Make Science Fun: Experiments Jacob Strickling,2017-11-06 *Make Science Fun 2*, intended for an older more 'serious' age group of 8-15, is designed for children to do actual science experiments (not just science 'activities') at home. Most science experiment books aren't experiment books at all. They mostly contain fun science activities, which are fun to do & help learn science - but a fun science 'activity' isn't always an experiment. A science experiment sets out to answer a question or solve a problem using a fair and controlled test. To count as a science experiment you need to take measurements, make observations and control variables. With space to write hypotheses, record results, make observations and draw graphs required, *Make Science Experiments* is a strong foundation on which to build student awareness of the importance of science in everyday lives. SELLING POINTS - Science experiments for the kitchen, garage or workshop, bathroom and garden. - Bonus projects perfect for a science fair or school project. - Projects using only basic products that can be found in every home kitchen or bathroom. - *Make Science Fun* banishes the 'science is boring' stereotype through fun experiments that children can do alone or with friends or parents. - The author's YouTube channel.

Spectacular Experiments & Mad Science Kids Love Steve Heuer,2010 *Spectacular Experiments* and *Mad Science Kid's Love* is a project 15 years in the making. As a science-enrichment teacher, I have had the good fortune to witness the joy expressed on my student's faces through the magic of science. This project of love is inspired by and dedicated to the thousands of children who have experienced the very best hands-on, interactive science experiments and have given amazing feedback made visible by their sparkling enthusiasm. Kid tested and parent approved, these easy to follow, yet awe-inspiring experiments also serve as a great introduction to the amazing world of science.

Awesome Science Experiments for Kids Crystal Ward Chatterton,2018-02-13 Getting kids excited about science can be difficult. Science Experiments for Kids provides young scientists ages 5-10 with hands-on experiments that teach them how to apply the scientific method. From the home laboratory of former chemistry teacher and blogger behind the Science Kiddo, Crystal Chatterton combines fun experiments with the hows and whys behind them in Science Experiments for Kids--

Bathroom Science Christine Taylor-Butler,2016-10-01 Create exploding toilet volcanoes, oozing sink slime, and bubbling bathtub cauldrons...all in the name of science! Each step-by-step experiment uses household and other easy-to-find materials so the young scientist's lab can be equipped quickly, inexpensively, and—for those who might worry—safely. Bathroom Science highlights the materials, the method, and the scientific why behind every experiment. Best of all, Bathroom Science makes science as simple (and occasionally explosive) as going to the bathroom. We've packed in 101 kid-challenging experiments, including... *Turn Your Toilet into a Volcano *Steam Up a Secret Message *Fill the Sink with Booger Slime *Give Bathwater an Eerie Glow *The Cackling Chicken of Death, and *Make Your Own Stink Bomb (Eew!) The folks who brought you Uncle John's Bathroom Reader...creating the next generation of mad (and amazing) scientists, one kid at a time! (Bwa-ha-ha!)

Science Around the World Shar Levine,1996-03-29 Travel with these popular children's book authors as they take you from ancient times and far away places to the present day and your own backyard to explore some of the world's most exciting scientific discoveries. Build a pyramid using the same techniques as the Egyptians did or use modern materials to make paper following a 2,000-year old recipe. Chapters on 10 different countries include an introduction, an experiment and, where appropriate, a profile of a scientist(s) from that country. Contains scores of illustrations plus miscellaneous science facts and figures.
