An Introduction to Search Engines and Web Navigation Mark

Levene,2011-01-14 This book is a second edition, updated and expanded to explain the technologies that help us find information on the web. Search engines and web navigation tools have become ubiquitous in our day to day use of the web as an information source, a tool for commercial transactions and a social computing tool. Moreover, through the mobile web we have access to the web's services when we are on the move. This book demystifies the tools that we use when interacting with the web, and gives the reader a detailed overview of where we are and where we are going in terms of search engine and web navigation technologies.

Google Search Secrets Christa Burns, Michael P. Sauers, 2014

Google can be an incredibly powerful tool for research, but the top-of-the-page results are seldom the most beneficial to library users and students, and many of the search engine's most useful features are hidden behind its famously simple interface. Burns and Sauers reveal the secrets of effective Google searches in this invaluable resource showing how to get the most out of the service, with An overview of all the tool's search services, including Image, Maps, News, Blogs, Discussions, Scholar, Patents, and Books Ready-to-use instructions on how to go beyond the simple search box and top results to get library users the answers they need, fast Straightforward guidance on using filters to refine search results, with examples of common searches like images with Creative Commons licenses, news searches set for a date range or into an archive, and videos with closed captioning An explanation of the bibliography manager feature of Google Scholar, which allows students and researchers to build bibliographies with ease Tips for configuring Safe Search on workstations in children's departments and schools Copious screenshots walk readers through each topic step by step, making this a true how-to guide for everyone who uses Google.

Search Engine Optimization Harold Davis, 2006-05-23 SEO--short for Search Engine Optimization--is the art, craft, and science of driving web traffic to web sites. Web traffic is food, drink, and oxygen--in short, life itself--to any web-based business. Whether your web site depends on broad, general traffic, or high-quality, targeted traffic, this PDF has the tools and information you need to draw more traffic to your site. You'll learn how to effectively use PageRank (and Google itself); how to get listed, get links, and get syndicated; and much more. The field of SEO is expanding into all the possible ways

of promoting web traffic. This breadth requires a range of understanding. In this PDF you'll find topics that cover that range, so you can use SEO to your benefit. Those topics include: Understanding how to best organize your web pages and websites. Understanding technologic and business tools available that you can use to achieve your SEO goals. Understanding how Google works. (Since Google is far and away the most important search engine, effectively using SEO means effectively using Google. This PDF covers how to boost placement in Google search results, how not to offend Google, how best to use paid Google programs, and more.) Understanding best SEO practices (whether your organization is small and entrepreneurial, or whether you have responsibility for a large web presence). When you approach SEO, you must take some time to understand the characteristics of the traffic that you need to drive your business. Then go out and use the techniques explained in this PDF to grab some traffic--and bring life to your business.

Search Engines for the World Wide Web Alfred

Glossbrenner, Emily Glossbrenner, 2001 Demonstrates successful search strategies while analyzing the strengths and weaknesses of Yahoo!, AltaVista, Excite, Infoseek, Lycos, and Hot-Bot, describing advanced features and query terminology for each.

Web Dragons Ian H. Witten, Marco Gori, Teresa

Numerico, 2010-07-27 Web Dragons offers a perspective on the world of Web search and the effects of search engines and information availability on the present and future world. In the blink of an eye since the turn of the millennium, the lives of people who work with information have been utterly transformed. Everything we need to know is on the web. It's where we learn and play, shop and do business, keep up with old friends and meet new ones. Search engines

make it possible for us to find the stuff we need to know. Search engines — web dragons — are the portals through which we access society's treasure trove of information. How do they stack up against librarians, the gatekeepers over centuries past? What role will libraries play in a world whose information is ruled by the web? How is the web organized? Who controls its contents, and how do they do it? How do search engines work? How can web visibility be exploited by those who want to sell us their wares? What's coming tomorrow, and can we influence it? As we witness the dawn of a new era, this book shows readers what it will look like and how it will change their world. Whoever you are: if you care about information, this book will open your eyes and make you blink. Presents a critical view of the idea of funneling information access through a small handful of gateways and the notion of a centralized index--and the problems that may cause Provides promising approaches for addressing the problems, such as the personalization of web services Presented by authorities in the field of digital libraries, web history, machine learning, and web and data mining Find more information at the author's site: webdragons.net

Search Engine Visibility, Second Edition Shari

Efficient Information Searching on the Web Jonas

Fransson, 2010-05 Information searching on the Web has become part of our everyday life. Efficient Information Searching on the Web

deals with different aspects which are important to become a better searcher. To search for information is one of the most common occupations on the Web. We do it for work, for studies and in our spare time. We search for information about illnesses, far away countries or spare parts for the car. The Web is an important source of information, no matter if you are a journalist, a student, a university researcher or a teacher. Everybody can become more effective when it comes to searching for information. Central matters of the book are: How does a search engine work? How may the search services be used more efficiently? What is the invisible Web? How can the information be managed once it is found?

