Aristotle

Sounds As They Are Richard Beaudoin, 2024 In *Sounds as They Are*, author Richard Beaudoin recognizes the often-overlooked sounds made by the bodies of performers and their recording equipment as music and analyzes these sounds using a bold new theory of inclusive track analysis (ITA). In doing so, he demonstrates new expressive, interpretive, and embodied possibilities and also uncovers insidious inequalities across music studies and the recording industry, including the silencing of certain sounds along lines of gender and race.

The Psychology of Sex Differences Eleanor E. Maccoby, Carol Nagy Jacklin, 1978 A Stanford University Press classic.

NICOMACHEAN ETHICS Aristotle, 2017-04-20 ♦ EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned. ♦

Juvenile Sexuality, Kabbalah, and Catholic Reformation in Italy Roni Weinstein, 2009-09-24 This detailed introduction to

How Canadians Communicate II David Taras, Maria Bakardjieva, Frits Pannekoek, 2007 The contributors to this first volume of *How Canadians communicate* focus on the question what does Canadian popular culture have to say about the construction and negotiation of Canadian national identity?

Crows and Jays Steve Madge, 2010-06-30 *Crows and Jays* is a combination of scientifically accurate information and an identification guide, planned to give anyone, whether a birdwatcher or biologist, a greater understanding of the lives of these beautiful, yet very complex, group of birds. 120 species of crows, jays and their allies exist in the world today. Many are exceedingly beautiful in colour, grace and form, whereas others are black and somewhat sinister in appearance. In no other group of perching birds has evolution produced such a degree of variation, from the tiny Hume's Ground-Jay of the steppe-highlands of Tibet to the huge Thick-billed Raven of the mountains of Ethiopia. Some have had a long association with people and appear in tales of mythology and superstition, while others have been regarded as agricultural pests. The great majority, however, remain largely unknown, their only contact with humanity being the destruction of their specialised habitats. As a consequence, more than 20 species are now regarded as internationally endangered, some of which are very poorly known. The 30 superb colour plates by Hilary Burn in this book depict them all; each plate is accompanied by an informative caption page summarising the criteria required to identify the species, alongside colour world distribution maps. Some of these birds, bearing such evocative names as the Banggai Crow, Mesopotamian Crow and Flores Crow, have never been illustrated before. The authoritative text by Steve

Madge treats each species in depth, summarising identification techniques and concisely reviewing all aspects of corvid behaviour, distribution, population and taxonomy. The author has had first-hand experience of most of the species during his travels throughout the world, travels in which he gradually became fascinated by this very special, but somewhat ignored, group of birds. This will surely be a standard work of reference for many years to come.

Heaven's Song: Sexual Love As It Was Meant to Be

Christopher West, 2014-06-26 Heaven's Song is a journey through the "hidden" talks of St. John Paul II's Theology of the Body. These undelivered addresses, recently discovered in the Vatican archives, contain St. John Paul II's unedited reflections on the love poetry of the Song of Songs and the Old Testament marriage of Tobias and Sarah. This exciting "new" material allows men and women in every state of life to discover the "great mystery" of their sexuality as God created it to be: as a revelation of his own life and love. If you are already familiar with St. John Paul II's Theology of the Body, you will delight in this new material. If not, this book serves as a superb introduction to St. John Paul II's revolutionary teaching and is certain to whet your appetite for more.

The Descent of Man, and Selection in Relation to Sex Charles Darwin,1871

Young People's Views on Sex Education Dr Lynda Measor, Lynda Measor, Katrina Miller, Coralie Tiffin, 2012-11-12
Based on observation of sex education programmes and in-depth interviews with young people, the authors aim to understand more about adolescent's attitudes to sexuality and their sexual behaviour in order to develop policies which will meet their needs more appropriately and effectively. Issues covered in this interesting and accessible book include the ways adolescent informal culture affects sex education programmes and practice; the impact of gender inequality on sex education and safer sex behaviours; legislation and policy frameworks which effect sex education policies; the way young people see legislation and evaluate sex education programmes; and the impact health professionals can have in school sex education. The authors contend that the insights into the values and views that young people bring to bear on the sex education they receive should have an important role to play in the development of policy and practice of those involved in sex education work.

