**The Dabare Snake Launcher** Joelle Presby,2022-11-01 A RACE TO BUILD THE FIRST SPACE ELEVATOR IN AFRICA New money, old tribes, and international megacorps race to build the first space elevator. With a little Dabare magic, it just might work! The Sadous, an oil-rich West African family, are handed a plum contract as repayment for a decades-old favor that could make the next generation even richer if the family doesn't tear itself apart first. Two engineer daughters of the Sadou family, Pascaline and Maurie, upon whom the burden of success rests, have troubles of their own. One wants nothing more than to leave and make her own name as an engineering prodigy, while the other is troubled by fever dreams and snakes. Ethan Schmidt-Li is an ambitious megacorp executive with eyes on a big promotion-only to get more than he bargained for when put in charge of the company's make-or-break project. These are some of the people that Tchami "Chummy" Fabrice has brought together to an ambitious end-constructing the world's first space elevator in Africa and ensuring the space industry that it catapults will enrich the continent and all involved. They have the carbon nanofiber, prime land around Kilimanjaro, and a captured rock in orbit for the tether. The hard part will be getting all these different people working together long enough to see it built. At the publisher's request, this title is sold without DRM (Digital Rights Management). Praise for The Dabare Snake Launcher "Joelle Presby's novel is a fascinating fictional look behind the scenes of the construction of the world's first space elevator in a near-future version of Africa that has enough grounded elements to be thoroughly believable . . . The story maintains a keen eye on the largely larger-than-life characters and respect for the business processes, customs, and beliefs of the people on the ground making things happen." -Wole Talabi, Locus Award-nominated author and editor of Africanfuturism: An Anthology You guys should all be on the lookout for Joelle Presby's solo Baen novel THE DABARE SNAKE LAUNCHER. It is... remarkable. Just truly, truly remarkable." -David Weber, NYT Bestselling author of the Honorverse series The Dabare Snake Launcher is a very believable depiction of when this species decides to do something amazing: backstabbing, plotting, and inflamed passions galore. Presby has created a future that I could easily imagine reading on the news in a few decades, and the novel is all the better for it. -Warped Factor "The Dabare Snake Launcher takes you on a journey of possibilities, an Africa foremost in groundbreaking technology and not focused on deprivation and poverty. Joelle's writing is nuanced . . . There's family drama . . . romance . . . and laugh-out-loud humour. Writing is vivid and the characters fascinating." -Hannah Onoguwe, author and poet Set in Cameroon, where the author lived for many years, and full of lovely detail about the local cultures, clashes between traditional and modern, and differing expectations. -Jane Lindskold, author of the Star Kingdom series and Over Where series.

**Necessity and Proportionality in International Peace and Security Law** Claus Kreß,Robert Lawless,2020-10-01 Necessity and proportionality hold a firm place in the international law governing the use of force by states, as well as in the law of armed conflict. However, the precise contours of these two requirements are uncertain and controversial. The aim of Necessity and Proportionality in International Peace and Security Law is to explore how necessity and proportionality manifest themselves in the modern world under the law governing the use of force and the law of armed conflict, and how they relate to each other. The book explores the ways in which necessity and proportionality are applied in practice and addresses pressing legal issues in the law on the use of force, including the controversial unwilling and unable test for the use of force in self-defense, drones and targeted killing, the application of this legal regime during civil war, and the need for further transparency in states' justification for the use of force in self-defense. The analysis of the role of military necessity within the law of armed conflict on the modern battlefield focuses on the history and nature of the principle of military necessity, the proper application of the principle of proportionality, how commanders should account for mental harm in calculating proportionality, and the role artificial intelligence and autonomous weapons systems may play in proportionality analysis. The book concludes with a discussion of the potential role of proportionality in the law governing post-conflict contexts.
