Rikisha to Rapid Transit Peter J. Rimmer, 2013-09-24 Rikisha to Rapid Transit: Urban Public Transport Systems and Policy in Southeast Asia examines the historical development of urban public transport systems and policy in Southeast Asia. The focus is on the passenger transport sector of the urban economy and the dilemmas facing decision-makers with regard to the choice of technology and organization. The prime target of the monograph is the development studies field in which urban public transport has been a neglected topic. The book is organized into three parts. Part 1 assesses Western, Japanese, and overseas Chinese models and their relevance to decision-making in Southeast Asia. Part 2 examines the evolution of transport systems and policy in five capitals (Singapore, Bangkok, Jakarta, Manila, and Kuala Lumpur) and several provincial cities (Penang, Surabaya, Davao City, Chiang Mai, Baguio and Metro Cebu). Part 3 brings out the implications of this study for theory and practice. The argument is structured in this way in order to preserve the historical sequence which will become progressively clearer as the study unfolds, particularly as there is a very positive indication...that the transport situation in cities results as much from historical development as from the interaction of forces currently at play.

Planning Singapore Stephen Hamnett, Belinda Yuen, 2019-05-08 Two hundred years ago, Sir Stamford Raffles established the modern settlement of Singapore with the intent of seeing it become 'a great commercial emporium and fulcrum'. But by the time independence was achieved in 1965, the city faced daunting problems of housing shortage, slums and high unemployment. Since then, Singapore has become one of the richest countries on earth, providing, in Sir Peter Hall's words, 'perhaps the most extraordinary case of economic development in the history of the world'. The story of Singapore's remarkable achievements in the first half century after its independence is

now widely known. In *Planning Singapore: The Experimental City*, Stephen Hamnett and Belinda Yuen have brought together a set of chapters on Singapore's planning achievements, aspirations and challenges, which are united in their focus on what might happen next in the planning of the island-state. Chapters range over Singapore's planning system, innovation and future economy, housing, biodiversity, water and waste, climate change, transport, and the potential transferability of Singapore's planning knowledge. A key question is whether the planning approaches, which have served Singapore so well until now, will suffice to meet the emerging challenges of a changing global economy, demographic shifts, new technologies and the existential threat of climate change. Singapore as a global city is becoming more unequal and more diverse. This has the potential to weaken the social compact which has largely existed since independence and to undermine the social resilience undoubtedly needed to cope with the shocks and disruptions of the twenty-first century. The book concludes, however, that Singapore is better-placed than most to respond to the challenges which it will certainly face thanks to its outstanding systems of planning and implementation, a proven capacity to experiment and a highly developed ability to adapt quickly, purposefully and pragmatically to changing circumstances.

Sustainable Urban Development in Singapore Melissa Liow Li Sa, Sam Choon-Yin, 2023-09-28 This book offers theoretical and practical insights into land use, transport, and national policies in one of world's well-known urban concrete jungle, none other than

the Singapore city. The emphasis is situated on Singapore's attempt to promote walking and cycling. Greater appreciation of walkability thrives on Singapore's rich history, green city, people and the gastronomic kopitiam and hawker culture. The book offers a comprehensive coverage of walkability as a crucial component of urban design to reduce vehicular congestion with the associated carbon emissions, foster a healthy lifestyle and community participation and create jobs to help the economy. A high income per capita and an aging society, lessons drawn from Singapore's experience will be useful to other societies. Scholars in sustainable tourism field, urban planners, government bodies, tourist boards, entrepreneurs, national parks board, residents, and inbound travellers will benefit from reading the book.

Transportation, Land Use, and Environmental Planning

Elizabeth Deakin, 2019-10 Transportation, Land Use, and Environmental Planning examines the practices and policies linking transportation, land use and environmental planning needed to achieve a healthy environment, thriving economy, and more equitable and inclusive society. It assesses best practices for improving the performance of city and regional transportation systems, looking at such issues as public transit and non-motorized travel investments, mixed use and higher density urban development, radically transformed vehicles, and transportation systems. The book lays out the growing need for greater integration of transportation, land use, and environmental planning, looking closely at changing demographic needs, public health concerns, housing affordability, equity, and livability. In addition, strategies for achieving these desired outcomes are

presented, including urban design and land use planning, regional and corridor-level transit plans, bike and pedestrian improvements, demand management strategies, and emerging technologies and services. The final part of the book examines implementation challenges, considering lessons from the US and around the globe at both local and regional levels. Introduces never-before-published research Offers best practices for transit, cycling, urban design and housing provision Assesses emerging developments, such as smart cities, new vehicle technologies, automated highways and transportation sharing Examines the institutional and political dimensions of sustainability planning at the urban and regional levels Utilizes case studies from around the world that show alternative ways forward

Southeast Asia Thomas R. Leinbach, Richard Ulack, 2000 The Great Depression hit Americans hard, but none harder than African Americans and the working poor. This brief, engaging book covers the range of African Americans' experiences during the 1930s. Cheryl Lynn Greenberg explores employment issues, the New Deal's effect on African Americans, family and community changes, and how the coming of war affected the population. The book straddles the particular--with examinations of specific communities and experiences--and the general--with explorations of the broader effects of racism, discrimination, family, class, and political organizing.

Eating Chilli Crab in the Anthropocene Matthew

Schneider-Mayerson, 2022-08-13 In this era of climate crisis, in which our very futures are at stake, sustainability is a global imperative. Yet we tend to associate sustainability, nature, and the environment with distant places, science, and policy. The truth is that everything is environmental, from transportation to taxes, work to love, cities to cuisine. This book is the first to examine contemporary Singapore from an ecocultural lens, looking at the ways that Singaporean life and culture is deeply entangled with the nonhuman lives that flourish all around us. The authors represent a new generation of cultural critics and environmental thinkers, who will inherit the future we are creating today. From chilli crab to Tiger Beer, Changi Airport to Pulau Semakau, O-levels to orang minyak films, these essays offer fresh perspectives on familiar subjects, prompting us to recognise the incredible urgency of climate change and the need to transform our ways of thinking, acting, learning, living, and governing so as to maintain a stable planet and a decent future.

The Mirror, 1990

Singapore Kenneth Paul Tan, 2018-09-30

Contemporary Singapore is simultaneously a small postcolonial multicultural nation state and a cosmopolitan global city. To manage fundamental contradictions, the state takes the lead in authoring the national narrative. This is partly an internal process of nation building, but it is also achieved through more commercially motivated and outward facing efforts at nation and city branding.

Both sets of processes contribute to Singapore's capacity to influence foreign affairs, if only for national self-preservation. For a small state with resource limitations, this is mainly through the exercise of smart power, or the ability to strategically combine soft and hard power resources.

Valuing Convenience in Public Transport Oecd, 2015-01-21

The experience of transport systems users, in terms of comfort, reliability, safety and above all convenience, is critical in determining demand for transport services, at least when there is a choice of alternative ways to travel. Convenience is one of the strongest attractions of the private car for passenger transport. For users of public transport, convenience is also clearly important but not always clearly defined and not often measured in designing transport systems or monitoring their operating performance. In many situations, an increase in public transport convenience reduces the unit costs of travel (euros/dollars per hour or cents per minute) and so provides benefits equivalent to an increase in travel speed. This report focuses on convenience and its importance to the user experience. It reviews operational definitions of convenience, evidence for the willingness of users to pay for convenience and the use of indicators to assess and improve the convenience of public transport, with a view to making it more effective and more competitive.
