R Pring

Fitter Faster Robert Davis, Brad Kolowich, 2017-05-11 A lifetime of fitness in just minutes a day. I don't have time . . . I'm too tired . . . I hate gyms . . . These are among the most common excuses for not exercising. But the truth is that getting in shape requires less time and effort than you might think. Examining everything from pre-workout stretches to post-workout protein shakes, this science-backed book slices through fitness fads and misconceptions to reveal how you can exercise quickly and effectively. For example, is it best to exercise in the morning? Does aerobic activity burn more fat than weight lifting? You'll also learn how to get and stay motivated, what equipment to buy (and what not to waste money on), which dietary supplements really help, and how to combat muscle soreness. Fitter Faster explains how to: Find the right balance between cardio, strength, and stretching * Slash workout times with high-intensity interval training * Prevent boredom * Enhance fat-burning The accompanying Fitter Faster Plan, developed with celebrity trainer Brad Kolowich, Jr., pulls everything together. Requiring as little as 15 minutes a day, these quick workouts maximize efficiency-allowing you to reap the greatest benefit in the shortest possible time...all without ever having to set foot in a gym. With photographs illustrating each exercise routine, this eye-opening book will forever change the way you work out- and help you get fitter faster.

Handbook of Research on Decision-Making Capabilities Improvement With Serious Games

Correia, Anacleto, Simões-Marques, Mário, 2023-07-10

How can a group be empowered to improve their ability to make decisions while also reinforcing the group's intended values, beliefs, and behaviors? Like positive reinforcement, which introduces a desirable or pleasant stimulus after a behavior has been completed and has been found to be effective for reinforcing such behavior, serious games introduce the behavior as a pleasant experience through engagement and entertainment. Where positive reinforcement relies heavily on the willpower of the subject to complete the behavior on their own, serious games introduce a motivational factor from the beginning of the behavior. Serious games are designed for purposes other than entertainment, such as training, learning, creating awareness, or behavior transformation through the introduction of content, topics, narratives, rules, and goals. They are immersive, engaging, and enjoyable, which enhances motivation and learning. The development of serious games is grounded in theoretical backgrounds, such as motivation, constructivism, flow experience, problem-based learning, and learning by doing. This method has been used in a variety of industries, including education, healthcare, military, policy analysis, and business functions such as marketing or financial purposes. They facilitate problem solving through challenges and rewards and use entertainment and engagement components. Serious games can address specific skills for many domains, foster

collaboration, provide risk-free environments, and be used as analytical tools for educational research. They reinforce intended values, beliefs, and behaviors of players while conveying knowledge, skills, and attitudes, providing an integrated and effective approach to the transformation of an individual, group, or organization. The Handbook of Research on Decision-Making Capabilities Improvement With Serious Games discusses the use of advanced technologies including extended and immersive reality, digital twins, augmented reality (AR), virtual reality (VR), mixed reality (MR), and IoT sensors to improve decision-making skills and learning through serious games. This book discusses user engagement, game adaptation, content adaptation, and sensor technology. It showcases how to increase decision-making skills in individuals and organizations and incorporates the latest developments in artificial intelligence and machine learning. Led by experts with over 20 years of experience and covering topics such as serious game design, intelligent content adaptation, and machine learning algorithms. This book is designed for professionals in education, instructional designers, curriculum developers, program developers, administrators, educational software developers, policymakers, researchers, training professionals, privacy practitioners, government officials, consultants, IT researchers, academicians, and students.

The Weiler Ladies Tailor--dressmaker, Designer, Cutter and Fitter Book Sigmond Georg Weiler,1915

Fitter, Further, Faster Rebecca Charlton,Robert Hicks,Hannah Reynolds,2014-05-28 Fitter, Further, Faster is a complete guide to how to prepare for road riding and sportive events aimed both at first timers and those more experienced. In the same way as mass-participation events in running have captured the public imagination, cycling events in which everyone can take part have burgeoned in popularity since they were first introduced in the UK in the late 1990s. There are now a raft of events now covering a range of distances, many selling out within days and offering the chance to be involved to thousands of entrants. Organised around a six-month timeline that shows readers how to prepare for an event, it looks at training plans - for speed, endurance, pacing, technique and attitude on climbs - leading up to the event itself and subsequent effective recovery. It covers diet, how to cope in all weathers, the rules and etiquette of road riding, the mind, the body, coping with injuries and breakdowns and on-the-bike nutrition. Showcasing some of the best sportives in the world, the book is filled with high-quality photographs and illustrations, along with case studies and

personal accounts from leading riders.

The Old-Time Cowhand Ramon Frederick

Adams,1989-01-01 The American cowboy emerges from these pages as a recognizable human being with little resemblance to the picturesque inventions of the horse opera. Ramon F. Adams, a highly respected authority on the old West, talks straight about what the cowhand really did and thought. His cow-punching, broncobusting, trail driving; his rodeo riding, poker playing, socializing; his horse, guns, rope, clothing, sleeping bag; his eating and drinking habits; his attitude toward God, women, bosses; his unwritten code of conduct—everything about this vanished breed is told with absorbing authenticity, in the rich and varied lingo of the range.
