Mastering Cloud Computing Rajkumar Buyya,Christian Vecchiola,S.Thamarai Selvi,2013-04-05 Mastering Cloud Computing is designed for undergraduate students learning to develop cloud computing applications. Tomorrow's applications won't live on a single computer but will be deployed from and reside on a virtual server, accessible anywhere, any time. Tomorrow's application developers need to understand the requirements of building apps for these virtual systems, including concurrent programming, high-performance computing, and data-intensive systems. The book introduces the principles of distributed and parallel computing underlying cloud architectures and specifically focuses on virtualization, thread programming, task programming, and map-reduce programming. There are examples demonstrating all of these and more, with exercises and labs throughout. Explains how to make design choices and tradeoffs to consider when building applications to run in a virtual cloud environment Real-world case studies include scientific, business, and energy-efficiency considerations

From Stimulus to Consolidation Juan Toro R.,Benedict J. Clements,Victoria J. Perry,2010-10-06 This paper identifies policy tools that could be used for fiscal consolidation in advanced and emerging economies in the years ahead. The consolidation strategy, particularly in advanced countries, should aim to stabilize age-related spending in relation to GDP, reduce non-age-related expenditure ratios, and increase revenues. Bold reforms are needed to offset projected increases in age-related spending, particularly health care. On the revenue side, measures could include improving tax compliance, for example through better international cooperation, as well as increasing the yield from VAT by eliminating exemptions and reduced rates, further developing property taxes, and increasing excise rates within the range of rates already applicable in comparable countries.

Concurrent and Real-time Systems Steve Schneider,1999-11-15 The CSP approach has been widely used in the specification, analysis and verification of concurrent and real-time systems, and for understanding the particular issues that can arise when concurrency is present. It provides a language which enables specifications and designs to be clearly expressed and understood, together with a supporting theory which allows them to be analyzed and shown to be correct. This book supports advanced level courses on concurrency covering timed and untimed CSP. The first half introduces the language of CSP, the primary semantic models (traces, failures, divergences and infinite traces), and their use in the modelling, analysis and verification of concurrent systems. The second half of the book introduces time into the language, brings in the timed semantic model (timed failures) and finally presents the theory of timewise refinement which links the two halves together. Accompanying website:

New Policies for Mandatory Defined Contribution Pensions Gregorio Impavido,Esperanza Lasagabaster,Manuel Garc a-Huitr n,2010-06-04 Mandatory defined contribution pension markets are present in a growing number of countries around the world. But despite their popularity, policymakers continue to struggle with two key policy concerns. On the one hand, a number of design shortcomings encourages pension firms to charge high administrative fees. On the other hand, the global crisis that started in 2007 has reignited the debate on whether pension participants bear excessive investment risk. Both are valid policy concerns as their incidence can imply higher than expected levels of poverty among old age individuals. Both concerns have the same root problem---the limited capacity of individuals to choose what is best for them. This, in turn, stems from a combination of inadequate financial education, bounded rationality and the use of simplistic 'rules of thumb' that produce systematic biases in the decision making process of individuals. While improving financial education is an obvious avenue to pursue, this book is more concerned with design features that can exploit these systematic biases to protect consumers from themselves. 'New Policies for Mandatory Defined Contribution Pensions: Industrial Organization Models and Investment Products' (i) discusses the main implications for the functioning of mandatory defined contribution pensions of consumers inability to make rational choices; (ii) describes how jurisdictions have tried to address these problems through ad hoc policy interventions; and (iii) proposes new policy directions in the areas of industrial organization models and investment products to address these concerns more effectively. Written for practitioners and researchers around the world, this book provides access to new thinking on mandatory defined contribution pension systems and it makes an important contribution to the on-going policy debate on how to best structure mandatory defined contribution pillars.

