GFI Network Security and PCI Compliance Power Tools Brien Posey, 2011-04-18 Today all companies, U.S. federal agencies, and non-profit organizations have valuable data on their servers that needs to be secured. One of the challenges for IT experts is learning how to use new products in a time-efficient manner, so that new implementations can go quickly and smoothly. Learning how to set up sophisticated products is time-consuming, and can be confusing. GFI's LANguard Network Security Scanner reports vulnerabilities so that they can be mitigated before unauthorized intruders can wreck havoc on your network. To take advantage of the best things that GFI's LANguard Network Security Scanner has to offer, you'll want to configure it on your network so that it captures key events and alerts you to potential vulnerabilities before they are exploited. In this book Brien Posey has pinpointed the most important concepts with examples and screenshots so that systems administrators and security engineers can understand how to get the GFI security tools working quickly and effectively. His straightforward, no nonsense writing style is devoid of difficult to understand technical jargon. His descriptive examples explain how GFI's security tools enhance the security controls that are already built into your server's operating system.

Trial Presentation Companion Shannon Lex Bales, 2018-06-22 Defendant Reginald McKay, a mentally disturbed American who became a home-grown Islamic terrorist, poisoned members of a Jewish temple during Passover seder. After one of the The Trial Presentation Companion: A Step-by-Step Guide to Presenting Electronic Evidence in the Courtroom, written by award-winning legal technologist Shannon Lex Bales, is NITA's first-ever, comprehensive "how-to" manual on running electronic evidence in the courtroom. This face-saving guide will help you and your firm expand your comfort zone in working with all the bits and pieces—laptops, trial presentation software, document cameras, audio-visual components, the puzzling array of cords and cables—that are increasingly essential when presenting electronic evidence in court in the modern era. Checklists and guides are included to help your firm create a technology plan for trial and recognize where opposing firms may attempt less-than-reputable technical tactics, such as burden shifting, to throw a monkey wrench in your trial plan. For the judiciary, the book presents a warts-and-all view of trial technology and discusses reasonable presentation obligations by firms to the court and how the court can ensure more efficient technological processes and fewer problems in the courtroom. Part One, Trial Presentation in Theory, is just that: a theoretical explanation, in plain (and often tongue-in-cheek) English, about why expert trial technologists do what they do during pretrial and in court—how to organize and name exhibit files, choose the best software for your needs, build a trial kit of equipment to take to court, comply with the Trial Management Order, develop an effective workflow, cultivate relationships that provide mutual support in court and out, and much more. Included as a free bonus are ready-to-use forms and checklists for you to download and use to help you mind the details of your case. Part Two, Trial Presentation in Practice, shows you, step by illustrated step, how you, too, can bring that same game to your own legal team as you huddle for trial. Even if you don't know an HDMI port from a VGA and have never set up a folder system on your server before, The Trial Presentation Companion will show you how, and before you know it, you'll be running the show like you were born to it. This book is suitable for everyone from judges and law firm partners and associates to law students, budding trial technologists, and paralegals. Whatever your position, we envision you using this eBook alongside your computer, open on either an iPad or a secondary monitor while you plan and execute your courtroom presentation plan. This eBook's functionality is optimized on an iPad because it enables you to pinch-zoom the graphics to view the details, but it may also be downloaded to your desktop and viewed with Adobe Digital Editions. Digital Reader is an eBook reader for PC and Mac—and best of all, it's free.

Electronic monitoring in tuna fisheries Stobberup, K., Anganuzzi, A., Arthur-Dadzie, M., Baidoo-Tsibu, G., Hosken, M., Kebe, P., Kuruc, M., Loganimoce, E., Million, J., Scott, G., Spurrier, L., Tavaga, N., 2021-02-24 Illegal, unreported and unregulated (IUU) fishing is a serious threat to sustainable fisheries, marine ecosystems and the livelihoods of legitimate fishers globally. To address it, the Common Oceans ABNJ Tuna Project is exploring ways to strengthen and harmonize the use of monitoring, control and surveillance tools, and combat IUU fishing in tuna fisheries across the marine areas beyond national jurisdiction. One tool is the use of electronic monitoring systems to monitor individual vessel operations at sea. In a typical electronic monitoring application, cameras, recording video or still images, are deployed at key points on the vessel to allow a view of the fishing operation. The video footage is stored on hard drives that government officials can use to review compliance with regulations, as well as record detailed data on catch and effort. It was envisaged that industry would have access to these data for its own operational purposes. To test the best way to incorporate this technology as complementary compliance tool, two pilot trials were set up: one in Ghana to cover the domestic tuna purse seine fleet fishing; and one in Fiji to cover the domestic longline fisheries. Close collaboration was established between national governments and industry for implementation. The overall aim of the pilots was to develop an effective implementation process at the national level, so that the information could be properly utilized for compliance purposes. This report documents the successful completion of these trials, and the lessons learned that could benefit electronic monitoring programmes elsewhere.

