Love from A to Z S. K. Ali, 2019-04-30 From William C. Morris Award Finalist S.K. Ali comes an unforgettable romance that is part *The Sun Is Also a Star* mixed with *Anna and the French Kiss*, following two Muslim teens who meet during a spring break trip. A marvel: something you find amazing. Even ordinary-amazing. Like potatoes—because they make French fries happen. Like the perfect fries Adam and his mom used to make together. An oddity: whatever gives you pause. Like the fact that there are hateful people in the world. Like Zayneb's teacher, who won't stop reminding the class how "bad" Muslims are. But Zayneb, the only Muslim in class, isn't bad. She's angry. When she gets suspended for confronting her teacher, and he begins investigating her activist friends, Zayneb heads to her aunt's house in Doha, Qatar, for an early start to spring break. Fueled by the guilt of getting her friends in trouble, she resolves to try out a newer, "nicer" version of herself in a place where no one knows her. Then her path crosses with Adam's. Since he got diagnosed with multiple sclerosis in November, Adam's stopped going to classes, intent, instead, on perfecting the making of things. Intent on keeping the memory of his mom alive for his little sister. Adam's also intent on keeping his diagnosis a secret from his grieving father. Alone, Adam and Zayneb are playing roles for others, keeping their real thoughts locked away in their journals. Until a marvel and an oddity occurs... Marvel: Adam and Zayneb meeting. Oddity: Adam and Zayneb meeting.

Continental Scientific Drilling Project of the Cretaceous Songliao Basin (SK-1) in China Chengshan Wang, 2018-11-28 Continental Scientific Drilling Project of the Cretaceous Songliao Basin (SK-1) in China is the first reference to provide the results of the first part of scientific drilling project at the Songliao Basin in the Daqing oil field, the largest known oil field in China. The project has two major objectives: one is to correlate the oceanic and continental records and determine the principal drivers of climate change in order to assist in future climate change predictions and its influence on the earth's environment. The second is to further test the theory of terrestrial genesis of hydrocarbons, and to explore the formation of intra-continental sedimentary basins, as many are major hydrocarbon provinces. In addition, this project provides the scientific basis for exploration of the Daqing Oilfields, which have a yearly production of forty million tons of oil. The world is entering a new exciting era to explore in which scientific drilling will provide a quantum leap in our understanding of its deep earth and history. Continental Scientific Drilling Project of the Cretaceous Songliao Basin (SK-1) in China will play an important role in promoting scientific drilling and earth system science research. Summarizes the geological background, seismic profile, and tectonic evolution of the Songliao Basin Provides detailed information on drilling technology of SK-1, which successfully obtained ~2500m core with a recovery rate of ~95% Includes detailed core information: stratigraphic charts, core photographs, and core photograph identification tables

Siberian Traps and Pt-Cu-Ni Deposits in the Noril'sk Area Nadezhda A. Krivolutsкая, 2015-12-09 This book addresses fundamental problems in the evolution of magmatic and ore-forming processes in the Noril'sk area of northern Central Siberia. Based on data on the geology and geochemistry of rocks, obtained by the author in the course of fieldworks and new analytical studies (applying XRF, ICP-MS, microprobe analysis, ion-probe analysis and studying melt and fluid inclusions in olivine, as well as stable and radiogenic isotopes in the rocks), it was proposed a new scheme for the evolution of magmatism, including two episodes: rift and trap per se. The ultramafic-mafic massifs are classified into three geochemical types, the most important of which (the ore-bearing Noril'sk type) was formed in post-Nadezhdinsky time as an independent pulse of magmatic activity. The primary melts for ore-bearing intrusions had tholeiitic composition with elevated MgO (8 wt%) and low volatile contents (data from melt inclusions in olivine and pyroxenes, in combination with numerical simulations using the COMAGMAT program package). The assimilation of host rocks by the parental melts was studied in the contact zones of the Maslovsky and Talnakh intrusions. It was shown that it had taken place only in narrow zones (about 1-2 m) and did not played sufficient role in ore formation. It was suggested that the source of the material was lower crustal rocks in long-lived rift zones, where sulfides accumulated in several stages. The book offers a valuable resource for specialists in the geology of ore deposits and petrology, as well as for advanced Geology

students.

Trap Magmatism and Ore Formation in the Siberian Noril'sk Region V.V. Ryabov,A.Ya. Shevko,M.P. Gora,2014-07-14 The basis of this investigation is the petrographic and geochemical understanding of principal igneous rock types of the Noril'sk region, in order to demonstrate that these data provide unique and self-evident solutions to the problems of petrogenesis and mineralization. The results of the investigations are presented in two volumes: the first includes mainly text and the second contains illustrations. In the first volume, the state of the main problems of the genesis of igneous rocks with reference to Traps and related ore deposits is discussed, as well as short petrological descriptions of igneous complexes in the region, the mineral and geochemical diversity of the rocks, and aspects of the differentiation of basaltic melts and mineralization are described. Taking into account the vast number of publications on the petrology of Traps of the Noril'sk region, primary attention in the monograph is given to earlier unknown phenomena, as well as other aspects that are of great importance for solving genetic problems. Some exotic geologic targets such as the Mikchandinsky differentiated cover, the magnetite lava flow of the Putorana Plateau, the magmatogenic breccia of Kharaelakh and others are described in detail. The second volume contains an atlas of Rock Indications of igneous rock-types; formally identified reference rocks from all igneous complexes of the region, as well as photographs of thin sections of typical rocks and analytical tables of rocks and minerals from the key sections of sedimentary units and intrusions. Each rock type has been geochemically and petrographically analysed thereby providing a formal identity, complete with a photograph of the thin section. Photomicrographs of the rocks in this book will be a useful aid in visualizing the diversity of rock types in the Traps; each photograph reflecting a unique combination of minerals.

Love by Night SK Williams,2021-02-02 Love by Night begins with anxious hesitation and nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.

Love from Mecca to Medina S. K. Ali,2022-10-18 On the trip of a lifetime, Adam and Zayneb must find their way back to each other in this surprising and romantic sequel to the “bighearted, wildly charming” (Becky Albertalli, New York Times bestselling author) Love from A to Z. Adam and Zayneb. Perfectly matched. Painfully apart. Adam is in Doha, Qatar, making a map of the Hijra, a historic migration from Mecca to Medina, and worried about where his next paycheck will come from. Zayneb is in Chicago, where school and extracurricular stresses are piling on top of a terrible frenemy

situation, making her miserable. Then a marvel occurs: Adam and Zayneb get the chance to spend Thanksgiving week on the Umrah, a pilgrimage to Mecca and Medina, in Saudi Arabia. Adam is thrilled; it's the reboot he needs and an opportunity to pray for a hijra in real life: to migrate to Zayneb in Chicago. Zayneb balks at the trip at first, having envisioned another kind of vacation, but then decides a spiritual reset is calling her name too. And they can't wait to see each other—surely, this is just what they both need. But the trip is nothing like what they expect, from the appearance of Adam's former love interest in their traveling group to the anxiety gripping Zayneb when she's supposed to be "spiritual." As one wedge after another drives them apart while they make their way through rites in the holy city, Adam and Zayneb start to wonder: was their meeting just an oddity after all? Or can their love transcend everything else like the greatest marvels of the world?
