Cognitive Processing Routes in Consecutive

Interpreting Xiaodong Liu, 2021-09-13 This book addresses a controversial issue regarding SL-TL transfer in the translation process, namely the question as to the dominant route in English-Chinese and Chinese-English professional consecutive interpretations, respectively: the form-based processing route or meaning-based processing route. It presents a corpus-assisted product study, in which the interpreting processing patterns of culture-specific items (CSIs) are analyzed. The study reveals that the dominant route in English vs. Chinese consecutive interpreting varies under different circumstances. Four factors are proposed to account for such differences: linguistic variables (e.g., grammatical complexity of the unit), type of CSI, language direction, and extra-linguistic variables (e.g., multilateral or bilateral settings). In summary, the book systematically introduces a corpus-assisted approach to translation process research, which will benefit all readers who are interested in translation process research but cannot employ neuroscientific measures.

Screenshots Paul Frosh, 2019-11-21 Je mehr die Welt der Sozialen Medien zu einem zweiten öffentlichen Raum wird, in dem vieles 'live' stattfindet, desto wichtiger wird es, nachträglich noch sehen zu können, was man verpasst hat. Dazu dienen Screenshots. Sie dokumentieren die oft flüchtigen Texte und

Bilder und werden so zum Medium von Zeugenschaft und Erinnerung. Aber erfüllen sie damit nicht dieselben Funktionen, die lange Zeit der Fotografie zukam? Diese Frage steht im Zentrum von Paul Froshs Analyse des Screenshots, die damit zugleich zu einem inspirierenden Gang durch die Geschichte der Fototheorie wird.

Search Engine Marketing for the Chinese Market Anita Gerstmayr, 2014-06-03 Bachelor Thesis from the year 2013 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: 1, FH OÖ Standort Steyr, course: Marketing & E-Business, language: English, abstract: Globalization has brought new opportunities to developing countries, and within the last few decades, especially the People's Republic of China transformed itself from a developing nation behind the bamboo curtain to one of the most influential nations on the world market. China's online population is growing very fast and counted already more than 560 million users in 2012, with a share of more than 70% of mobile Internet users. The Internet has become an indispensable tool for finding information quickly using a search engine. Therefore, for companies trading in China, their website will undoubtedly be vital in enhancing their public image and increasing sales volumes, and improving this website through search engine marketing (SEM) will be crucial to succeed. Due to huge cultural differences and governmental censorship of the Internet in mainland China, doing online business in this country is definitely different as in the Western world. To find out what is necessary for launching an international company website in China successfully, this paper describes and critically analyses the basic knowledge about China's online users and its online media world as well as search engines available in China and the challenges Chinese internet users face because of The Great Firewall. Aiming to provide key input for effective search engine marketing, this thesis combines theoretical background from various literary sources with the

results of the author's online survey and interviews with four online marketing experts, who give an insight into their in-depth know-how of China's online marketing world and to provide advice on effective SEM for China's leading search engine Baidu. Clearly, as this papers shows, practising successful SEO depends on the combination of many different factors and actions. Writing original content, proper usage of keywords, incoming links from authoritative sites and other Baidu-sites are just some issues to be considered. Furthermore a Chinese ISP and content written in well-articulated "Simplified Chinese" are other keys to success. Doing SEA for Baidu is quite challenging, especially for foreigners, because it requires experience with SEA, cultural understanding and perfect knowledge of Chinese to find the right keywords and handle Baidu's SEA and Analytics tool. Nevertheless, understanding China's culture and language is an important factor achieving good online visibility in China.

How the Other Half Looks Sara Blair, 2018-06-05 How New York's Lower East Side inspired new ways of seeing America New York City's Lower East Side, long viewed as the space of what Jacob Riis notoriously called the other half, was also a crucible for experimentation in photography, film, literature, and visual technologies. This book takes an unprecedented look at the practices of observation that emerged from this critical site of encounter, showing how they have informed literary and everyday narratives of America, its citizens, and its possible futures. Taking readers from the mid-nineteenth century to the present, Sara Blair traces the career of the Lower East Side as a place where image-makers, writers, and social reformers tested new techniques for apprehending America—and their subjects looked back, confronting the means used to represent them. This dynamic shaped the birth of American photojournalism, the writings of Stephen Crane and Abraham Cahan, and the forms of early cinema. During the 1930s, the emptying ghetto opened contested views of the modern city, animating the work of such

writers and photographers as Henry Roth, Walker Evans, and Ben Shahn. After World War II, the Lower East Side became a key resource for imagining poetic revolution, as in the work of Allen Ginsberg and LeRoi Jones, and exploring dystopian futures, from Cold War atomic strikes to the death of print culture and the threat of climate change. How the Other Half Looks reveals how the Lower East Side has inspired new ways of looking—and looking back—that have shaped literary and popular expression as well as American modernity.

American Terrorist RYAN. LOVEEACHOTHER,2017-03-30
On December 2, 2015, fourteen people were killed and twenty-two were seriously injured in a mass shooting in San Bernardino, California. The alleged shooters were Syed Farook and Tashfeen Malik, a married couple. Four days later, on prime-time television, President Barack Obama called this shooting the deadliest act of terrorism on U.S. soil since 9/11. American Terrorist is a based-on-true-events screenshot reproduction of Syed Farook's iPhone messages during the six months prior to the attack. But even after studying the FBI's cell-phone surveillance, the media soundbite story doesn't add up. Why would an introverted upper middle class American with a wife, six-month-old daughter, stable job with benefits, posh Lexus, and cozy townhouse take assault rifles on a shooting rampage, killing his amicable officemates on account of some infinitely distant militia group living in the dust and dunes of the Middle East? This exclusive behind-the-screen interview with the doer explains exactly how a complacent American millennial comes down with jihadi fever.
