Teaching English Language Learners Through Technology Tony Erben,Ruth Ban,Martha Castañeda,2008-09 In *Teaching English Language Learners through Technology*, the authors explore the use of computers/technology as a pedagogical tool to aid in the appropriate instruction of ELLs across all content areas. The special focus of this book is on the informed use of various technologies and software programs that can specifically aid ELLs. Strategies are also provided for varying levels of access--whether teachers teach in a one computer classroom, have access to multiple computers, or have the ability to go into a computer lab at their school. A fully annotated list of web and print resources completes the volume, making this a valuable reference to help teachers harness the power of computer-assisted technologies in meeting the challenges of including all learners in effective instruction.

Digital Libraries Sadia Vancauwenbergh, 2021-06-30 Over the past decades, traditional academic library environments have transformed into digital libraries. This has resulted in many challenges for libraries in terms of the reinvention of libraries' roles and organizations, the skill sets of librarians, and library infrastructure. At the same time, this profound transformation has opened the door to many new avenues, such as the support and advancement of Open Science. This book offers insights into the transformation of traditional library environments to digital libraries and details how digital libraries can contribute to Open Science, in particular to Open Access, FAIR and Open Data, and Open Education, by describing methods, criteria, strengths, and weaknesses as well as applications.
