Questor S. Allan Schweitzer, 2013-01-28 The novel Questor takes place during the final decade of the 20th century. A research institute is one of the most powerful companies worldwide as it dominates and controls the lives of humanity by virtue of its monumental achievement. The Company Cybele has created and has populated the planet with cloned replicates of living humans, the reasons for which are varied. The main character, Howard Questor, is a clone who has a singular goal or mission; namely, his passion to undergo a mission, which is to search, to investigate and determine the cause and reason for his being, namely, a cloned replicate who has been for unknown reasons, abandoned and discarded by the forces within the Company which created him. Questor's purpose is to discover who and why he exists. He learns, along with several other characters who are involved in his quest, that the Company's achievements have become a contribution to human knowledge; however, cloning has also instilled within the Company as well as within its many admirers and recipients of Cybele's accomplishments, the growing desire, motive and establishment of a multinational, dominant and threatening global domination and dictatorship. In his personal quest, Howard develops kinship with many who trust him and his mission. Questor also discovers love and understanding from his relationship with a beautiful woman. Throughout the novel there is a pervasive theme which suggests the possibility that the Company's cloning achievements were ultimately dependent and made possible based on

clues and plans that were left on this planet by extra terrestrial aliens who once visited the earth and who have since been long gone. The visitations of alien life were never proven until evidence was revealed by mankind's abilities to recreate himself.

**Mars Needs Books!** Gary Lovisi,2011-10-21 In the not-so-distant future, men have come to Mars to escape the oppressive Earth government. Ryan is an agent for a super-secret government agency, the Department of Control (DOC), and has always been willing to do whatever his masters want of him. But on Mars, everything is different, and all that Ryan does is read books: hardboiled, noir crime paperbacks dating from the last century. In fact, such works are read and collected by everyone on Mars, even serving as a medium of exchange. Why? Is there some secret DOC plot involved? Or has Ryan conjured up a literary fantasy in his own guilt-twisted mind? Maybe he's still confined in a prison cell back on Earth, reading a science-fiction novel called Mars Needs Books! As Ryan probes deeper and deeper into the mystery, he comes to understand just one thing: he must uncover the truth!

Music Video Games Michael Austin,2016-07-28

Music Video Games takes a look (and listen) at the popular genre of music games – video games in which music is at the forefront of player interaction and gameplay. With chapters on a wide variety of music games, ranging from well-known console games such as Guitar Hero and Rock Band to new, emerging games for smartphones and tablets, scholars from diverse disciplines and backgrounds discuss the history, development, and cultural impact of music games. Each chapter investigates important themes surrounding the ways in which we play music and play with music in video games. Starting with the precursors to music games - including Simon, the hand-held electronic music game from the 1980s, Michael Austin's collection goes on to discuss issues in musicianship and performance, authenticity and “selling out,” and composing, creating, and learning music with video games. Including a glossary and detailed indices, Austin and his team shine a much needed light on the often overlooked subject of music video games.

*They Create Worlds* Alexander Smith, 2019-11-19  
They Create Worlds: The Story of the People and Companies That Shaped the Video Game Industry, Vol. 1 is the first in a three-volume set that provides an in-depth analysis of the creation and evolution of the video game industry. Beginning with the advent of computers in the mid-20th century, Alexander Smith's text comprehensively highlights and examines individuals, companies, and market forces that have shaped the development of the video game industry around the world. Volume one, places an emphasis on the emerging ideas, concepts, and games developed from the

commencement of the budding video game art form in the 1950s and 1960s through the first commercial activity in the 1970s and early 1980s. They Create Worlds aims to build a new foundation upon which future scholars and the video game industry itself can chart new paths. Key Features: The most in-depth examination of the video game industry ever written, They Create Worlds charts the technological breakthroughs, design decisions, and market forces in the United States, Europe, and East Asia that birthed a \$100 billion industry. The books derive their information from rare primary sources such as little-studied trade publications, personal papers collections, and oral history interviews with designers and executives, many of whom have never told their stories before. Spread over three volumes, They Create Worlds focuses on the creative designers, shrewd marketers, and innovative companies that have shaped video games from their earliest days as a novelty attraction to their current status as the most important entertainment medium of the 21st Century. The books examine the formation of the video game industry in a clear narrative style that will make them useful as teaching aids in classes on the history of game design and economics, but they are not being written specifically as instructional books and can be enjoyed by anyone with a passion for video game history.

