50 Digital Team-Building Games John Chen,2012-04-04 Use technology to increase loyalty and productivity in your employees 50 Digital Team-Building Games offers fun, energizing meeting openers, team activities, and group adventures for business teams, using Twitter, GPS, Facebook, smartphones, and other technology. The games can be played in-person or virtually, and range from 5-minute ice-breakers to an epic four-hour GPS-based adventure. Designed to be lead by managers, facilitators, presenters, and speakers, the activities help teams and groups get comfortable with technology, get to know each other better, build trust, improve communication, and more. No need to be a techie to lead these games—they're simple and well-scripted. Author John Chen is the CEO of Geoteaming, a company that uses technology and adventure to teach teams how to collaborate. How to lead a simple, fast, fun team building activity with easy-to-follow instructions How to create successful virtual team building that requires NO travel and little to no additional expenses How to engage standoffish engineers, hard to reach technical teams, or Gen X/Y teammates with technology they enjoy using Successful technology-based team building can build buzz for your company, build critically important relationships and communication internally, and keep your team talking about it for weeks afterward!

Seeing the Past with Computers Kevin Kee,Timothy J Compeau,2019-02-01 Recent developments in computer technology are providing historians with new ways to see—and seek to hear, touch, or smell—traces of the past. Place-based augmented reality applications are an increasingly common feature at heritage sites and museums, allowing historians to create immersive, multifaceted learning experiences. Now that computer vision can be directed at the past, research involving thousands of images can recreate lost or destroyed objects or environments, and discern patterns in vast datasets that could not be perceived by the naked eye. Seeing the Past with Computers is a collection of twelve thought-pieces on the current and potential uses of augmented reality and computer vision in historical research, teaching, and presentation. The experts gathered here reflect upon their experiences working with new technologies, share their ideas for best practices, and assess the implications of—and imagine future possibilities for—new methods of historical study. Among the experimental topics they explore are the use of augmented reality that empowers students to challenge the presentation of historical material in their textbooks; the application of seeing computers to unlock unusual cultural knowledge, such as the secrets of vaudevillian stage magic; hacking facial recognition technology to reveal victims of racism in a century-old Australian archive; and rebuilding the soundscape of an Iron Age village with aural augmented reality. This volume is a valuable resource for scholars and students of history and the digital humanities more broadly. It will inspire them to apply innovative methods to open new paths for conducting and sharing their own research.

Media and The City Chiara Giaccardi,Matteo Tarantino,Simone Tosoni,2014-07-18 The percentage of people living in cities and the adoption rates of communication technologies continue to grow across the planet. Our age has come to be defined as one of urbanism and communication; but how are those two intertwined? How do they shape each other? Where and in which ways do they diverge, support or fold into each other? As new tensions emerge and old ones find new solutions, social sciences are forced into a dialogue with media studies and urban studies in order to make sense of the new reality. New theoretical and methodological paradigms are urgently needed, and can be produced only through a fertile and eclectic dialogue. This volume presents some of the latest research in this exciting, cross-disciplinary field. Issues of conflict, mobility, crime, art, memory, ethnicity, identity, and city marketing and branding come under rigorous scrutiny in their mutual and constitutive relationship with urban space and communicative technologies and practices. The volume is divided into three broad sections. The first section deals with the role of media in the social production of urban space – that is, with how media interact with other forces in giving shape to the materiality of the city. The second section deals with how urban space acts as a context for a variety of media-related practices – especially in relation to the popularization of mobile geo-localization technologies which have given us mass phenomena such as Foursquare. The third and final section deals with how urban space is mediatised and communicated through ICTs – or in other terms, how urban space is represented by specific media through specific discursive strategies.

Advanced Location-Based Technologies and Services Hassan A. Karimi,2016-04-19 Since the publication of the first edition in 2004, advances in mobile devices, positioning sensors, WiFi fingerprinting, and wireless communications, among others, have paved the way for developing new and advanced location-based services (LBSs). This second edition provides up-to-date information on LBSs, including WiFi fingerprinting, mobile computing, geospatial clouds, geospatial data mining, location privacy, and location-based social networking. It also includes new chapters on application areas such as LBSs for public health, indoor navigation, and advertising. In addition, the chapter on remote sensing has been revised to address advancements.

