*The Tao of Computing* Henry M. Walker,2005 The Tao of Computing provides readers with the knowledge, concepts, and skills necessary for computer fluency as defined in the National Research Council's report, Being Fluent with Information Technology.Motivated by a belief that students learn best when material connects with their experiences, backgrounds, and perspective, author Henry Walker has built The Tao of Computing around a unique question-and-answer format. Each chapter and section begins with a real-life computing question, the answer to which serves as the starting point for an in-depth discussion of a fluency-related concept. The questions have been carefully developed to be representative of those asked by general computer users and were, in many instances, posed by the author's students. Individually, they help students easily build an understanding of important IT concepts. As a whole, they address completely all of the topic areas that the NRC has defined as critical to developing IT fluency. The book's conversational format engages the reader and presents key material in a clear, easily understandable fashion for those with little or no background in computing, and helps them develop an IT vocabulary without overwhelming them with jargon and acronyms.
