Multidimensional Quantum Dynamics Hans-Dieter Meyer,Fabien Gatti,Graham A.

Worth,2009-05-26 The first book dedicated to this new and powerful computational method begins with a comprehensive description of MCTDH and its theoretical background. There then follows a discussion of recent extensions of MCTDH, such as the treatment of identical particles, leading to the MCTDHF and MCTDHB methods for fermions and bosons. The third section presents a wide spectrum of very different applications to reflect the large diversity of problems that can be tackled by MCTDH. The result is handbook and ready reference for theoretical chemists, physicists, chemists, graduate students, lecturers and software producers.

Imagery of Colour & Shining in Catullus, Propertius & Horace Jacqueline Clarke,2003 In recent years there has been growing interest in the concepts of pictorial vividness («enargeia») and pictorial description («ekphrasis») in the works of ancient writers. Colour imagery can play a significant part in such pictorial effects. This book explores the visual and stylistic contributions that words for colour and shining make to the poetry of Catullus, Propertius, and Horace. First, the instances of colour usage by the three poets are analyzed and compared with the colour imagery of other ancient poets and artists. «Colour readings» of selected poems follow, illustrating how colours are employed by these poets to heighten the visual impact of their poems and influence the reader's emotional responses. This book fills a gap in the scholarship on colour in ancient poetry and provides fresh perspectives on the work of three important poets.

Stoll,2012-12-06 Shear waves and closely related interface waves (Rayleigh, Stoneley and Scholte) play an important role in many areas of engineering, geophysics and underwater acoustics. In some cases interest is focused on large-amplitude waves of low frequency such as those associated with earthquakes and nuclear explosions; in other cases low amplitude waves, which have often travelled great distances through the sediment, are of interest. Both low and high frequency shear and interface waves are often used for seafloor probing and sediment characterization. As a result of the wide spectrum of different interests, different disciplines have developed lines of research and a literature particularly suited to their own problems. For example water-column acousticians view the seafloor sediment as the lower boundary of their domain and are interested in shear and interface waves in the near bottom sediments mainly from the standpoint of how they influence absorption and reflection at this boundary. On the other hand, geophysicists seeking deep oil deposits are interested in the maximum penetration into the sediments and the tell-tale characteristics of the seismic waves that have encountered potential oil or gas bearing strata. In another area, geotechnical engineers use shear and interface waves to study soil properties necessary for the design and the siting of seafloor structures.

Narration and Hero Victor Millet,Heike Sahm,2014-07-28 By the early middle ages vernacular aristocratic traditions of heroic narration were firmly established in Western and Northern Europe.

Although there are regional, linguistic and formal differences, one can observe a number of similarities. Oral literature disseminates a range of themes that are shared by narratives in most parts of the continent. In all the European regions, this tradition of heroic narration came into contact with Christianity, which led to modifications. Similar processes of adaptation and transformation can be traced everywhere in this field of early European vernacular narrative. But with the increasing specialization of academic fields over the last half century, inter-disciplinary dialogue has become increasingly difficult. The volume is a contribution to renew the inter-disciplinary dialogue about common themes, topics and motifs in Nordic, Roman, Anglo-Saxon and Germanic literature, and about the different methodologies to explore them.
