**Shrimp Culture** PingSun Leung,Carole R. Engle,2008-02-15 Published in Cooperation with THE WORLD AQUACULTURE SOCIETY Shrimp is the most important commodity, by value, in the international seafood trade. The shrimp industry has grown exponentially in the last decades, and growth is expected to continue for years to come. For future success in the shrimp industry, shrimp farmers and aquaculture scientists will find a thorough knowledge of the economics, market, and trade as important as an understanding of disease management or husbandry. Shrimp Culture: Economics, Market, and Trade brings together recent findings of researchers from around the world working in various aspects of the economics of shrimp farming. This volume covers all major aspects of the economics, trade, and markets for shrimp worldwide, with chapters written by experts from major consuming countries such as the U.S.A. and major providers such as China, Thailand and Brazil. The book has been carefully edited by PingSun Leung and Carole Engle, both well known and respected internationally for their work in this area. Shrimp Culture is an essential purchase for everyone involved in this massive industry across the globe.

*A Graphic Summary of Farm Crops* United States. Bureau of Agricultural Economics,1943 Graphic summaries of the chief census figures regarding agriculture, designed to bring out certain needed points in the most salient way, are an answer to practical demands in war as well as in peace. Maps, singly or consecutively, not only present facts but also show how acreage and production are affected by economic and climatic factors, by man-made adjustments, by soil-damage, and now by dislocations of war, which were influencing our whole economic structure by the end of 1939.
