The New Diary Tristine Rainer,1979-07-01 The New Diary is about a completely modern concept of journal writing. It has little to do with the rigid daily calendar diary you may have kept as a child or the factual travelogue you wrote to recall the Grand Canyon. Instead, it is a tool for tapping the full power of your inner resources. The New Diary is as much for those who already keep a journal as it is for those who have never kept one. It does not tell you the right way to keep a diary; rather, it offers numerous possibilities for using the diary to achieve your own purposes. It is a place for you to clarify goals, visualize the future, and focus your energies; a means of freeing your intuition and imagination; a workbook for exploring your dreams, your past, and your present life. It is for everyone seeking concrete methods for dealing with personal problems. It is for women and men interested in achieving self-reliance and inner liberation, for artists and writers seeking new techniques for overcoming blocks to creativity.

Leadership In Conflict Matthew Hughes,Matthew Seligmann,1990-12-31 The First World War was a conflict in which personality and character mattered. Its course and outcome were decided by determined individuals who had to make momentous decisions in very trying circumstances. As battles raged on land, sea and air across Europe, Africa and Asia, the Generals and politicians tried to steer a course to victory. It was never easy and they often disagreed on the best strategy. Yet, men's lives depended on the outcome. This collection of authoritative essay examines these disagreements, portraying the decision-making process on both sides in the Great War. The personalities involved are now household names: Haig, Foch, Lloyd George, Woodrow Wilson and the German Kaiser, William II.

Malice Aforethought Ian Jones,2021-06-02 War has always provided a stimulus to technological development, and throughout the twentieth century this new technology was harnessed to produce increasingly deadly and malicious types of explosives in the form of booby traps, mines, delayed-action devices and mobile charges. Designed, constructed or adopted to kill or injure, these lethal mechanisms function when a person disturbs or approaches a seemingly harmless object or performs an apparently safe act. In other instances they are set off by remote control or automatically after a lapse of time. Fully illustrated with diagrams and photographs, *Malice Aforethought* traces the design, deployment and effectiveness of these deadly devices throughout both world wars to the Vietnam War. Expertly and compellingly written, this unique study is a tribute to the brave men who risked their lives daily to neutralise the booby traps laid in the dimly lit dugouts of the Western Front, on the beaches of Normandy, or in the dark and dangerous tunnels of Chu Chi.
