Music Distribution and the Internet Andrew Sparrow,2017-03-02 There is hardly an aspect of internet music promotion, sale and distribution which does not have a legal dimension. Since the stakeholders in the process includes artists, their managers, music publishers, record companies, distribution companies and the consumer, the law relating to internet music distribution is extremely complex. Andrew Sparrow's Music Distribution and the Internet provides those connected to the music and media industries with a guide to the legal requirements they must meet, answering questions such as: ¢ How should you conclude contracts with consumers over the internet? ¢ What are the various legal terms and conditions that should govern the sale of physical product to online music buyers? ¢ How should a website user's personal information be handled? ¢ What limitations are there on the way this data may be used for ongoing marketing of an artist's work or the merchandise associated with it? ¢ What are the latest copyright laws in this area and how do they apply to the internet? The book provides practical advice on how to approach key relationships with the internet buying consumer and other online media providers. The law is explained in straightforward terms and applied throughout in a music business context. Music Distribution and the Internet is an essential reference for anyone seeking to exploit and protect their rights and those of their artists in the rapidly expanding, constantly evolving and fascinating arena that is new media.

Handbook on Computer-Aided Techniques for Spectrum Management (CAT) 2015 International Telecommunication Union,2017-07-11 This Handbook should be seen as complementary to Handbooks 'National Spectrum Management' (2015) and 'Spectrum Monitoring' (2011). The topic of national spectrum management has evolved and become the central hot spot in the activities of all telecommunication administrations. This is particularly true for developing countries, where the dramatic development of ICT technologies and their wide application have led to a heavy increase in related spectrum usage. The user/reader will find basic material and numerous models for developing efficient projects that will assist in reaching their objective - implementing automated spectrum management as soon as possible.

Multilevel Regulation of Military and Security Contractors Christine Bakker,Mirko Sossai,2012-02-10 The outsourcing of military and security services is the object of intense legal debate. States employ private military and security companies (PMSCs) to perform functions previously exercised by regular armed forces, and increasingly international organisations, NGOs and business corporations do the same to provide security, particularly in crisis situations. Much of the public attention on PMSCs has been in response to incidents in which PMSC employees have been accused of violating international humanitarian law. Therefore initiatives have been launched to introduce uniform international standards amidst what is currently very uneven national regulation. This book analyses and discusses the interplay between international, European, and domestic regulatory measures in the field of PMSCs. It presents a comprehensive assessment of the existing domestic legislation in EU Member States and relevant Third States, and identifies implications for future international regulation. The book also addresses the crucial questions whether and how the EU can potentially play a more active future role in the regulation of PMSCs to ensure compliance with human rights and international humanitarian law.

The Present and Future of Music Law Ann Harrison,Tony Rigg,2021-07-29 The music business is a multifaceted, transnational industry that operates within complex and rapidly changing political, economic, cultural and technological contexts. The mode and manner of how music is created, obtained, consumed and exploited is evolving rapidly. It is based on relationships that can be both complimentary and at times confrontational, and around roles that interact, overlap and sometimes merge, reflecting the competing and coinciding interests of creative artists and music industry professionals. It falls to music law and legal practice to provide the underpinning framework to enable these complex relationships to flourish, to provide a means to resolve disputes, and to facilitate commerce in a challenging and dynamic business environment. The Present and Future of Music Law presents thirteen case studies written by experts in their fields, examining a range of key topics at the points where music law and the post-digital music industry intersect, offering a timely exploration of the current landscape and insights into the future shape of the interface between music business and music law.

Finance and Security Martin S. Navias,2019-11-01 The global financial sector is increasingly vulnerable to penetration by criminal money-launderers, financiers of terrorism, and proliferators of weapons of mass destruction. At the same time, it offers instruments that can be usefully employed to pursue foreign and security policy objectives. It is thus hardly surprising that finance has emerged as an arena of intense competition, if not conflict, between those seeking to exploit or attack this vital element of state power and those tasked with defending its integrity or harnessing it for legal purposes. Navias assesses the key threats to financial systems and shows how the public and private sectors are co-operating to contain them. He analyses the main characteristics of criminal money-laundering and terrorist financing, and reviews major multilateral and national regimes locked in the perpetual battle to shore up the financial sector against these constantly evolving security challenges. He also considers the uses of finance in support of key sanctions, counter-proliferation, and arms embargo policies. Uniquely, Finance and Security views these financial threats and weapons through a security and war studies prism. It will be equally invaluable to scholars of security and international relations and to professionals working in the legal, banking and compliance professions.

Competition Law in Australia Stephen G. Corones,1999 Corones' Restrictive Trade Practices Law is now completely updated in a new edition, Competition Law in Australia. This new edition reflects the recent dramatic changes in the trade practices legislation. Due to the impact of the Hilmer Report, & hence changes to the teaching syllabus, the book required a change in its focus & breadth. This second edition focuses not just on Part IV (Restrictive Trade Practices) of the Trade Practices Act, but also deals with: * Part IIIA (Access to Services) * Part XIA (the Competition Code) * Part XIB (Anti-competitive Conduct in the Telecommunications Industry), & * Part XIC (Telecommunications Access Regime). The book's important introductory chapter remains, locating competition law within its economic environment, thus providing students with a broader perspective, aiding their understanding of the aims & objectives of the Trade Practices Act. Major areas of change since the previous edition which are now covered in the text include: * the competition law provisions of the Act * the new broader role of the ACCC (Australian Competition & Consumer Commission) * the Competition Reform Policy Act (1995), which introduced into all states, competition codes relating to individuals not just corporations * the repeal of s49 of the TPA on Price Discrimination * the new Evidence Act 1995 (Cth), & * legal professional privilege. For an up-to-date & comprehensive investigation of competition law this book will be invaluable to both students & practitioners.
