Strategic Modelling and Business Dynamics, + Website John D. W.

Morecroft,2015-07-27 Insightful modelling of dynamic systems for better business strategy The business environment is constantly changing and organisations need the ability to rehearse alternative futures. By mimicking the interlocking operations of firms and industries, modelling serves as a 'dry run' for testing ideas, anticipating consequences, avoiding strategic pitfalls and improving future performance. Strategic Modelling and Business Dynamics is an essential guide to credible models; helping you to understand modelling as a creative process for distilling and communicating those factors that drive

business success and sustainability. Written by an internationally regarded authority, the book covers all stages of model building, from conceptual to analytical. The book demonstrates a range of in-depth practical examples that vividly illustrate important or puzzling dynamics in firm operations, strategy, public policy, and everyday life. This updated new edition also offers a rich Learners' website with models, articles and videos, as well as a separate Instructors' website resource, with lecture slides and other course materials (see Related Websites/Extra section below). Together the book and websites deliver a powerful package of blended learning materials that: Introduce the system dynamics approach of modelling strategic problems in business and society Include industry examples and public sector applications with interactive simulators and contemporary visual modelling software Provide the latest state-of-the-art thinking, concepts and techniques for systems modelling The comprehensive Learners' website features models, microworlds, journal articles and videos. Easy-to-use simulators enable readers to experience dynamic complexity in business and society. Like would-be CEOs, readers can re-design operations and then re-simulate in the quest for well-coordinated strategy and better performance. The simulators include a baffling hotel shower, a start-up low-cost airline, an international radio broadcaster, a diversifying tyre maker, commercial fisheries and the global oil industry. Much more than an introduction, John Morecroft's *Strategic Modelling and Business Dynamics* uses interactive 'mini-simulators and microworlds' to create an engaging and effective learning environment in which readers, whatever their background, can develop their intuition about complex dynamic systems. John Sterman, Jay W. Forrester Professor of Management, MIT Sloan School of Management Illustrated by examples from everyday life, business and policy, John Morecroft expertly demonstrates how systems thinking aided by system dynamics can improve our understanding of the world around us. Stewart Robinson, Associate Dean Research, President of the Operational Research Society, Professor of Management Science, School of Business and Economics, Loughborough University

How do religious figures induce the establishment of sects? Alejandro Cuevas-Sosa, 2018-08-01 Remarkable story of a research project on the bioenergence - intuition knowledge - and a particular way of interaction with the bioenergemal ('spiritual') universe called bioenergemal communication. The author talks to a person (called Lucela) in relaxation as she describes extraordinary interactions with religious figures, including God the Father, Jesus, Mary and others - as well as the author himself. The author detects that threats and instructions become less and less veiled, and the religious figures are revealed as monopolistic and self-serving; while some of Lucela's bioimages and bioscenes are truly terrifying. The conclusions are swaying tradition's foundations and are ground-breaking steps in the fascinating field of bioenergemal communication.

God's Dawning Light; Spiritual Awakening in a Dusty Old Farmhouse Larry V. Murphy, 2010-07-03 This book describes a man's late life journey to Spiritual Awakening and Unwavering Forgiveness. In fact, forgiveness changed the book's unfolding during the writing of it. The author began the book's writing with the desire to review a memory troubled life in a way that some degree of peace could be found within it. Forgiveness absolutely began to take over the book very early; forgiveness became the way of seeing the life rather than an end result. The author learned that forgiveness is not only cleansing and healing in retrospective, it completely changes the way we look at things. For the author, a lifetime previously perceived largely in ugliness was transformed into beauty. Prior unsavory scenes took their true places within auras of ignorance; eyes of forgiveness exposed ignorance as the true culprit in all unhappiness. Thus, things previously seen in contempt and blame became innocent of all charges. The author found total, Unwavering Forgiveness and Universal Love, gateways to God Consciousness.

Psychodynamic Art Therapy Practice with People on the Autistic Spectrum Matt Dolphin, Angela Byers, Alison Goldsmith, Ruth Jones, 2013-08-15 Psychodynamic Art Therapy Practice with People on the Autistic Spectrum offers a valuable counterbalance to the phenomenological, cognitive and behavioural theories that currently prevail in the wider field of practice and research. The result of a decade of work by a group of highly

experienced art therapists, this book presents eight frank and compelling accounts of art therapy with either adults or children with autism, supported by a discussion of the relevant theory. The book begins with an overview of the theoretical context and the subsequent chapters give varied accounts of practitioners' experiences structured in a loose developmental arc, reflecting issues that may arise in different settings and at various stages of therapy. Each is followed by an afterword which describes the author's reflections in the light of their subsequent knowledge and experience. The conclusion brings together some of the common threads arising from their encounters and considers how these might be relevant to current and continuing art therapy practice in the field of autism. *Psychodynamic Art Therapy Practice with People on the Autistic Spectrum* is a thoughtful consideration of where art therapy meets autism and the particular challenges that arise in the encounter between the autistic client and the therapist. Presenting honest reflections arising from lived encounters and highlighting general principles and experiences, this book aims to orient other practitioners who work with people on the autistic spectrum, in particular art therapists and art therapy trainees.

Eight Novellas Ramón Gómez de la Serna, 2005 The eight novellas collected in this book display the humor, exuberant spirit, love of language, and insight of the Spanish writer Ramón Gómez de la Serna, a central figure in the European and Latin American avant-garde, and a key contributor of Anglo-American imagism to Spanish literature. Father of the prose and poetry of the «Generation of '27», Gómez de la Serna was admired by T.S. Eliot, Macedonio Fernández, Oliverio Girondo, Octavio Paz, Pablo Neruda, Alfonso Reyes, and was a source of inspiration for Borges, García Márquez, Cortázar, and Pizarnik. These novellas, with their humorous and witty exaggerations of everyday human foibles, their simple story lines and often-surprising endings, are presented here in the original Spanish with a clear English translation on facing pages. This book will be useful in intermediate and advanced Spanish classes and in translation courses.
