**What's Your Formula?** Brian Washburn, 2021-06-29 Your Periodic Table of Learning Elements Engaging, effective training programs are a mixture of science and art, requiring the right balance of adult learning theory, available technology, intuitive tools, proven practices, creativity, and risk. How does a trainer find the right combination and proportion of these elements? How does a trainer know what's possible? To answer these questions, Brian Washburn offers a simple yet elegant periodic table of learning elements modeled on the original periodic table of chemical properties. Washburn's elements—which are organized into solids, liquids, gases, radioactive, and interactive categories similar to their chemical cousins—are metaphors for the tools and strategies of the field of learning design; when they're combined, and under certain conditions, they have the potential to create amazing learning experiences for participants. They are that impactful. From critical gas-like elements like the air we breathe, present in every training room (think instructional design or visual design), to radioactive elements, powerful and dangerous yet commonly used (think PowerPoint), Washburn guides you through the pitfalls and choices you confront in creating engaging learning experiences. A well-designed training program can be world-changing, he argues, and if you believe in your craft as a learning professional, you can do this too. Whether you're an experienced learning designer or new to the field, this book inspires with new ideas and ways to organize the design of your learning programs. With stories from Washburn's professional experience, the book includes a hands-on glossary of definitions and descriptions for more than 50 of his elements.

**Visual Design for Online Learning** Torria Davis, 2015-09-08 Update the visual design of your course in pedagogically sound ways Visual Design for Online Learning spotlights the role that visual elements play in the online learning environment. Written for both new and experienced instructors, the book guides you in adding pedagogically relevant visual design elements that contribute to effective learning practices. The text builds upon three conceptual frameworks: active learning, multiple intelligences, and universal design for learning. This resource explores critical issues such as copyright, technology tools, and accessibility and includes examples from top Blackboard practitioners which are applicable to any LMS. Ultimately, the author guides you in developing effective visual elements that will support your teaching goals while reinforcing the learning materials you share with your students. There has been a steady increase of over 10% in online enrollment for higher education institutions since 2002, yet the visual look of online courses has not changed significantly in the last ten years. Adapting to the needs of students within online classes is critical to guiding your students toward success—and the right visual elements can play an integral role in your students' ability to learn and retain the information they need to thrive in their chosen programs. In fact, visual elements have been shown to increase student participation, engagement, and success in an online course. Leverage the best practices employed by exemplary Blackboard practitioners Explore three foundational conceptual frameworks: active learning, multiple intelligences, and universal design for learning Increase student retention and success Visual Design for Online Learning is an essential reference for all online educators—both new and experienced.

**The Semiotics of Light and Shadows** Piotr Sadowski, 2017-12-28 Lighting and shadows are used within a range of art forms to create aesthetic effects. Piotr Sadowski's study of light and shadow in Weimar cinema and contemporaneous visual arts is underpinned by the evolutionary semiotic theories of indexicality and iconicity. These theories explain the unique communicative and emotive power of light and shadow when used in contemporary indexical media including the shadow theatre, silhouette portraits, camera obscura, photography and film. In particular, Sadowski highlights the aesthetic and emotional significance of shadows. The 'cast shadow', as an indexical sign, maintains a physical connection with its near-present referent, such as a hidden person, stimulating a viewer's imagination and provoking responses including anxiety or curiosity. The 'cinematic shadow' plays a stylistic role, by enhancing image texture, depth of field, and tonal contrast of cinematic moments. Such enhancements are especially important in monochromatic films, and Sadowski interweaves the book with accounts of seminal Weimar cinema moments. Sadowski's book is distinctive for combining historical materials and theoretical approaches to develop a deeper understanding of Weimar cinema and other contemporary art forms. The Semiotics of Light and Shadows is an ideal resource for both scholars and students working in linguistics, semiotics, film, media, and visual arts.

**Emotional Ethics of The Hunger Games** Tarja Laine, 2021-05-17 Emotional Ethics of The Hunger Games expands the 'ethical turn' in Film Studies by analysing emotions as a source of ethical knowledge in The Hunger Games films. It argues that emotions, incorporated in the thematic and aesthetic organization of these films, reflect a crisis in moral standards. As such they cultivate ethical attitudes towards such phenomena as totalitarianism, the culture of reality television, and the society of spectacle. The focus of the argument is on cinematic aesthetics, which expresses emotions in a way that highlights their ethical significance, running the gamut from fear through guilt and shame, to love, anger and contempt. The central claim of the book is that these emotions are symptomatic of some moral conflict, which renders The Hunger Games franchise a meaningful commentary on the affective practice of cinematic ethics. "The Hunger Games movies have become iconic symbols for resistance across the globe. Tarja Laine proposes that this is not caused by their status as exciting cinematic spectacles, but by their engaging our emotions. Laine uses The Hunger Games as key texts for understanding our world, demonstrating that ethics do not originate from rational considerations, far removed from those mucky things called emotions. But rather that emotions are at the core of cinematic ethics." —William Brown, Author of Supercinema: Film-Philosophy for the Digital Age "In this elegantly written exploration of the relationship between aesthetics and emotion in The Hunger Gamestrilogy, Tarja Laine illuminates the power of film to embody ethical conflict. Deftly interweaving

film-philosophy and close analysis, Laine traces how these films mobilise complex emotions, nuancing our thinking about cinema and the spectator. Laine's book takes The Hunger Games films seriously, demonstrating with verve why they matter." –Catherine Wheatley, Senior Lecturer in Film Studies, King's College London, UK ''In this fresh, engaging, and insightful study of The Hunger Games film trilogy, Tarja Laine explores the crucial role that emotions play in appreciation of the ethical qualities of the movies. She forges productive dialogues between a range of film theory, scholarship on moral philosophy, and debates on ethics, as she performs a multi-layered investigation of the aesthetic qualities of the trilogy, the multiple emotions embodied in these qualities, and the philosophical-ethical insights that are in turn embedded in these emotions. The cinematic connection between emotions and ethics that emerges through Laine's detailed textual analyses confronts us with complex moral dilemmas while enriching our aesthetic experience.'' –Sarah Cooper, Professor, Film Studies Department, King's College London, UK

New and established scholars with backgrounds across Europe, the United States, and Australia come together to reflect on how the cultural sphere has, and can still, play a role in redefining our relationship to nature.

*Bodies in Pain* Tarja Laine, 2017-04 The films of Darren Aronofsky invite emotional engagement by means of affective resonance between the film and the spectator's lived body. Aronofsky's films, which include a rich range of production from *Requiem for a Dream* to *Black Swan*, are often considered "cerebral" because they explore topics like mathematics, madness, hallucinations, obsessions, social anxiety, addiction, psychosis, schizophrenia, and neuroscience. Yet this interest in intelligence and mental processes is deeply embedded in the operations of the body, shared with the spectator by means of a distinctively corporeal audiovisual style. *Bodies in Pain* looks at how Aronofsky's films engage the spectator in an affective form of viewing that involves all the senses, ultimately engendering a process of (self) reflection through their emotional dynamics.
