**Science/Fiction Collections** Lee Ash,2013-08-21 Science/Fiction Collections offers different views and attitudes toward Science Fiction and Fantasy Literature and descriptions of a variety of collections. Written during a time when Science Fiction and Fantasy writings had just gained widespread popularity, it offers suggestions and considerations for approaching any special collection dealing with a relatively new field.

*Gold* Isaac Asimov,2009-03-17 *Gold* is the final and crowning achievement of the fifty-year career of science fiction's transcendent genius, the world-famous author who defined the field of science fiction for its practitioners, its millions of readers, and the world at large. The first section contains stories that range from the humorous to the profound, at the heart of which is the title story, *Gold*, a moving and revealing drama about a writer who gambles everything on a chance at immortality: a gamble Asimov himself made - and won. The second section contains the grand master's ruminations on the SF genre itself. And the final section is comprised of Asimov's thoughts on the craft and writing of science fiction.

**The Classic Science Fiction Collection** H. G. Wells,2017-11-30 For more than 100 years, science fiction writers have told tales of alien encounters and fascinating technologies and warned of the dangers of dystopian governments. From Victorians experimenting with time travel to pioneers exploring the depths of space, the stories collected here are a tribute to the imagination of the inventors of the modern science fiction genre. Some tales are filled with boundless optimism for the ingenuity of humanity while others provide fearful warnings of the risks of war and the dangers of technology. In the late 19th century, writers across the world began looking to the future. In France, Jules Verne explored the possibilities of future technology and the wonders of exploration in his novels *Journey to the Centre of the Earth* and *Twenty Thousand Leagues Under the Sea*. In England, H. G. Wells established himself as one of the founders of science fiction with his novels *The Time Machine* and *The War of the Worlds*. They were both also prolific short story writers. Others followed suit. In Bengal, the feminist Rokeya Sakhawat Hossain used her fiction to advance women's rights and education. In the United States, Jack London found science fiction the perfect way to express some of his unique political ideas. By the end of World War I, science fiction had established itself as a major genre. With the birth of the pulp magazine came a slew of accomplished writers - authors such as George Griffith, John Ulrich Giesy, Homer Eon Flint, Cyril G. Wates and others excelled at the short story, able to experiment and create a sense of wonder in their fascinating tales. This collection includes stories by: Grant Allen Stephen Vincent Benét Miles J. Breuer Thornton DeKy Francis Flagg Homer Eon Flint John Ulrich Giesy George Griffith Austin Hall Will Harben Nathaniel Hawthorne Rokeya Sakhawat Hossain Rudyard Kipling Jack London Edward Page Mitchell Garrett P. Serviss Charles B. Stilson Jules Verne Cyril G. Wates Stanley G. Weinbaum H. G. Wells

*The Year's Best Science Fiction: Nineteenth Annual Collection* Gardner Dozois,2002-07-23 The twenty-first century has so far proven to be exciting and wondrous and filled with challenges we had never dreamed. New possibilities previously unimagined appear almost daily . . . and science fiction stories continue to explore those possibilities with delightful results: Collected in this anthology are such compelling stories as: On K2

with Kanakaredes by Dan Simmons. A relentlessly paced and absorbing tale set in the near future about three mountain climbers who must scale the face of K2 with some very odd company. The Human Front by Ken MacLeod. In this compassionate coming-of-age tale the details of life are just a bit off from things as we know them-and nothing is as it appears to be. Glacial by Alastair Reynolds. A fascinating discovery on a distant planet leads to mass death and a wrenching mystery as spellbinding as anything in recent short fiction. The twenty-six stories in this collection imaginatively takes us far across the universe, into the very core of our beings, to the realm of the gods, and the moment just after now. Included here are the works of masters of the form and of bright new talents, including: Eleanor Arnason Chris Beckett Michael Blumlein Michael Cassutt Brenda W. Clough Paul Di Filippo Andy Duncan Carolyn Ives Gilman Jim Grimsley Simon Ings James Patrick Kelly Leigh Kennedy Nancy Kress Ian R. MacLeod Ken MacLeod Paul J. McAuley Maureen F. McHugh Robert Reed Alastair Reynolds Geoff Ryman William Sanders Dan Simmons Allen M. Steele Charles Stross Michael Swanwick Howard Waldrop Supplementing the stories are the editor's insightful summation of the year's events and a lengthy list of honorable mentions, making this book a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart.

**More Than Human** Theodore Sturgeon, 2013-04-30 Six misfits, one powerful entity. An award-winning novel about belonging by "one of the greatest writers of science fiction and fantasy who ever lived" (Stephen King). Individually, they are a seemingly simpleminded young man living in the woods who can read the thoughts of others, a runaway girl with telekinetic powers, twin girls who can barely speak but can teleport across great distances, and an infant with a mind like a supercomputer. Together, they are the Gestalt—a single extraordinary being comprised of remarkable parts—although an essential piece may be missing . . . But are they the next stage in human development or harbingers of the end of civilization? The answer may come when they are joined by Gerry. Powerfully telepathic, he lacks a moral compass—and his hatred of the world that has rejected him could prove catastrophic. Winner of the International Fantasy Award and considered Theodore Sturgeon's masterpiece, *More Than Human* is a genre-bending wonder that explores themes of responsibility and morality, individuality, and belonging. Moving and suspenseful, lyrical and provocative, the novel was one of the first to elevate science fiction into the realm of literature, and inspired musicians and artists, including the Grateful Dead and Crosby, Stills and Nash. From the Nebula Award-winning author of *Godbody*, *The Dreaming Jewels*, and other great works of science fiction, this is an unforgettable reading experience and a must for anyone who enjoys Ramsey Campbell, Robert Silverberg, or Philip José Farmer. This ebook features an illustrated biography of Theodore Sturgeon including rare images and never-before-seen documents from the University of Kansas's Kenneth Spencer Research Library and the author's estate, among other sources.

**The Time Machine + The Invisible Man + The War of the Worlds (3 Unabridged Science Fiction Classics)** H. G. Wells, 2023-12-05 This carefully crafted ebook: *The Time Machine + The Invisible Man + The War of the Worlds (3 Unabridged Science Fiction Classics)* is formatted for your eReader with a functional and detailed table of contents. H.G. Wells is an English author best known as a sci-fi writer, though he was also a prolific writer in many other genres, including contemporary novels, history, politics and social commentary, and even writing text books and rules for war games. The first great novel to imagine time travel, *The Time Machine* (1895) follows its scientist narrator on an incredible journey that takes him finally to Earth's last moments—and perhaps his own. The scientist who discovers how to transform himself in *The Invisible Man* (1897) will also discover, too late, that he has become unmoored from society and from his own sanity. *The War of the Worlds* (1898)—the seminal masterpiece of alien invasion adapted by Orson Welles for his notorious 1938 radio drama, and subsequently by several filmmakers—imagines a fierce race of Martians who devastate Earth and feed on their human victims while their voracious vegetation, the red weed, spreads over the ruined planet...