Profitable Posts Social Media Marketing Plan to Build an Online Business to Profit Up to Six Figures ,2024-01-22 INTRODUCTION There comes a time when the elastic snaps. When you push

yourself to breaking point, and everything crashes down. My breaking point came on a gloomy Monday morning commute in 2015. Sitting in my car, waiting for the lights to change, I looked at two guys in their cars on either side of me. They looked as miserable as I felt. At that moment, I burst into tears. "What the fuck was I doing with my life?" I was unhappy in my personal life and hated my job. I couldn't see a way out. I was too invested in my career; too old to start again. Looking back, I didn't know jack shit about building a fitness business. Corporate marketing is one thing. Doing everything from scratch alone in a different industry is another. I didn't have a creative agency or a multimillion-pound budget. All I had was a Personal Trainer certificate and the ironparadisefitness.com domain name. Nevertheless, I started building my online empire. Or, as I now refer to it, pissing in the wind for two years. I would write lousy articles, post selfies, and wonder why clients weren't beating down my virtual door. Desperate to carve a way out of corporate life, I vowed not to quit. My business was my obsession. Going out, meeting friends, and taking a break were a rarity. I thought it was the only way to be successful. I became a hermit. A recluse. Like the creepy guy kids fear in horror movies. "That's Old Man Mitchell from No. 29. He never leaves the house." "Some say he only goes outside to dispose of the dead bodies." I wasn't that bad, but my social life went on ice. I studied nutrition and learned the intricacies of exercise mechanics. I read books and invested in courses on social media,

copywriting, and web design. Iron Paradise Fitness had consumed my entire life, and I loved it. It was the fire in my belly I'd been missing. The passion I needed. Although, it did make for awkward conversations on Tinder dates. "What do you like to do in your spare time?" The innocent question would come. "Well, I'm building my own business right now, so that's my main focus." "Ah, cool. But what do you like to do for fun?" "Work on my business." "Yeah, but what about when you're not doing that?" "I'm either working on my business, thinking about working on my business, or eating." "Oh!..."

Douglas, 2006-05-30 Ace freelance PR woman and amateur detective Temple Barr is 30-going-on-19 when she agrees to do homicide lieutenant Carmen Molina a big favor and go undercover as a contestant at Teen Idol, a TV reality show. The lieutenant is worried because someone is threatening the contestants--including her own 13 year old daughter--by leaving mutilated Barbie dolls all over Las Vegas. Reliving the years of melodrama and teen angst while acting as a nanny-cum-diversion is bad enough, but Temple is dismayed to discover her professional nemesis is in charge of PR for Teen Idol--and, even worse, her romance novelist aunt has flown in from New York to be a judge. Can redheaded Temple fool her nearest and least dearest with a black dye job to complement her new punk persona, Xoë Chloë Ozone? Temple is on her own among 28 unnatural blonds, who all say they'd kill to make the final cut and be named Teen Idol Queen... and one of them might actually do it. Usually Temple has an ace or two up her sleeve, but Max Kinsella, Temple's ex-magician boyfriend, is AWOL plotting to infiltrate a sinister cabal of terrorist magicians, and neighbor-slash-sometime love interest Matt Devine is in Chicago, tracking down his shocking family roots. Luckily, there's one one alpha male Temple can always lean on: Midnight Louie, her black alley-cat roommate. Louie is already on the case, ensuring that all the little dolls under his care

debut on national TV as more than lovely corpses. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
