**Friction** Anna Lowenhaupt Tsing, 2011-10-23 A wheel turns because of its encounter with the surface of the road; spinning in the air it goes nowhere. Rubbing two sticks together produces heat and light; one stick alone is just a stick. In both cases, it is friction that produces movement, action, effect. Challenging the widespread view that globalization invariably signifies a clash of cultures, anthropologist Anna Tsing here develops friction in its place as a metaphor for the diverse and conflicting social interactions that make up our contemporary world. She focuses on one particular zone of awkward engagement--the rainforests of Indonesia--where in the 1980s and the 1990s capitalist interests increasingly reshaped the landscape not so much through corporate design as through awkward chains of legal and illegal entrepreneurs that wrested the land from previous claimants, creating resources for distant markets. In response, environmental movements arose to defend the rainforests and the communities of people who live in them. Not confined to a village, a province, or a nation, the social drama of the Indonesian rainforest includes local and national environmentalists, international science, North American investors, advocates for Brazilian rubber tappers, UN funding agencies, mountaineers, village elders, and urban students, among others--all combining in unpredictable, messy misunderstandings, but misunderstandings that sometimes work out. Providing a portfolio of methods to study global interconnections, Tsing shows how curious and

creative cultural differences are in the grip of worldly encounter, and how much is overlooked in contemporary theories of the global.

**Sapp Attack** Warren Sapp, David Fisher, 2012-08-21 In his no-holds-barred memoir, *Sapp Attack!*, Warren Sapp, one of the

NFL's most hilarious and candid personalities, reveals a side of football most fans have never before seen. Big Man. Big Talent. Big Star. Big Mouth. Big Heart. Big Personality. Big Smile. Big Headlines. Warren Sapp, one of pro football's most dominating defensive players both on and off the field, has a reputation for being bold, brash, knowledgeable, and outspoken. During his All-American career at the University of Miami, 13 seasons as an NFL star, four years on the NFL Network and one very big season on *Dancing with the Stars*, Sapp has never held back. Now he brings that same fearless attitude to his memoir, a book that will create controversy and headlines; in other words, pure Warren Sapp. Sapp has won every award possible for a defensive player, but it wasn't just his extraordinarily athletic ability that made him a star; it was also his ability to understand the subtleties of the game. He writes about working his way up from the high school gridiron to one of the top college football programs in the country, to the NFL, and reveals how the system actually works—the behind-the-scenes plays that fans rarely get to see. He'll discuss what it was like to face some of the greatest players in NFL history, including Hall of Famers Steve Young and Jerry Rice, both of whom he put out of the game, and Bret Favre, whom he sacked eleven times during his career. In this revealing, hilarious, and must-read book, Sapp offers readers a look inside the life of one of football's biggest stars and shares his often controversial opinions about the state of pro football today and its future.

**Invisible No More** Robert Greene II, Tyler D.

Parry, 2021-12-30 Since its founding in 1801, African Americans have played an integral, if too often overlooked, role in the history of the University of South Carolina. *Invisible No More* seeks to recover that historical legacy and reveal the many ways that African Americans have shaped the development of the university. The essays in this volume span the full sweep of the university's history, from the era of slavery to Reconstruction, Civil Rights to Black Power and Black Lives Matter. This collection represents the most comprehensive examination of the long history and complex relationship between African Americans and the university. Like the broader history of South Carolina, the history of African Americans at the University of South Carolina is about more than their mere existence at the institution. It is about how they molded the university into something greater than the sum of its parts. Throughout the university's history, Black students, faculty, and staff have pressured for greater equity and inclusion. At various times they did so with the support of white allies, other times in the face of massive resistance; oftentimes, there were

both. Between 1868 and 1877, the brief but extraordinary period of Reconstruction, the University of South Carolina became the only state-supported university in the former Confederacy to open its doors to students of all races. This first desegregation, which offered a glimpse of what was possible, was dismantled and followed by nearly a century during which African American students were once again excluded from the campus. In 1963, the second desegregation ended that long era of exclusion but was just the beginning of a new period of activism, one that continues today. Though African Americans have become increasingly visible on campus, the goal of equity and inclusion—a greater acceptance of African American students and a true appreciation of their experiences and contributions—remains incomplete. *Invisible No More* represents another contribution to this long struggle. A foreword is provided by Valinda W. Littlefield, associate professor of history and African American studies at the University of South Carolina. Henrie Monteith Treadwell, research professor of community health and preventative medicine at Morehouse School of Medicine and one of the three African American students who desegregated the university in 1963, provides an afterword.

**Religion of White Rage** Stephen C. Finley, 2020-09-21

Critically analyses the historical, cultural and political dimensions of white religious rage in America, past and present This book sheds light on the phenomenon of white rage, and maps out the uneasy relationship between white anxiety, religious fervour, American identity and perceived black racial progress. Contributors to the volume examine the sociological construct of the e;white labourere;, whose concerns and beliefs can be understood as religious in foundation, and uncover that white religious fervor correlates to notions of perceived white loss and perceived black progress. In discussions ranging from the Constitution to the Charlottesville riots to the evangelical community's uncritical support for Trump, the authors of this

collection argue that it is not economics but religion and race that stand as the primary motivating factors for the rise of white rage and white supremacist sentiment in the United States.
