Essential Quotes for Scientists and Engineers Konstantin K.

Likharev,2021-02-27 This book brings together about 2,500 quotations on various topics of interest to scientists and engineers, including students of STEM disciplines. Careful curation of the material by the editor provides the reader with far greater value than can be obtained by searching the internet. The quotes have been selected for various attributes including: importance of topic, depth of insight, and - not least - wit, with many of them satisfying all these criteria. To make sequential reading of the quotes more engaging, they are grouped into broad topical sections, and the entries within each section are organized thematically, forming quasi-continuous narrative threads. The text and authorship of each quote have been carefully verified, and the most popular cases of misquotation and misattribution are noted. The book represents a valuable resource for those writing science and engineering articles as well as being a joy to read in its own right.

Think Like a Rocket Scientist Ozan Varol, 2020-04-14 * One of Inc.com's 6 Books You Need to Read in 2020 (According to Bill Gates, Satya Nadella, and Adam Grant)* Adam Grant's # 1 pick of his top 20 books of 2020* One of 6 Groundbreaking Books of Spring 2020 (according to Malcolm Gladwell, Susan Cain, Dan Pink, and Adam Grant). A former rocket scientist reveals the habits, ideas, and strategies that will empower you to turn the seemingly impossible into the possible. Rocket science is often celebrated as the ultimate triumph of technology. But it's not. Rather, it's the apex of a certain thought process -- a way to imagine the unimaginable and solve the unsolvable. It's the same thought process that enabled Neil Armstrong to take his giant leap for mankind, that allows spacecraft to travel millions of miles through outer space and land on a precise spot, and that brings us closer to colonizing other planets. Fortunately, you don't have to be a rocket scientist to think like one. In this accessible and practical book, Ozan Varol reveals nine simple strategies from rocket science that you can use to make your own giant leaps in work and life -- whether it's landing your dream job, accelerating your business, learning a new skill, or creating the next breakthrough product. Today, thinking like a rocket scientist is a necessity. We all encounter complex and unfamiliar problems in our lives. Those who can tackle these problems -- without clear guidelines and with the clock ticking -- enjoy an extraordinary advantage. *Think Like a Rocket Scientist* will inspire you to take your own moonshot and enable you to achieve liftoff.

Letters to a Young Scientist Edward O. Wilson, 2013-04-15 Pulitzer Prize-winning biologist Edward O. Wilson imparts the wisdom of his storied career to the next generation. Edward O. Wilson has distilled sixty years of teaching into a book for students, young and old. Reflecting on his coming-of-age in the South as a Boy Scout and a lover of ants and butterflies, Wilson threads these twenty-one letters, each richly illustrated, with autobiographical anecdotes that illuminate his career--both his successes and his failures--and his motivations for becoming a biologist. At a time in human history when our survival is more than ever linked to our understanding of science, Wilson insists that success in the sciences does not depend on

mathematical skill, but rather a passion for finding a problem and solving it. From the collapse of stars to the exploration of rain forests and the oceans' depths, Wilson instills a love of the innate creativity of science and a respect for the human being's modest place in the planet's ecosystem in his readers.

This book contains some of Hawking's views on a variety of topics in order to give an insight into the mind of this insightful and often humorous character.

Science Lucas Smith,2018-03-12 Most Successful scientists of all Time

Scientists are important for the world because they help people understand the way the world works in very specific ways. Human beings have spent a lot of time figuring out how to stay alive and be happy, and science has been a powerful tool for staying alive, though it doesn't always make us happy. Science is one particular way of looking at the universe. It's a system of thought, a way in which we can organize what we know to better understand the way things work. In a way, scientists are like fortune tellers. The goal of the scientist is to understand how the universe functions in very specific ways, and to use that understanding to make successful predictions. These are the most successful scientists of all times. Albert Einstein: Look deep into nature, and then you will understand everything better. Charles Darwin: A man who dares to waste one hour of time has not discovered the value of life. Isaac Newton: We build too many walls and not enough bridges. Sigmund Freud: The ego is not master in its own house. Thomas Edison: Many of life's failures are people who did not realize how close they were to success when they gave up. Aristotle: The energy of the mind is the essence of life. Leonardo Da Vinci: Nothing strengthens authority so much as silence. William Herschel: All human discoveries seem to be made only for the purpose of confirming more and more the truths contained in the sacred scriptures. Archimedes: Eureka! - I have found it! James Prescott Joule: Order is manifestly maintained in the universe... governed by the sovereign will of God. Nikola Tesla: Of All Things, I Liked Books Best. How will this book help you? Can you imagine a world without science? You wouldn't have to worry about being late to work or finding your car keys because, well, jobs and cars wouldn't exist. You would be living in a cave or a rudimentary built shelter, at best, wondering whether you'll be able to hunt something for your next meal, or get killed and become some wild animal's next feast in the process. The moment that early humans decided to take action into securing their survival marked the birth of science, as that's the moment when they started asking themselves two vital questions about the world surrounding them: How? and Why?. A scientist is important for the world because she chooses to look at the world in a special way, a way that can be useful and can help us understand ourselves better. There are many approaches to exploring and appreciating the world. I hope you try as many of them as you can and see what fits you best. Through this book, we will explore the greatest life lessons and secrets to success from The Most Successful scientist of all Time. Reading a quote or two everyday will motivate you achieve your goals. However, motivation is worthless without consistency. Therefore, put consistent action to achieve success. I hope this book will help you towards your journey. Scroll up and grab your copy now. Blaise Pascal, Louis Pasteur, Rosalind Franklin, Marie Curie, Nikola Tesla, Ernest Rutherford, Alexander Fleming, Jonas Salk, Leonardo da Vinci, Albert Einstein, Florence Nightingale, Stephen Hawking, Ivan Pavlov, Time Berners-Lee and many more. Each scientist's quotes are grouped together and the book is chronologically-ordered with the earliest scientists first, giving the reader a feeling of walking through the history of science and mathematics. 'Thoroughly absorbing. Really interesting to read quotes by famous scientists referring to other famous scientists. We owe so much to a small few scientists and mathematicians, their achievements and their tenacity and creativity in overcoming challenges. From Blaise Pascal's calculating machines to Tim Berners-Lee's world wide web; from Alexander Fleming's penicillin to Jonas Salk's polio vaccine..., from Ernest Rutherford's sub-atomic particles to J. Robert Oppenheimer's atomic bomb... Isaac Newton summed up the progress of science and mathematics: 'If I have seen further than others, it is by standing upon the shoulders of giants.' I learnt so much. I had no idea that Nikola Tesla was such a genius. We can only guess what will come in the next hundred years of science. But maybe children who read these quotes will be inspired to do more than just watch and wait - maybe these quotes will inspire them to become involved. The perfect gift for anyone wondering why

they're attending school.
