Tech Tactics - Money Saving Secrets William Keeley,2011-05-13 This book shows the reader how to save money by using free or very inexpensive devices, programs, and services in order to save money while enjoying modern technology. People pay too much money for things that can be had very cheaply or for free if one only knows where to find the goodies. This book is about how to take advantage of technology without having to pay huge sums of money to big business. The author concentrates on tips, tactics, devices, programs, and secrets that actually work. It is the hope that when a reader reads and uses just one thing learned in this book that the book will pay for itself. This books offers something for everyone from a relative beginner to the hardcore geek. This book discuss the advantages and pitfalls in using free and inexpensive inexpensive technology products. Most products discussed in this book come with no strings attached. The products that do have strings attached are pointed out, and exactly what strings are explained. There are many free products available that do the same thing as their expensive counterparts. Microsoft office can cost anywhere between one hundred and several hundred dollars. There is a free program that will do almost everything Microsoft Office will that is legally available on-line for absolutely no cost to the user. The best part is the fact that this program contains no ad-ware or spy-ware. Even though long distance telephone service is getting less expensive each year, it is still pricey compared to the free and less expensive options that are currently available for those in the know. Many people pay tens and in some cases, over one hundred dollars a month so that they can watch decent television programming. In addition to paying these high rates, they often have to put up with annoying advertisements disrupting their viewing pleasure. This book shows free and inexpensive alternatives with fewer advertisements or none at all. Other people, when their computer slows to a crawl, will take their computer to a repair shop and pay tens to hundreds of dollars getting it back up to speed. This book shows people how do it quickly and easily themselves using programs already installed on the computer or available on-line for free. Some people spend tens of dollars per computer per year to protect their computer against malicious software. This book tells how and where to go to do it for free. Many computer users spend hours of frustrating searches on the Internet looking for diagnostic and optimization tools to speed up their computers or to make the more reliable. In many cases, they will come across websites featuring products that claim to do what they want. However, once they go through the trouble of downloading, installing, and using the software, the software performs the job as advertised - at least up to a point. The software will tell them what is wrong, and will have a fix it or optimize button. When the user clicks the button, he or she will see a notice that the software must be registered before the action is performed. Registration usually involves the payment of money. This book will show the users which programs truly do it for free. Using this book will save the reader many hours of searching, downloading, and installing programs only to find a demand of payment. The author has done the research and legwork to find the free gems that will help the reader. This book will also show the user how to use a GPS device or application to avoid speed traps and automated ticketing cameras and where to download the required data. Saving the cost of just one ticket will cause this book to pay for itself many times over. These are just a few of many examples of money savers that can be found in this book.

Losing Mum and Pup Christopher Buckley,2010-05-04 “I had more or less resolved not to write a book about my parents. But I’m a writer, and when the universe hands you material like this, not writing about it amounts either to waste or a conscious act of evasion.” So begins award-winning satirist Christopher Buckley in the most personal and transcendent work of his life, the tragicomic true story of the year in which both of his parents died. In twelve months between 2007 and 2008, Buckley coped with the passing of his father, William F. Buckley, the father of the modern conservative movement, and his mother, Patricia Taylor Buckley, one of New York’s most glamorous and colorful socialites. He was their only child and their relationship was close and complicated. Writes Buckley: “They were not — with respect to every other set of loving, wonderful parents in the world — your typical mom and dad.” As Buckley tells the story of their final year together, he takes readers on a surprisingly entertaining tour through hospitals, funeral homes, and memorial services, capturing the heartbreaking and disorienting feeling of becoming a fifty-five-year-old orphan. Buckley maintains his sense of humor by recalling the words of Oscar Wilde: “To lose one parent may be regarded as a misfortune. To lose both looks like carelessness.” Christopher Buckley offers consolation, wit, and warmth to those coping with the death of a parent, while telling a unique personal story of life with legends.

Nineteenth-century Torpedoes and Their Inventors Edwyn Gray,2004 Although it forever changed the tactics of naval warfare, the torpedo is one of the world's most under-researched weapons and its inventors the most neglected. To correct this oversight, Edwyn Gray follows up on his popular study of Robert Whitehead's torpedoes by taking a look at seventy other torpedoes and the men who invented them. He traces the history of the torpedo, placing its evolution in the context of a defining century of weapons development when torpedoes progressed from harpoon projectiles to rocket-powered weapons of destruction. Written for layman and expert alike in the lively style Gray has come to be known for, the book reveals a wealth of fascinating details about individual torpedoes along with a panorama of naval opinions and insights into the trials and tribulations of the weapon pioneers of the nineteenth century. Gray solves a number of mysteries that have bedeviled naval historians for decades and corrects longstanding misconceptions, based on information uncovered during ten years of research. Gray examined more than one hundred U.S. and British patents taken out between 1836 and 1900 as well as reports from contemporary technical and professional journals and unpublished papers, and enlivens the text with accounts of torpedoes in action together with colorful anecdotes about the inventors. Such an important contribution to the history of this branch of naval ordnance helps make sense of a raggle-taggle collection of bizarre weapons that caused so much consternation among naval tacticians at the end of the nineteenth century.

Addictive Thinking Abraham J Twerski,2009-06-03 The unpredictability and anxiety associated with the coronavirus pandemic can cloud and confuse everybody's thinking. Excuses, self-deception and addictive logic can harm your recovery and relationships. Don't let it. Author Abraham Twerski reveals how self-deceptive thought can undermine self-esteem and threaten the sobriety of a recovering individuals and offers hope to those seeking a healthy and rewarding recovery. Abnormal thinking in addiction was originally recognized by members of Alcoholics Anonymous, who coined the term stinking thinking. Addictive thinking often appears rational superficially, hence addicts as well as their family members are easily seduced by the attendant--and erroneous--reasoning process it can foster. In Addictive Thinking, author Abraham Twerski reveals how self-deceptive thought can undermine self-esteem and threaten the sobriety of a recovering individual. This timely revision of the original classic includes updated information and research on depression and affective disorders, the relationship between addictive thinking and relapse, and the origins of addictive thought. Ultimately, Addictive Thinking offers hope to those seeking a healthy and rewarding life recovery.