To meet these challenges, this book entitled Drug Discovery and Clinical Research has been compiled. All chapters have been written by stalwarts of the field who have their finger on the pulse of the industry. The aim of the book is to provide succinctly within one cover, an update on all aspects of this wide area. Although each of the chapter dealt here starting from drug discovery and development, clinical development, bioethics, medical devices, pharmacovigilance, data management, safety monitoring, patient recruitment, etc. are topics for full-fledged book in themselves, an effort has been made via this book to provide a bird's eye view to

readers and help them to keep abreast with the latest development despite constraints of time. It is hoped that the book will contribute to the growth of readers, which should translate into drug discovery and clinical research industry's growth.

Nursing and Midwifery Research Dean Whitehead,Geri LoBiondo-Wood,Judith Haber,2012-10-31 The new edition upholds the premise that knowledge about research process and design is mandatory in today's health care arena, and that all nurses and midwives need to understand research findings and their implication for changing practice. It is completely revised with many new chapters. The text has been restructured into three sections. Section 1 Research Awareness sets the scene for the importance of nursing and midwifery research and provides an overview of research theory and practice as processes. Chapters on searching for and reviewing the literature provide detailed advice for undergraduates and facilitate access to research articles online. One of the new chapters discusses ethical issues in Australia and New Zealand. Section 2 Appreciation and Application provides a detailed discussion of qualitative, quantitative and mixed methods research approaches with many useful examples from the clinical area. Section 3 Conducting primary research is new and is designed to accommodate both undergraduate and postgraduate students in their research effort. Writing research proposals may be a requirement for undergraduates in their research program and postgraduates will find the information useful for undertaking a higher degree or applying for university or external funding. This final Section is also useful as a guide on disseminating and publishing

conducted research findings. Combined Australian and New Zealand editorship ensures greater trans-Tasman coverage, awareness and relevance. Contributions from international luminaries are balanced by a heightened focus on research conducted within Australia and New Zealand. New edition conscientiously recognises midwifery research as related to but independent from nursing. The research process-driven approach is directed towards 'consumers' of research, and the comprehensive coverage extends from undergraduate through to a postgraduate level of knowledge. Expanded pedagogy includes Key Terms and Learning Outcomes at the beginning of each chapter; Icons throughout that direct readers to web-based material; Evidence-based Tips, Research in Brief boxes and Points to Ponder for constant reinforcement that links evidence to practice. Integrated Tutorial Triggers with suggested answers provided and Multiple Choice Questions enable students to assess their understanding of key points. Evolve Website provides True/False questions and access to journal articles cited in the text, with additional reflective questions. Australian adaptation of Nursing Research: Lobiondo-Wood & Haber

Computerized Monitoring and Online Privacy Thomas A. Peters,1999-01-01 Increasingly, computers are a part of even the most ordinary and simple aspects of human existence. Computers have changed forever how we work, learn, shop and seek information. They have also, since the 1960s, been programmed to monitor and analyze in various ways the interaction between humans and themselves. The rapid development of the World Wide Web in the 1990s has given new life, direction and urgency to this enterprise. This work describes the myriad ways, benign or malign, in which computers are used to monitor people's use of computers. Four distinct contexts for monitoring are examined: formal learning environments (e.g., educational software); information seeking environments (e.g., online library catalogs); the workplace; and the Internet (e.g., online shopping). Computerized monitoring often is called an invasion of privacy, and the conceptual and ethical dimensions of confidentiality and privacy in virtual environments are explored at length. In addition to providing information about the various computerized monitoring tools and techniques, this work focuses on the broader social, conceptual, ethical and legal implications.
