Advanced Korean Ross King, Jaehoon Yeon, Ph.D., Chungsook Kim, 2015-04-07 Advanced Korean offers a complete, systematic, and streamlined third-year course in Korean. It is ideal for university students and adult learners with plentiful reading texts and written exercises, all in Korean Hangul. Concise Korean grammar notes in English, extensive glossaries, and an answer key make this book suitable for those studying alone, as well as for classroom use. There are 20 comprehensive lessons, each with a reading text in which new language is introduced in context, followed by vocabulary, grammar points, and exercises. Lessons 5, 10, 15 and 20 are short reviews of the key structural patterns introduced. The focus is on written Korean, but the reading texts are not academic, they are breezy, chatty, and amusing, with illustrations. The textbook comes with a downloadable supplement entitled Sino-Korean Companion. It is for those learners wishing to commence the study of Chinese characters as they are used in the Korean language. The 20 lessons build on the content of the lessons in the main textbook to introduce 500 Chinese characters in their Sino-Korean readings. The emphasis is on giving students the tools they need to decipher unfamiliar Chinese characters on their own, and also on Sino-Korean vocabulary acquisition. Each lesson introduces approximately 25-30 new Chinese characters along with related vocabulary items, and builds on previous characters and vocabulary introduced, demonstrating the cumulative effect on one's vocabulary of paying systematic attention to Sino-Korean.

Topics in Korean Language and Linguistics Ho-min Sohn, 2013

The Korean Alphabet Young-Key Kim-Renaud, 1997 A collection of ten essays which cover topics such as: arguments for King Sejong's personal creation of the script; the Asian and domestic linguistic and socio-cultural background to its creation; the principles under which each symbol was created; and the structure of phonological units.

Korean Language for Beginners Andrea De Benedittis, 2017-06-07 This book is a complete guide for people who want to learn the Korean language, starting from the very beginning, and learn the alphabet and the correct sounds of vowels, consonants, and diphthongs. It was written for people who want an easy but systematic approach to the language. The writer is a non-native speaker who started learning the language from ZERO, just like you and spent years in Korea trying to reach a better level of proficiency in Korean. After a few weeks of study, you will study to recognize words, make sentences, and have simple (but miraculous) conversations with other Korean speakers!

Integrated Korean Young-mee Yu Cho, Ji-Young Jung, Jeeyoung Ahn Ha, 2020-08-31 Korean is the seventh most commonly spoken language in the U.S., and Korean heritage students—those with some proficiency in or a cultural connection to the language through family or community—outnumber others learning Korean at the college level. Many schools offer a separate heritage track for learning Korean, but until now there has been no textbook designed specifically for heritage or accelerated curriculum students. Integrated Korean: Accelerated 1 and 2 directly address the linguistic needs and abilities of heritage learners in a single academic year. Volume 1 presents lessons on thematically organized subjects, starting with familiar topics such as family, friends, daily routines, schoolwork, campus activities, dining out, and shopping. Volume 2 advances to more formal subjects beyond family and friends, such as travel, transportation, housing, holidays, lifestyles, careers, and Korean history and culture. Students approach the lessons with multi-level communicative classroom activities and reading materials with standards-based exercises and projects that not only address the particular language requirements of heritage learners, but also encourage them to participate more fully in their own family and community life. Each volume's textbook and workbook offer authentic conversations and texts in both informal and formal contexts, structured tasks, and a wealth of interesting and relevant cultural content. Writing and Literacy in Chinese, Korean and Japanese Insup Taylor, M. Martin Taylor, 2014-12-15 The book describes how the three East Asian writing systems—Chinese, Korean, and Japanese—originated, developed, and are used today. Uniquely, this book: (1) examines the three East Asian scripts (and English) together in relation to each other, and (2) discusses how these scripts are, and historically have been, used in literacy and how they are learned, written, read, and processed by the eyes, the brain, and the mind. In this second edition, the authors have included recent research findings on the uses of the scripts, added several new sections, and rewritten several other sections. They have also added a new Part IV to deal with issues that similarly involve all the four languages/scripts of their interest. The book is intended both for the general public and for interested scholars. Technical terms (listed in a glossary) are used only when absolutely necessary.

Korean Reader for Chinese Characters Choon-Hak Cho, Yeon-ja Sohn, Heisoon Yang, 2002-08-31 Korean Reader for Chinese Characters will help students of Korean master basic Chinese characters that are frequently encountered in everyday situations. More than five hundred characters are targeted in exercises that aid in the efficient study of the forms, meanings, and sounds of individual characters and their compounds. Although the primary goal of the Reader is recognition of basic Chinese characters, students are encouraged to learn to write them properly by inclusion of a section on stroke order. The Reader is also designed to reinforce skills in reading and writing in Korean while studying Chinese characters. Forty lessons are preceded by an introductory chapter on the principles of Chinese character formation and reading and writing characters and followed by appendices on stroke order, English translations of the main reading text of each lesson, and an index of characters. The lessons are organized into seven parts: new characters, reading text, glossary, notes, new words in characters, more words in characters, and exercises. After every fifth lesson, there is a section reviewing all the characters introduced in the preceding five lessons.
