Merchants of Deception Eric Scheibeler, 2009-10-23

Merchants of Deception - Written by a former government auditor and high level Amway insider who was the last one who wanted to discover massive consumer fraud. This book is gripping tale for anyone who has been or loves someone who has been recruited into a network marketing business. This well documented book has been utilized by government authorities in both India and the UK to take action against Amway's deceptive business scheme which knowingly has created losses for the majority of all induced to invest.

Development and Uses of Biofortified Agricultural Products

Gary S. Banuelos, Zhi-Qing Lin, 2008-10-23 Although ending world hunger remains the most important goal, increasingly the focus is on simultaneously improving world malnutrition. Paradoxically, nutritionally important trace elements essential for human health are both deficient and over-abundant in soils in many regions of the world. Using a multidisciplinary approach, *Development and Uses of Biofortified Agricultural Products* provides new strategies and techniques for the production of biofortified agricultural products from different soils. Seventeen contributors from twelve countries explore the effects of environmental and biological factors on the accumulation and speciation of nutritionally important trace elements in agricultural products. They explore novel strategies regarding the functional foods and animal feed and other forms of biofortified agricultural products. The text addresses alternative biosources and bioproducts produced from phytoremediation processes as well as the bioavailability and the effects of bioproduct compounds. The editors comprehensively synthesize the ever-mounting body of new information on biofortification, including theoretical, practical, and practiced

agricultural-based strategies in micronutrient management and improvement in different types of soils. The book provides a unique and useful platform to further the understanding of nutritionally important trace elements in the context of biogeochemistry, food chain transfer, and health-related issues.

A Nomenclatural Study of the Ganodermataceae Donk Jean-Marc Moncalvo, Leif Ryvarden, 1997

Dietary Chinese Herbs Yanze Liu, Zhimin Wang, Junzeng Zhang, 2015-05-18 This work presents up-to-date information on chemical, pharmacological, clinical studies and historical uses of common dietary Chinese herbs. Authored by native experts in the field, the reader is introduced to each herb with a brief chronological review of Chinese literature on dietary herb uses, with chapters dedicated to each selected herb including color photos for each herb. In addition, Chinese characters as well as the Latin botanical name indices, and chemical structures for the known active compounds are also provided. The clear layout examines the health benefits that have been studied for centuries, including current clinical and toxicological data. A wide range of Traditional Chinese Medicine (TCM) herbs are investigated for their suitability into daily diets for maintaining general wellness or disease prevention. In the past decades, natural health products, dietary supplements, functional foods, or nutraceuticals have emerged in the West due to the increasing demand for non-pharmaceutical healthcare products. Traditional Chinese Medicine disease prevention and treatment incorporates the use of foods, and herbal medicine in an integrated manner, and thus the dietary Chinese herbs in used in TCM for thousands of years could be sources for developing new, effective, and safe ingredients to capture the rapidly expanding opportunity in the global market place.

Herbal and Traditional Medicine Lester Packer, Sissi Wachtel-Galor, Choon Nam Ong, Barry Halliwell, 2004-08-30 Responding to the increased popularity of herbal medicines and other forms of

complementary or alternative medicine in countries around the world, this reference reviews and evaluates various safety, toxicity, and quality-control issues related to the use of traditional and herbal products for health maintenance and disease prevention and treatment. With over 3,550 current references, the book highlights the role of herbal medicine in national health care while providing case studies of widely used herbal remedies and their effects on human health and wellness and the need for the design and performance of methodologically sound clinical trials for the plethora of herbal medicines.

Biotechnology Annual Review M.R. El-Gewely, 1995-11-14

The Biotechnology Annual Review covers the various developments in biotechnology in the form of comprehensive, illustrated and well referenced reviews. With the expansion of the field of biotechnology, coupled with the vast increase in the number of new journals reporting recent results in this field, the need for a publication that is continuously providing reviews is urgent. Hence, each volume of the Biotechnology Annual Review will have a number of reviews covering different aspects of biotechnology. Reviewed topics will include biotechnology applications in medicine, agriculture, marine biology, industry, bioremediation and the environment. Fundamental problems dealing with enhancing the technical knowledge encountering biotechnology utilization regardless of the field of application will be particularly emphasized. This series will help both students and teachers, researchers as well as administrators to remain knowledgeable on all relevant issues in biotechnology. Proposals for contributions and/or suggestions for topics for future volumes in this series should be sent to the Editor: professor M.R. Fungi for Human Health Uzma Azeem, Khalid Rehman Hakeem, M. Ali, 2021-10-08 Current research lays emphasis on exploring natural products for use in nutraceuticals and pharmaceuticals to overcome various side effects of synthetic drugs. Fungi occupy an eminent position among natural sources of food and medicinal importance since ancient times. Many fungal species have been eaten as food and used in folk medicine for the treatment of many human ailments as mentioned in traditional medical literature. However, scanty information is available pertaining to the nutraceutical and pharmaceutical importance of fungi which merits an extensive review. This book spotlights the use value macrofungi in human health. Macrofungi with health benefitting properties largely belong to Basidiomycota followed by Ascomycota growing indoor (cultivated) and outdoor (wild). We endeavoured to throw light on the benefits of macrofungal taxa in relation to their food and medicinal significance in human life. We provided knowledge pertaining to the ethnomycological significance of macrofungi with respect to their uses as food and medicine by the people inhabiting different parts of the world. This book highlights the nutritional composition and bioactive compounds present in macrofungi. We also focused on the pharmacological activities of macrofungi contributing towards their medicinal value against several human disorders. We cited many commercially available nutraceutical and pharmaceutical products of macrofungal origin. This work will hopefully serve as a basic reference for general public, mycologists, researches and industry men, interested in consumption, research and marketing of macrofungi.
