Voices from the Net Clay Shirky,1995 Although Lee surrendered at Appomattox Court House in April, 1865, some Confederates refused to abandon their cause. Fallen Guidon, originally published in 1962 by Jack Rittenhouse's Stagecoach Press in 1962, is the gripping story of one such group of men who, rather than surrender, boldly decided to follow their cavalry flag or guidon south and transplant their imperialistic vision in the troubled soil of Mexico. This little-remembered episode of the Trans-Mississippi Civil War was written as a popular history by the late Edwin Adams Davis, a respected scholar of southern and Civil War history. General Jo Shelby had led the Missouri Cavalry Division through battles at Westport, Mine Creek, Newtonia, and elsewhere. Shelby's men were all recruits rather than draftees, fiercely loyal, and they followed the code of chivalry to a degree unusual even in the old South. While preparing to march against the Federals at Little Rock, they heard of Lee's surrender. In a meeting at Marshall, Texas, Shelby announced, We will stand together, we will keep our organization, our arms, our discipline, our hatred of oppression . . . that this Missouri Cavalry Division preferred exile to submission-death to dishonor. Having heard that the U.S. government wanted the Habsburg emperor Maximilian out of Mexico and that Lincoln liked the idea of ex-Confederates joining forces with Benito Juarez to oust Maximilian and his French military forces, Shelby formed his plan. Shelby believed he had found a way to save their honor and at the same

time spread their lost southern empire to a new land, where riches and glory surely awaited them. Shelby and his men marched through Texas, stopping in Corsicana, Tyler, Waxahachie, Waco, Austin, Houston, and San Antonio, declaring martial law and forcibly quelling local outbreaks of looting and rioting where they found it. At the Rio Grande, in a funereal memorial, they buried their Confederate battle flag in the murky waters before heading into Mexico. Shelby's men did not want to support Benito Juarez's liberal guerrillas, however. Identifying themselves as imperialists, they wanted to fight gloriously for Emperor Maximilian. In pitched battles against the local Juaristas and isolated guerrillas and bandits, they spilled blood from Piedras Negras to Mexico City and even undertook the chivalrous and bloody rescue of a woman imprisoned in a hacienda. Once in Mexico City, Shelby's Iron Brigade discovered its march to have been futile, and in a bittersweet final review, Shelby said good-bye.

Expect More R. David Lankes, 2015-12-28 Libraries have existed for millennia, but today many question their necessity. In an ever more digital and connected world do we still need places of books in our towns, colleges, or schools? If libraries aren't about books, what are they about? In *Expect More*, David Lankes, winner of the 2012 ABC-CLIO/Greenwood Award for the Best Book in Library Literature, walks you through what to expect out of your library. Lankes argues that communities need libraries that go beyond bricks and mortar and beyond books. We need to expect more out of our libraries. They should be places of learning and advocates for our communities in terms of learning, privacy, intellectual property, and economic development. *Expect More* is a rallying call to communities to raise the bar, and their expectations, for great libraries.

SQL Server Backup and Restore Shawn McGehee, 2012 A database administrator's duties include ensuring that a database can be restored and recovered in the event of error or disaster. This book discusses how to perform backup and restore operations using SQL Server Management Studio (SSMS), basic T-SQL scripts and Red Gate's SQL Backup tool. Capturing backups using SSMS or simple scripts is fine for one-off backup operations, but any backups that form part of the recovery strategy for any given database must be automated with some built-in checks that, for example, alert the responsible database administrator immediately if a problem arises. The tool of choice in this

book for backup automation is Red Gate SQL Backup. Building an automated solution will take a lot of work, but this book offers some advice on possible options, such as PowerShell scripting, T-SQL scripts and SQL Server Agent jobs. --

The Virtual Community, revised edition Howard Rheingold, 2000-10-23 Howard Rheingold tours the virtual community of online networking. Howard Rheingold has been called the First Citizen of the Internet. In this book he tours the virtual community of online networking. He describes a community that is as real and as much a mixed bag as any physical community—one where people talk, argue, seek information, organize politically, fall in love, and dupe others. At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses, he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, The Virtual Community is more timely than ever. This edition contains a new chapter, in which the author revisits his ideas about online social communication now that so much more of the world's population is wired. It also contains an extended bibliography.
