Complex Adpositions in European Languages Benjamin Fagard, José Pinto de Lima, Dejan Stosic, Elena Smirnova, 2020-10-26 While much attention has been devoted to simple nominal relators, especially prepositions and case markers, complex nominal relators have not yet been the focus of a systematic and cross-linguistic study. The chapters of this volume provide not only a working definition of such constructions, but also a description of complex adpositions and other complex nominal relators in a variety of European languages, both Indo-European and non-Indo-European, including some languages for which this phenomenon had received little attention, such as Breton and Albanian. Building on synchronic and diachronic corpus-based investigations, the authors show commonalities and specificities of these linguistic items across languages, trying to explain why and how they emerged. The research

presented in this volume confirms the wide-spread use of complex adpositions in Europe, and the data reviewed in the final discussion suggests it might be the same in other parts of the world, as well. This book thus offers not only detailed descriptions of complex nominal relators in fifteen languages, but also indications of what to look for in other languages, and how to distinguish between a syntactically free sequence and a genuine complex nominal relator.

Proceedings of the 6th International Conference on Hydroinformatics Shie-Yui Liong, Kok-Kwang Phoon, Vladan Babovic, 2004-01-01 Hydroinformatics addresses cross-disciplinary issues ranging from technological and sociological to more general environmental concerns, including an ethical perspective. It covers the application of information technology in the widest sense to problems of the aquatic environment. This two-volume publication contains about 250 high quality papers contributed by authors from over 50 countries. The proceedings present many exciting new findings in the emerging subjects, as well as their applications, such as: data mining, data assimilation, artificial neural networks, fuzzy logic, genetic algorithms and genetic programming, chaos theory and support vector machines, geographic information systems and virtual imaging, decision support and management systems, Internet-based technologies. This book provides an excellent reference to researchers, graduate students, practitioners, and all those interested in the field of hydroinformatics.

Forecast Verification: A Practitioner's Guide in Atmospheric Science, 2nd Edition provides an indispensable guide to this area of active research by combining depth of information with a range of topics to appeal both to professional practitioners and researchers and postgraduates. The editors have succeeded in presenting chapters by a variety of the leading experts in the field while still retaining a cohesive and highly accessible style. The book balances explanations of concepts with clear and useful discussion of the main application areas. Reviews of first edition: This book will provide a good reference, and I recommend it especially for developers and evaluators of statistical forecast systems. (Bulletin of the American Meteorological Society; April 2004) ...a good mixture of theory and practical applications...well organized and clearly written... (Royal Statistical Society, Vol.168, No.1, January 2005) NEW to the second edition: Completely updated chapter on the Verification of Spatial Forecasts taking account of the wealth of new research in the area New separate chapters on Probability Forecasts and Ensemble Forecasts Includes new chapter on Forecasts of Extreme Events and Warnings Includes new chapter on Seasonal and Climate Forecasts Includes new Appendix on Verification Software Cover image credit: The triangle of barplots shows a novel use of colour for visualizing probability

forecasts of ternary categories – see Fig 6b of Jupp et al. 2011, On the visualisation, verification and recalibration of ternary probabilistic forecasts, Phil. Trans. Roy. Soc. (in press).

Lions and Tigers: The Story of Football in Singapore and Malaysia John

Duerden,2017-09-15 Through attending games and talking to players, coaches, media and fans from the past and the present, seasoned football correspondent John Duerden charts the history of the rivalry in the past, captures a snapshot of the rivalry as it is and casts a look at the future. It won't be just about the big games but about players from one country that played in another and the recent sojourn of Lions XII in Malaysia and Harimau Muda in the S-League. From meetings between the two national teams and clubs to tales from the times when they both sent teams to compete in the other's league, Lions and Tigers describes how Singapore and Malaysia feel about each other and how it all looks to an outsider between the two countries with comments from both nations—from coaches, players and key stakeholders, and also journalists and fans of the beautiful game.