Richistan Robert Frank,2008-06-24 THE NEW YORK TIMES BESTSELLER RICH-I-STAN n. 1. a new country located in the heart of America, populated entirely by millionaires, most of whom acquired their wealth during the new Gilded Age

of the past twenty years. 2. a country with a population larger than Belgium and Denmark; typical citizens include “spud king” J. R. Simplot; hair stylist Sydell Miller, the new star of Palm Beach; and assorted oddball entrepreneurs. 3. A country that with a little luck and pluck, you, too, could be a citizen of. The rich have always been different from you and me, but Robert Frank’s revealing and funny journey through “Richistan” entertainingly shows that they are truly another breed.

Jobs for Shared Prosperity Roberta Gatti, Matteo Morgandi, Rebekka Grun, Stefanie Brodmann, Juan Manuel Moreno, Daniela Marotta, Marc Schiffbauer, Elizabeth Mata Lorenzo, 2013-04-25 In the aftermath of the Arab Spring, when thousands of young women and men fought for the opportunity to realize their aspirations and potential, the question of jobs continues to be crucial in the Middle East and North Africa region. This report uses jobs as a lens to weave together the complex dynamics of employment creation, skills supply, and the institutional environment of labor markets. Consistent with the framework of the 2013 World Development Report on jobs, of which this report is the regional companion, this work goes beyond the traditional links between jobs, productivity, and living standards to include an understanding of how jobs matter for individual dignity and expectations—an aspect that was clearly central to the Arab Spring. Just as important, this report complements the economic perspective with an analysis of political economy equilibrium, with a view to identifying mechanisms that would trigger a reform process. As such, the report has three objectives: First, it seeks to provide an in-depth characterization of the dynamics of labor markets in the Middle East and North Africa and to analyze the barriers to the creation of more and better jobs. It does so by taking a cross-sectoral approach and identifying the distortions and incentives that the many actors—firms, governments, workers, students, education, and training systems—currently face, and which ultimately determine the equilibrium in labor markets. Second, the report proposes a medium term roadmap of policy options that could promote the robust and inclusive growth needed to tackle the structural employment challenge for the region. Third, the report aims to inform and open up a platform for debate on jobs among a broad set of stakeholders, with the ultimate goal of contributing to reach a shared view of the employment challenges and the reform path ahead.

The Paying Guests Sarah Waters, 2014-09-16 The New York Times bestselling novel that has been called “a tour de force” (Wall Street Journal), “unputdownable” (The Washington Post), “a delicious hothouse of a novel” (USA Today), “effortless” (The Economist), “seductive” (Vanity Fair) and “pitch perfect” (Salon) “Superb, bewitching...Forget about Fifty Shades of Grey; this novel is one of the most sensual you will ever read, and all without sacrificing either good taste or a G rating” – NPR “One of the year’s most engrossing and suspenseful novels...a love affair, a shocking murder, and a flawless ending ... Will keep you sleepless for three nights straight and leave you grasping for another book that can sustain that high.” – Entertainment Weekly (A rating) “Volcanically sexy, sizzingly smart, plenty bloody and just plain irresistible. –USA Today (4 stars) It is 1922, and London is tense. Ex-servicemen are disillusioned; the out-of-work and the hungry are demanding change. And in South London, in a genteel Camberwell villa—a large, silent house now bereft of brothers, husband, and even servants—life is about to be transformed as impoverished widow Mrs. Wray and her spinster daughter, Frances, are obliged to take in lodgers. With the arrival of Lilian and Leonard Barber, a modern young couple of the “clerk class,” the routines of the house will be shaken up in unexpected ways. Little do the Wrays know just how profoundly their new tenants will alter the course of Frances’s life—or, as passions mount and frustration gathers, how far-reaching, and how devastating, the disturbances will be. Short-listed for the Man Booker Prize three times, Sarah Waters has earned a reputation as one of our greatest writers of historical fiction, and here she has delivered again. A love story, a tension-filled crime story, and a beautifully atmospheric portrait of a fascinating time and place, *The Paying Guests* is Sarah Waters’s finest achievement yet.
