Ultimate Fear Kristine Mason,2014-08-05 When a deranged mother's grief drives her to replace her dead son over and over, obsession leads to murder... Chicago detective Jessica Donavan will never stop looking for her missing daughter. Her obsession has destroyed her marriage, but the search is the only thing that helps keep her sane and her mind off of everything she’s lost—her husband and her baby girl. When she uncovers a string of unsolved disappearances and reappearances of a number of baby boys, Jessica turns to her soon to be ex, Dante Russo, a former Navy SEAL turned investigator for the private agency, CORE, to help her fit together the pieces in this perplexing puzzle. But as Dante helps her, she realizes just how much she still craves his support—and his touch. Dante is still in love with his wife and would do anything to have her back in his life again. He’s been miserable since she left him to deal with the grief over their daughter’s abduction, never understanding how much he grieves

as well. When Jessica tells him about the case she's working, he jumps at the chance to take part in her investigation. He's hoping not only to save their marriage and ease his personal pain over the loss of their daughter, but to stop a serial kidnapper from taking another victim. As Jessica and Dante work side by side, pregnant women begin to turn up missing or dead, and they start to uncover the consequences of another woman's unfathomable grief. The childless mother doesn't just want a baby. She wants a newborn straight from the womb. And when forced to confront the dark and twisted perversion of a mother's obsession, can Jessica and Dante find their lives again...or merely more death?

The Ultimate Book of Saturday Science Neil A. Downie,2012-05-13 The best backyard experiments for hands-on science learning The Ultimate Book of Saturday Science is Neil Downie's biggest and most astounding compendium yet of science experiments you can do in your own kitchen or backyard using common household items. It may be the only book that encourages hands-on science learning through the use of high-velocity, air-driven carrots. Downie, the undisputed maestro of Saturday science, here reveals important principles in physics, engineering, and chemistry through such marvels as the Helevator—a contraption that's half helicopter, half elevator—and the Rocket Railroad, which pumps propellant up from its own

track. The Riddle of the Sands demonstrates why some granular materials form steep cones when poured while others collapse in an avalanche. The Sunbeam Exploder creates a combustible delivery system out of sunlight, while the Red Hot Memory experiment shows you how to store data as heat. Want to learn to tell time using a knife and some butter? There's a whole section devoted to exotic clocks and oscillators that teaches you how. The Ultimate Book of Saturday Science features more than seventy fun and astonishing experiments that range in difficulty from simple to more challenging. All of them are original, and all are guaranteed to work. Downie provides instructions for each one and explains the underlying science, and also presents experimental variations that readers will want to try.
