE FUTURE, originally published on ONE CD-ROM Compact Disc! Advisory: SOME MATURE CONTENT, Although low on violence and saturated fact (sic). A young game-boy human-cellphone named Gnathal wants to lose his virginity, so he goes into debt to buy a custom automobile in hopes of seducing a gypsy fortune-teller belly-dancing professional escort who calls herself Vampire Elvirus. Vexed that the State will not allow him to come-of-age or activate, he expresses his frustration in a way that gets him fired from his job in the Metroplex. He joins the DevaCops to patrol the border of the DevaState, gets kidnapped, and escapes to live as a hermit amongst Genetically Modified Organisms (GMOs), until the equestrian daughter of a philandering SuperUser rescues him. Daddy doesn't approve, until Ganthal becomes the murdered Godhead Christopheles Rex who comes to earth to raise the dead and resolve the inequities of iniquity. The SuperUser discovers a malfunction in Gnathal's bionic cellphone, a Class-A security breach, which puts him in deep do-do with the Central Servers. Captured, the police extract a drugged confession and sentence him to Civil Death, but he's needed elsewhere- he must rescue his girlfriend, who might carry a new polyploidal human 'baby,' possibly sired by his

best friend. A Tour-de-farce for everyone who loves B movies, black-and-white thinking, dialects, computer-generated music, news, sports, pop philosophies, and other cliches of magic realism that define our world, and our near future, as human cellphones that need a revolution. Twenty-three half-hour episodes chock full of peace, war, love, sex, and other conflicts with resolution. Come experience how surreal black comedy, Gothic Dada, Vampyric Bauhaus, Dystopian Nihilism, demonic slammin' poetry, along with the lyrics of two dozen beautiful computer-generated pop songs and their ringtones propel the plot. The complete script, with lyrics, to the twenty-three half-hour multimedia podcasts of a future that resembles now, and Forevermore!

**The Sound of Blue** Michael Duda,2019-08-16 The story The Sound of Blue was awarded Silver Honorable Mention by Writers of the Future, Q2 2019. Aliens exist everywhere. They are android. They hide within the mind. They live on other planets. And they can even travel the universe using technology far beyond our understanding. Markey VI, an android on an orbiting

space station, assists an artificial intelligence. David, the A.I., ponders the question of humanity's fate. The ultimate question is, Should life be returned to Earth? The answer is known as the Singular Conclusion. But the answer's impact reaches far deeper into Markey VI's electronic components and programmed logic than could be anticipated. And the android's final moments bring it closer to humanity itself. David Grayson volunteered for a project called, 'Threading.' Unfortunately, Threading slowly alters David's mind. And it affects the other two subjects. But in what way? After the final test goes wrong, David unleashes a powerful ability capable of distorting time. Shiran accuses Abian of murdering her husband. She claims that Abian tells lies about the events leading to the death. She also keeps a secret that could reveal the truth. When Abian uncovers Shiran's secret, Shiran discovers that there is more to her simple village life than she first believed. It's a futuristic version of 1930s Chicago. Named Chicago VI, the shielded space city exists somewhere at the far edge of the Oberon Galaxy. And all space cities connect by jump trains, faster-than-light machines. Bobby and his dog, Mister Pleats, barely make ends meet at Chicago VI's jump train station. But when Bobby meets an alien Xenoarchaeologist, he'll discover that there's more possibilities in the galaxy than shining shoes. The Sound of Blue takes you on four journeys of alien discovery. A journey just out of atmospheric reach. To a mysterious planet and at the far end of a galaxy. And into the mind where superhuman powers wait to be untapped.
