Pennsylvania Main Line Railroad Stations Jim Sundman,2016-08-24 In 1857, the Pennsylvania Railroad (PRR) took over Pennsylvania's Main Line of Public Works, a state-owned railroad and canal system built in the 1830s. Costly to build and maintain, and never attracting the traffic needed to sustain it, the state was eager to let it go. Keeping the rail portion and combining it with its own lines, the PRR ultimately developed a well-built and well-run rail line from Philadelphia to Pittsburgh all while keeping the "main line" moniker. The eastern section between Philadelphia and Harrisburg was especially successful, particularly after the railroad built new communities along the line that were at first summer destinations and later year-round homes for daily commuters. Other towns and cities along the main line had a strong industrial or agricultural base needing rail access, and many of these communities had attractive train stations. Images of America: Pennsylvania Main Line Railroad Stations: Philadelphia to Harrisburg documents many of these passenger stations through vintage photographs and other images. Most are gone, but fortunately some still stand and are in use today.

Radom Regional Railway Tomasz Gęsiak, The outline of the Radom Regional Railway was created in response to the question whether the railway in Radom could be used as an urban railway. Ultimately, it turned out that its potential was much wider than just the city area, encompassing existing regional connections. That is why the RRR Concept was created, which assumes the development of regional connections with the center of the region, i.e. Radom. The publication is divided into seven parts so that the reader can better understand the railway infrastructure in Radom. The first three chapters contain information collected by the author as starting material for further analyzes and assumptions. Chapter four presents current solutions used in suburban railways around the world, including in Poland, especially in larger provincial centers. Chapters five and seven present the main assumptions of the Radom Commuter Railway as a project ready for implementation. The fifth part focuses on the role of the city of Radom as the natural center of the region.

Philadelphia Trolleys Roger DuPuis II,2017-01-23 Using evocative photographs from private collections, Philadelphia Trolleys: From Survival to Revival carries readers on a nostalgic trip through nearly 50 years of transportation history, starting with the takeover of local transit service from the private sector by Southeastern Pennsylvania Transportation Authority (SEPTA). Sporting a rainbow of paint schemes in the 1970s, Philadelphia's fleet of streamlined 1940s trolley cars brought a welcome splash of color to gritty city streets. But more than a coat of paint was needed for America's largest surviving streetcar network, and SEPTA faced tough choices about how much to keep as aging vehicles and infrastructure desperately required renewal or replacement. Long-lived Presidents' Conference Committee (PCC) streamliners were retired, and SEPTA invested in Kawasaki light-rail vehicles, which are still serving Philadelphia commuters 35 years later. Many SEPTA PCC cars found new homes, from Maine to San Francisco—and, more recently, on SEPTA's own revived Girard Avenue line. The story comes full circle as SEPTA officials once again gear up to select a new generation of Philadelphia trolleys.

Aids for Rail Car Side-door Observation Telephonics Corporation,1995 This report presents the findings of a research program designed to: a) evaluate current door observation practices and procedures and assess how they relate to transit property characteristics, such as facilities, vehicle configurations, and operating procedures; b) identify the range and scope of existing observation aids and assess their merits relative to their specific applications; c) identify promising observation technologies and define conceptual observation aids based on them; and d) develop guidelines for transit system use in the selection and implementation of observation aids for their specific application.

Underground Philadelphia Harry Kyriakodis,Joel Spivak,2019-02-11 Explore Philadelphia's relationship with the underground, as old as the city itself, dating back to when Quaker settlers resided in caves alongside the Delaware River more than three hundred years ago. Explore the city under the The City of Brotherly Love, which became a national and world leader in the delivery of water, gas, steam, and electricity during the industrial age. The construction of multiple subway lines within Center City took place during the early twentieth century. An intricate subsurface pedestrian concourse was also developed throughout the downtown area for the city's inhabitants. From Thirtieth Street Station and Reading Terminal to the Commuter Rail Tunnel and transit lines that were never built, Philadelphia's infrastructure history is buried under the earth as much as above. Join authors Harry Kyriakodis and Joel Spivak as they reveal the curious aspects of the Quaker City's underground experience.
