When You Find Colors and Shapes Angela Y. Russ-Ayon, 2016-09-23 Turn the pages and you will see how fun colors and shapes can be. Find what you seek, and when you are through, you will discover what to do. Shake and spin, jump and bend, then run to share this with a friend. ***** STEM: Combines early math shape exploration with physical activity. Identify the shapes, move as instructed, then observe how the shapes have changed as a result. ***** This interactive concept book combines physical activity, simple science (cause and effect, force and motion, gravity), and early math by showing us a unique way to celebrate the wonder of colors, shapes, and our bodies in motion. Imagination is required! Children are naturally curious. They build a strong foundation of early math skills every day through natural discoveries and exposure to simple math in their environment: through interactions, relationships, activities, and play. Supported in this book: Identifying geometric shapes - STEM Concepts - Comparing and contrasting objects - Using spatial reasoning - Pattern recognition - Analyzing change - Identifying colors ---- Visit AbridgeClub.com for more details, questions or concerns. This book is not just about finding colors and shapes and using motor skills; there are hidden gems on each page that offer children an opportunity to discuss and explore STEM concepts further with simple experiments. Make children feel like experts by asking what questions such as...-- What shapes do you see? -- What else do you see on the page? -- What happened to the shapes after you jumped up? For older children, ask open-ended questions that encourage critical thinking. Why do you think the shapes moved the way they did? and What do you think will happen next? In every case, support children in predicting what might happen next, observing what happened, and then stating what they see in their observation. Does the result match their prediction? These initial steps lay the foundation for scientific inquiry. Visit www.AbridgeClub.com for Talking Points and suggestions for open-ended questions. From Inner cover: This book is set up to be used in the order of the chapters, but feel free to have fun with it however you prefer. First your little one learns how to visually match each letter of the alphabet to the sound you pronounce. Numbers come next accompanied by words spelled out as well as a quantitative cue. This way, the learner can associate numbers with letters and how many buttons correspond to the appropriate number. The third part is geometric shapes, a more complex concept. In this section there are realistic pictures of shapes along with the words spelled out to match. In the fourth chapter the child will get exposed to the concept of colors. Here, all the images that were seen in the previous chapters are organized by the color that they match to. This is where the fun comes in, your sweetie can practice a Find and Seek game where one image is identified as a specific color, then he or she can go back through the previous chapters to find it. We hope you will enjoy this fun learning experience, especially the Find and Seek game

My First and Best Toddler Coloring Book Messaoudene Kamel, 2020-08-18 coloring book for toddlers - enjoy coloring letters and animals This book is designed for young children, who love coloring and love animals in particular, where children will learn and recognize the alphabet and numbers while enjoying the coloring of letters, numbers and many animals, which will make children learn letters and numbers in a fun way. This will be done through the pages of this book, which are specifically designed for this purpose, and these points will be made more clear: We have designed numbers (from zero to ten) without colors with a group of animals, where the number of animals corresponds to the number drawn on one page. We designed the shapes of all the letters, without colors of course, and attached each letter to the name of an animal that begins with that letter, with a drawing of that animal on the same page. We also added a special part of the geometric shapes with their names, we designed these pages without colors, so we made the words of animal names and shapes without colors as well, allowing the child to take his freedom to choose the right colors, and at the same time the child will recognize the letters and numbers automatically, especially with the instructions of the parents according to this point of view. Book details: Dimensions: (8.5 X 11) inch. Number of pages: 68 pages. The general content of the book: This book contains drawings of letters, numbers, animals and some shapes, these drawings are color-free, designed specifically for young children coming to school for the first time.
