The Care and Keeping of Sensitive Skin Lissa Bell,2012-03 At the age of sixteen, Lissa Bell found she had Vitiligo, which is hereditary in her family. At that time, not much was known about Vitiligo, and therefore, nothing could be done for it other than bleaching the pigmented skin in order to create a more uniform appearance. Over time, she researched and read the limited information she could find about the condition. Eventually, she found that she could not use products that contained synthetics without suffering an adverse reaction. While in her early thirties, the youngest of her two children developed eczema. She wanted, as a mother, to make it all better. So she began researching herbal skin care. She developed an herbal soap for her son. Amazed with the results, Bell began experimenting with herbal products for her own skin. In 2009, she started Lissa's Naturals, a line of skin care products for sensitive skin.

The No Compromise Black Skin Care Guide C. R. Cooper, 2021-06-15 Have you avoided treating black skin, or having your own skin treated due to a lack of skincare confidence for black skin? Would you like to overcome your apprehension to using skincare products? Are you wanting and ready to see real change in skin health equity? Like you, I've been misguided when it came to my skin. Prior to entering the industry, I shunned the use of any professional skincare simply due to the well-meaning, but harmful traditions passed on to me by my family. When I went to the drug stores or beauty counters, I was always let down by the inappropriate products that were recommended for my skin type and skin colour. It is stories such as my own and many others why I entered the industry to effectively bring truth and awareness for change. If you've struggled getting the right care or with caring for black skin, you're not alone. According to the Journal of Investigative Dermatology, only 4 percent of practicing dermatologists identify as Hispanic, and only 3 percent identify as Black or African descent. Alarming. This lack of understanding for darker skin proliferates beyond the skin health industry but also involves the medical field. According to Janice A. Sabin, PhD, 40% of first- and second-year medical students in the US still endorsed the belief that 'black people's skin is thicker than white people's', a relic belief from the early 19th century. This work is one small but significant step towards rectifying that malady. In this book you will discover: Surprising truths about black/darker skin. The #1 common misconception and myth surrounding darker skin, plus many more. The illustrious history of the Beauty industry and darker skin. What top tier skin pros from around the world today, had to say about treating black clients. How to level up your know-how on skincare ingredients and skincare routines. Effective treatments for darker skin. The Ten Commandments for black Skin. As a skin professional or as a novice, this book will further support your understanding of darker skin, even if you haven't had much success in the past.

Skincare Decoded Victoria Fu, Gloria Lu, 2021-03-23 Do you really need a ten-step skincare regimen? Is that \$100 eye cream worth it? And what the heck are “actives” anyway? In this book two professional chemists and beauty industry insiders tell all. Depending on who you listen to, the secret to beautiful skin is microbiomes. Or Korean rice water. Or maybe a dermaplaning tool. It feels like you need a degree in chemistry to even understand what these products are, and if they live up to the hype. Luckily, Victoria Fu and Gloria Lu, professional skincare chemists have done that work so you don't have to. The science may seem complicated, but this book will show you how simple it can be, giving you what you need to make informed decisions about your skin (and your wallet). Skincare Actives? Technically, cat sneezes could count. SPF? Yep, super important. Caffeine serums? The science is still out. CBD additives? Not enough studies yet, so the jury's still out. The authors are the creators behind the popular Chemist Confessions Instagram, and this book brings the sass, humor, and solid information they're known for. Additional chapters address the best ingredients for every skin type, and reveal the only four products you really need.
