Wool Economy in the Ancient Near East Catherine Breniquet,Cécile Michel,2014-07-31

The history of the Ancient Near East covers a huge chronological frame, from the first pictographic texts of the late 4th millennium to the conquest of Alexander the Great in 333 BC. During these millennia, different societies developed in a changing landscape where sheep (and their wool) always played an important economic role. The 22 papers presented here explore the place of wool in the ancient economy of the region, where large-scale textile production began during the second half of the 3rd millennium. By placing emphasis on the development of multi-disciplinary methodologies, experimentation and use of archaeological evidence combined with ancient textual sources, the wide-ranging contributions explore a number of key themes. These include: the first uses of wool in textile manufacture and organization of weaving; trade and exchange; the role of wool in institutionalized economies; and the reconstruction of the processes that led to this first form of industry in Antiquity. The numerous archaeological and written sources provide an enormous amount of data on wool, textile crafts, and clothing and these inter-disciplinary studies are beginning to present a comprehensive picture of the economic and cultural

impact of woollen textiles and textile manufacturing on formative ancient societies.

Persian-English Dictionary F. Steingass,2018-10-24 First published in 2004. This dictionary is a valuable resource for Persian to English translation and includes Arabic Words and Phrases to be found in Persian literature. The initial aim originally laid down for this Dictionary was to prepare a revised edition of Johnson's enlargement of Wilkins-Richardson's Persian, Arabic, and English Dictionary, by reducing the Arabic element and

increasing the Persian, so as to produce a volume of moderate dimensions and price, specially adapted to the wants of the English Student.