The Descent of Man Charles Darwin, 1902

Researching Sexual Behavior John Bancroft, 1997-10-22 These 22 contributions from the April 1996 meeting hosted by the Kinsey Institute at Indiana U. present international perspectives on debates about methodological differences in surveys of sexual behavior, and in particular, the difficulties with generalizing methods across contrasting cultures. The authors discuss key

issues relating to both qualitative and quantitative methods, including adaptations of method for groups, the use of survey data to measure change in behavior over time, and participation bias.

Aesthetic Sexuality Romana Byrne, 2013-11-28 To understand why the concept of aesthetic sexuality is important, we must consider the influence of the first volume of Foucault's seminal *The History of Sexuality*. Arguing against Foucault's assertions that only *scientia sexualis* has operated in modern Western culture while *ars erotica* belongs to Eastern and ancient societies, Byrne suggests that modern Western culture has indeed witnessed a form of *ars erotica*, encompassed in what she calls 'aesthetic sexuality'. To argue for the existence of aesthetic sexuality, Byrne examines mainly works of literature to show how, within these texts, sexual practice and pleasure are constructed as having aesthetic value, a quality that marks these experiences as forms of art. In aesthetic sexuality, value and meaning are located within sexual practice and pleasure rather than in their underlying cause; sexuality's *raison d'être* is tied to its aesthetic value, at surface level rather than beneath it. Aesthetic sexuality, Byrne shows, is a product of choice, a deliberate strategy of self-creation as well as a mode of social communication.

Color, Sex, and Poetry Gloria T. Hull, Akasha Gloria Hull, 1987-06-22 Focusing on the lives and writings of Alice Dunbar-Nelson, Angelina Weld Grimke, and Georgia Douglas Johnson, the author examines the overall place of women in the Harlem Renaissance, and the intersection of gender and race in their poetry. Hull chose these women not only because of their unique individualities, but because they represent black women/writers struggling against unfavorable odds to create their personal and artistic selves. She demonstrates the linkages among the three writers and how each one in turn interacted with other leading black women fiction writers such as Nella Larsen and Jessie Fanset. She also examines the significance of these three women

poets as literary ancestors to Gwendolyn Brooks, Mari Evans, Nikki Giovanni, Audre Lourde, and Sonia Sanchez. ISBN 0-253-34974-5: \$29.95; ISBN 0-253-20430-5 (pbk.): \$10.95.

Sex, Politics and Society Jeffrey Weeks, 2017-07-31 A pioneering study which has become an established classic in its field, *Sex, Politics and Society* provides a lucid and comprehensive analysis of the transformations of British sexual life from 1800 to the present. These changes are firmly located in the wider context of British social, political and cultural life, from industrialization, urbanisation and the impact of Empire and colonisation, through

the experience of economic disruption, World Wars, the establishment of the welfare state, changing patterns of gender and the emergence of new sexual identities. This book also charts the rise of both progressive and conservative social movements, including feminism, LGBT activism, and fundamentalist movements. It is a history where the past continues to live in the present, and where the present provides ever more complex, and often controversial patterns of sexual life, with sexual and gender issues at the heart of contemporary politics. Now fully revised and updated, this edition examines key new developments including: the impact of globalisation, and the digital revolution; gender nonconformity and the rise of transgender consciousness; shifting family and relational patterns, and new forms of intimacy; changes in reproductive technology including the debates on IVF and surrogacy; new discourses of equality and sexual rights for LGBT people; the irresistible rise of same-sex marriage; the weakening of the heterosexual/ homosexual binary divide and the development of new lines of concern and divisions in the politics of sexuality. Combining rich empirical detail with innovative theoretical insights, *Sex, Politics and Society* remains at the cutting edge of the subject, and this fourth edition will inspire and provoke a whole new generation of readers in history, sociology, social policy and critical sexuality studies.
