**Revealing the Invisible** Thomas Koulopoulos,George Achillias,2018-06-05 The world is at the precipice of a disruptive new era in which the ability to track every behavior will predict our individual and collective futures. Using artificial intelligence to analyze trillions of once-invisible data (behaviors) across vast digital ecosystems, companies and governments now have unimagined insight into our every behavior. Although making private behaviors "visible" may conjure a sense of 1984, the reality is that a new kind of value will emerge that has the power to radically alter the way we view some of the most basic tenets of business. Concepts such as brand loyalty will be turned on their heads as companies now have to find ways to prove their loyalty to each individual consumer. In addition, the emergence of hyper-personalization and outcome-driven products may begin to solve some of the most pressing and protracted problems of our time. And it's not just human beings whose behaviors are being captured and analyzed. AI-powered autonomous vehicles, smart devices, and intelligent machines will all exhibit behaviors. In this very near future every person and digital device will have its own cyberself—a digital twin that knows more about us than we know about ourselves. Farfetched? Only if you discount the enormous power of these new technologies, which will use the invisible patterns in all of our behaviors to develop an intimate understanding of what drives us, where we see value, and how we want to experience the world. Revealing the Invisible shows businesses how to predict consumer behavior based on customers' prior tendencies, allowing a company to make better decisions regarding growth, products, and implementation.

*Future Shop* Jim Snider,Terra Ziporyn,2008-03 Some day, consumer information sources like those envisaged by Snider and Ziporyn will materialize. The more this book is read, the sooner it will happen. ---F.M. Scherer, Professor of Business and Government, Harvard UniversitySnider and Ziporyn powerfully describe the glass highways of the future, which will not only benefit consumers but will also provide fantastic opportunities for schools, hospitals, businesses, and the average American as we enter the Information Age of the 21st century. ---Conrad Burns, Chair of U.S. Senate Communications SubcommitteeFuture Shop is a look into tomorrow's world of household/buying. It is full of surprises, disconcerting ideas, and useful information. I would think that forward-looking businesses would profit from it as much as forward-looking consumers. ---Robert Heilbroner, Professor of Economics, New School for Social ResearchFuture Shop describes a telecommunications age in which the foundations of our market economy will be radically different. The authors present a bold, innovative manifesto for change. It's amazing that work on a subject that means so much to consumers has not appeared before. ---Marvin Cetron, author of American Renaissance Future Shop is well-intentioned, well-reasoned and intentionally provocative--Snider and Ziporyn deliver on their promise to remake the very idea of consumerism. ---Jonathan Kirsch, Los Angeles Times Book Review The authors have documented and quantified what most of us know through personal experience; that our retail distribution system has become increasingly inefficient and is fostering confusion and abuse to the consumer. The enormous conservation of resources in our society that this book describes makes its contribution significant. ---R.K. Snelling, Executive Vice President of BellSouth Communications \* \* \* \* \* For hundreds of years the marketplace has been growing more complex and more confusing for consumers to navigate. **Shop Your Soul at Christmas** Leanna Burns,2009-12 Leanna Burns, author of many great SOULful books, \* is currently working on a new book titled Shop Your Soul at Christmas. This book has twelve chapters that correspond to the verses of the The Twelve Days Of Christmas. And yet, the soul self-help lesson in each chapter is

really something that should be heeded (no matter the occasion) throughout the year. The reason it is a Christmas book, per se, is because that is the holiday whereby our human characteristics overrode our being qualities and someone died as a result. The book honors that and draws attention to that time of year, rather than speaking of other kinds of holidays.

The Impulse Economy Gary Schwartz, 2011-11-01 We live in a world where our mobile devices have become extensions of ourselves. We depend on them for instant connections to entertainment, social media, news, and deals. The phone has become our ticket, loyalty card, and catchall wallet. Networks are faster, phones are smarter, and the mobile shopper is ready to spend money now. What can a business do to maximize the mobile buying power of the new impulse consumer? Gary Schwartz has written a groundbreaking book that outlines the history of the mobile industry and shows just how businesses can build up their mobile platforms to maximize online sales. He'll explain:

- How to minimize barriers between the shopper and a sale.
- How marketers can connect and, more important, reconnect with loyal shoppers.
- The technology available now—and what's coming soon—and how to pick a solution that will deliver results.

But like *Blink* or *Freakonomics*, this isn't just a book for businesses. It's also an eye-opening look into the ways our economy is changing every second of every day. Gary Schwartz analyzes a phenomenon that's modifying people's actions and challenges our assumptions about our behavior as consumers. Anyone interested in the ways our behavior as shoppers is changing—and what we can do to better harness this opportunity—will find this book to be essential reading.

The Aisles Have Eyes Joseph Turow, 2017-01-17 The author of *Media Today* offers “a trenchant, timely, and troubling account of [retailers'] data-mining, in-store tracking, and predictive analytics” (*The Philadelphia Inquirer*). By one expert's prediction, within twenty years half of Americans will have body implants that tell retailers how they feel about specific products as they browse their local stores. The notion may be outlandish, but it reflects executives' drive to understand shoppers in the aisles with the same obsessive detail that they track us online. In fact, a hidden surveillance revolution is already taking place inside brick-and-mortar stores, where Americans still do most of their buying. Drawing on his interviews with retail executives, analysis of trade publications, and experiences at insider industry meetings, advertising and digital studies expert Joseph Turow pulls back the curtain on these trends, showing how a new hyper-competitive generation of merchants—including Macy's, Target, and Walmart—is already using data mining, in-store tracking, and predictive analytics to change the way we buy, undermine our privacy, and define our reputations. Eye-opening and timely, Turow's book is essential reading to understand the future of shopping. “Turow shows shopping today to be an exercise in unwitting self-revelation—and not only online.”—*The Wall Street Journal* “Thoroughly researched and clearly presented with detailed evidence and fascinating peeks inside the retail industry. Much of this information is startling and even chilling, particularly when Turow shows how retail data-tracking can enable discrimination and societal stratification.”—*Publishers Weekly* “Revealing . . . Valuable reading for shoppers and retailers alike.”—*Kirkus Reviews*