You'll learn to: Take advantage of free hosting, free tools, and a simple, straightforward interface with Google Sites Set up a Google account or Google Apps account Create wiki sites that let coworkers collaborate on projects or keep family members up to date Use Google gadgets to keep track of projects, manage calendars and documents, or display photos Integrate documents, spreadsheets, presentations, and other Google Apps into your site Work with Contact List, Google Talk, and Google Chat, and handle e-mail with Gmail Download and install the speedy Google Chrome browser

Install browser plug-ins, enable offline access to Google Docs, and manage misbehaving tabs You'll even find instructions and examples to help you plan sites for personal and business use, plus a sample college course site. With advice from *Google Sites & Chrome For Dummies*, you can make collaboration easy and have the high-speed Web at your fingertips.

Google Power Search Stephan Spencer, 2011-07-23 Behind Google's deceptively simple interface is immense power for both market and competitive research—if you know how to use it well. Sure, basic searches are easy, but complex searches require specialized skills. This concise book takes you through the full range of Google's powerful search-refinement features, so you can quickly find the specific information you need. Learn techniques ranging from simple Boolean logic to URL parameters and other advanced tools, and see how they're applied to real-world market research examples. Incorporate advanced search operators such as filetype:, intitle:, daterange:, and others into your queries Use Google filtering tools, including Search Within Results, Similar Pages, and SafeSearch, among others Explore the breadth of Google through auxiliary search services like Google News, Google Books, Google Blog Search, and Google Scholar Acquire advanced Google skills that result in more effective search engine optimization (SEO)

Google's PageRank and Beyond Amy N. Langville, Carl D. Meyer, 2006-07-23 Why doesn't your home page appear on the first page of search results, even when you query your own name? How do other web pages always appear at the top? What creates these powerful rankings? And how? The first book ever about the science of web page rankings, *Google's PageRank and Beyond* supplies the answers to these and other questions and more. The book serves two

very different audiences: the curious science reader and the technical computational reader. The chapters build in mathematical sophistication, so that the first five are accessible to the general academic reader. While other chapters are much more mathematical in nature, each one contains something for both audiences. For example, the authors include entertaining asides such as how search engines make money and how the Great Firewall of China influences research. The book includes an extensive background chapter designed to help readers learn more about the mathematics of search engines, and it contains several MATLAB codes and links to sample web data sets. The philosophy throughout is to encourage readers to experiment with the ideas and algorithms in the text. Any business seriously interested in improving its rankings in the major search engines can benefit from the clear examples, sample code, and list of resources provided. Many illustrative examples and entertaining asides MATLAB code Accessible and informal style Complete and self-contained section for mathematics review

Professional Search Engine Optimization with PHP Cristian Darie,Jaimie Sirovich,2007-04-18 Maybe you're a great programmer or IT professional, but marketing isn't your thing. Or perhaps you're a tech-savvy search engine marketer who wants a peek under the hood of a search engine optimized web site. Search engine marketing is a field where technology and marketing are both critical and interdependent, because small changes in the implementation of a web site can make you or break you in search engine rankings. Furthermore, the fusion of technology and marketing know-how can create web site features that attract more visitors. The mission of this book is to help web developers create web sites that rank well with the major search engines, and to teach search engine marketers how to use technology to their advantage. We assert that neither marketing nor IT can exist in a vacuum, and it is essential that they not see themselves as opposing forces in an organization. They must work together. This book aims to educate both sides in that regard.

Google Ajax Search API Michael Fitzgerald, Ali Pasha, 2007-09-17

Use the Google Ajax Search API to integrate web search, image search, local search, and other types of search into your web site by embedding a simple, dynamic search box to display search results in your own web pages using a few lines of JavaScript. For those who do not want to write code, the search wizards and solutions built with the Google Ajax Search API generate code to accomplish common tasks like adding local search results to a Google Maps API mashup, adding video search thumbnails to your web site, or adding a news reel with the latest up to date stories to your blog. More advanced users can directly access the raw search results to heavily customize the look and feel of results for your web application, and create new and innovative mashup applications.