Digital Literacies Mark Pegrum,Nicky Hockly,Gavin Dudeney,2014-06-03 Dramatic shifts in our communication landscape have made it crucial for language teaching to go beyond print literacy and encompass the digital literacies which are increasingly central to learners' personal, social, educational and professional lives. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not just the background for a deeper understanding of these key 21st-century skills, but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not

just why but also how to teach digital literacies in the English language classroom. This book provides: A theoretical framework through which to categorise and prioritise digital literacies Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice A consideration of exactly how to integrate digital literacies into the English language syllabus Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks), and how to access teacher development opportunities online This book is ideal for English language teachers and learners of all age groups and levels, academics and students researching digital literacies, and anyone looking to expand their understanding of digital literacies within a teaching framework.

Comparative Textual Media N. Katherine Hayles,Jessica Pressman,2013-12-01 For the past few hundred years, Western cultures have relied on print. When writing was accomplished by a quill pen, inkpot, and paper, it was easy to imagine that writing was nothing more than a means by which writers could transfer their thoughts to readers. The proliferation of technical media in the latter half of the twentieth century has revealed that the relationship between writer and reader is not so simple. From telegraphs and typewriters to wire recorders and a sweeping array of digital computing devices, the complexities of communications technology have made mediality a central concern of the twenty-first century. Despite the attention given to the development of the media landscape, relatively little is being done in our academic institutions to adjust. In Comparative Textual Media, editors N. Katherine Hayles and Jessica Pressman bring together an impressive range of essays from leading scholars to address the issue, among them Matthew Kirschenbaum on archiving in the digital era, Patricia Crain on the connection between a child's formation of self and the possession of a book, and Mark Marino exploring how to read a digital text not for content but for traces of its underlying code. Primarily arguing for seeing print as a medium along with the scroll, electronic literature, and computer games, this volume examines the potential transformations if academic departments embraced a media framework. Ultimately, Comparative Textual Media offers new insights that allow us to understand more deeply the implications of the choices we, and our institutions, are making. Engaging Minds. Proceedings of the National Academy for Integration OfResearch, Teaching and Learning Annual Conference (5Th, Galway, Ireland, June 9-10, 2011). National Academy for Integration of Research, Teaching and Learning (NAIRTL) (Ireland),2011 This publication contains the papers presented at the 5th Annual Conference of National Academy for Integration of Research, Teaching and Learning (NAIRTL) and the 9th Galway Symposium. Presenters from across Ireland and overseas share their perspectives. The theme of engagement touches on the very heart of what a higher education should be about. It is about engaging the mind, struggling to understand new concepts and perspectives, experimenting with new ideas and developing skills, about critically engaging with the world and societal structures, about laying the foundations upon which to build a better future, about nurturing individual creativity and collective responsibility and hopefully also about having some fun along the way.

Advanced Theory and Practice in Sport Marketing Eric C. Schwarz,Jason D. Hunter,Alan LaFleur,2013 Effective marketing is essential for any successful sport organization, from elite professional sports teams to local amateur leagues. Now in a fully revised and updated second edition, Advanced Theory and Practice in Sport Marketing is still the only text to introduce key theory and best practice at an advanced level. The book covers every key functional and theoretical area of sport marketing, including marketing research, information systems, consumer behavior, logistics, retail management, sales management, e-commerce, promotions, advertising, sponsorship, and international business. This new edition includes expanded coverage of important contemporary issues, including social responsibility and ethics, social media and networking, relationship and experience marketing, recovery marketing, and social marketing. Every chapter contains extended cases and first-hand accounts from experienced sport marketing professionals from around the world. Following those cases are questions encouraging students and practitioners to apply their theoretical knowledge to real-world situations and to develop their critical thinking skills, while each chapter also includes helpful features such as definitions of key terms, summaries, and guides to further reading. A companion website includes an impressive array of additional teaching and learning resources, including a test bank of exam questions, PowerPoint slides, and extra case studies for lecturers and instructors, and useful web links, self-test multiple-choice questions, and glossary flashcards for students. Advanced Theory and Practice in Sport Marketing goes further than any other sport marketing text in preparing the student for the real world of sport marketing. It is essential reading for any upper-level undergraduate or postgraduate course in sport marketing or sport business, and for anybody working in sport marketing looking to develop and extend their professional skills.

Patients Charting the Course Institute of Medicine,Roundtable on Value and Science-Driven Health Care,2011-10-21 As past, current, or future patients, the public should be the health care system's unwavering focus and serve as change agents in its care. Taking this into account, the quality of health care should be judged not only by whether clinical decisions are informed by the best available scientific evidence, but also by whether care is tailored to a patient's individual needs and perspectives. However, too often it is provider preference and convenience, rather than those of the patient, that drive what care is delivered. As part of its Learning Health System series of workshops, the Roundtable on Value & Science-Driven Health Care hosted a workshop to assess the prospects for improving health and lowering costs by advancing patient involvement in the elements of a learning health system.
