One night, Corchado received a tip that he could be the next target of the Zetas, a violent paramilitary group—and that he had twenty-four hours to find out if the threat was true. Buyology Martin Lindstrom,2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Eat Mexico: Recipes from Mexico City's Streets, Markets and Fondas Lesley Tellez,2019-06-17 Eat Mexico is a love letter to the intricate cuisine of Mexico City, written by a young journalist who lived and ate there for four years. It showcases food from the city's streets: the football-shaped, bean-stuffed corn tlacoyo, topped with cactus and salsa; the tortas bulging with turkey confit and a peppery herb called papalo; the beer-braised rabbit, slow-cooked until tender. The book ends on a personal note, with a chapter highlighting the creative, Mexican-inspired dishes - such as roasted poblano oatmeal - that Lesley cooks at home in New York with ingredients she discovered in Mexico. Ambitious cooks and armchair travellers alike will enjoy Lesley's Eat Mexico.

The Secret Book of Frida Kahlo F. G. Haghenbeck,2012-09-25 One of Mexico's most celebrated new novelists, F. G. Haghenbeck offers a beautifully written reimagining of Frida Kahlo's fascinating life and loves. When several notebooks were recently discovered among Frida Kahlo's belongings at her home in Coyoacán, Mexico City, acclaimed Mexican novelist F. G. Haghenbeck was inspired to write this beautifully wrought fictional account of her life. Haghenbeck imagines that, after Frida nearly died when a streetcar's iron handrail pierced her abdomen during a traffic accident, she received one of the notebooks as a gift from her lover Tina Modotti. Frida called the notebook "The Hierba Santa Book" (The Sacred Herbs Book) and filled it with memories, ideas, and recipes. Haghenbeck takes readers on a magical ride through Frida's passionate life: her long and tumultuous relationship with Diego Rivera, the development of her art, her complex personality, her hunger for experience, and her ardent feminism. This stunning narrative also details her remarkable relationships with Georgia O'Keeffe, Leon Trotsky, Nelson Rockefeller, Ernest Hemingway, John Dos Passos, Henry Miller, and Salvador Dalí. Combining rich, luscious prose with recipes from "The Hierba Santa Book," Haghenbeck tells the extraordinary story of a woman whose life was as stunning a creation as her art.

Eels and Humans Katsumi Tsukamoto,Mari Kuroki,2013-10-29 This book explains much of what is known currently about freshwater eels, focusing on social and cultural aspects as well as science. A wealth of eel-related material is presented by scientists from around the world, including information on eel fishing, resources, distribution, aquaculture, economics, cuisine, environment and ecosystems, idioms, arts and crafts, tradition, legends, mythology, archaeology and even memorial services. Eels are important as food for humankind and are an interesting model for scientists studying animal migration and reproductive ecology. Their snake-like morphology differentiates them from most other fish, and their unpredictable behaviour that allows them to move over wet land and climb rocks adjacent to waterfalls attracts attention and evokes curiosity. Eels are therefore considered to be enigmatic creatures or metaphysical entities beyond human intelligence; indeed, they have been deified in parts of the world. In recent decades, however, with global populations of eels in sharp decline, some species face a real threat of extinction, and effective conservation strategies and measures are needed. Comparisons across these issues between various countries provide an image of a long-lasting relationship between eels and humankind, and encourage comprehensive and detailed understanding of eels from the perspectives of social, cultural and natural sciences. By promoting understanding of the close relationship between eels and humans, the broader public is engaged and public awareness of eel importance raised, helping to conserve these unique but endangered fish.
