City in the Sky James Glanz,Eric Lipton,2014-01-21 The definitive biography of the iconic skyscrapers and the ambitions that shaped them--from their dizzying rise to their unforgettable fall More than a year after the nation began mourning the lives lost in the attacks on the World Trade Center, it became clear that something else was being mourned: the towers themselves. They were the biggest and brashest icons that New York, and possibly America, has ever produced--magnificent giants that became intimately familiar around the globe. Their builders were possessed of a singular determination to create wonders of capitalism as well as engineering, refusing to admit defeat before natural forces, economics, or politics. No one knows the history of the towers better than New York Times reporters James Glanz and Eric Lipton. In a vivid, brilliantly researched narrative, the authors re-create David Rockefeller's ambition to rebuild lower Manhattan, the spirited opposition of local storeowners and powerful politicians, the bold structural innovations that later determined who lived and died, master builder Guy Tozzoli's last desperate view of the towers on September 11, and the charged and chaotic recovery that could have unraveled the secrets of the buildings' collapse but instead has left some enduring mysteries. City in the Sky is a riveting story of New York City itself, of architectural daring, human frailty, and a lost American icon.

Making Space Andrew MacLaran,2014-04-04 Making Space studies the built environment by examining the private-sector forces responsible for its development and the urban planning systems put in place to influence, guide and manipulate its outcomes. The first part provides a theoretical context for understanding the functions of the property development sector and the state's interventions through the medium of urban planning. It analyses the relationship between planning and development, and focuses on the increasingly widespread adoption of more pro-active entrepreneurial planning agendas as a

response to a growing disenchantment with traditional regulatory approaches. The second part comprises case studies (drawn from Australia, New Zealand, the USA, the United Kingdom and Ireland) which investigate the ways in which urban planning in different socio-political contexts has influenced the outcomes of the property development process as well as the manner in which such planning systems have changed in order to enhance their influence.

Sky-High Eric P. Nash,2023-06-27 Part architectural guidebook and part critique, Sky-High documents the pencil-thin, supertall towers that are transforming New York City's skyline as well as its streets. New York City's penchant for building skyward has reached new heights with its crop of supertall towers—those that rise at least 984 feet above the sidewalk. The city that never sleeps is also the city that never stops building ever higher, from the Woolworth and Chrysler buildings of an earlier race to the top to today's super luxury aeries of 57th Street's Billionaires' Row and the towers of the World Trade complex in Lower Manhattan. Bruce Katz's extraordinary photographs capture a dozen of these self-styled odes to wealth and power, alongside Eric P. Nash's incisive critique documenting the evolution of the skyline, past and present, and the supertalls' transformative effects on the contemporary cityscape. Among the twelve buildings featured are One World Trade Center, Three World Trade Center, 30 Hudson Yards, 35 Hudson Yards, One57, 432 Park Avenue, 53West53, Central Park Tower, and One Vanderbilt.

Heaven-taming Saint Lord Jiang NanFeng,2020-03-22 'You're very weak!' Ever since Li Qingniu could remember, the Grandma Long had always told him this. Regarding this, Li Qingniu had always deeply understood it as well. Because he was not as fast as the Grandpa Quezi, not even as far as the Blind

Instant Messaging with Immortals Can LanDiGua,2020-07-07 Li Yunfan had bought a second-hand computer with an ordinary 'Three Sans Sans Diaos'. It was actually a communication device used by deities! His life had undergone a tremendous change! If you have nothing to do, do it with a fairy! Take advantage of Chang'e when you're bored! Since he didn't have the money to buy immortal pills, he might as well sell a bag of spicy gluten! King of Hell, Jade Emperor heard Li Yunfan's name and started trembling, crying as he hugged Li Yunfan's leg. Brother Li, give me another packet of spicy gluten!

Sears Tower Jay Pridmore,2002 The Nation's Largest Retailer wanted the largest headquarters in the nation, and they got it -- in spades. Designed by Skidmore, Owings & Merrill (SOM), the 110-story, anodized aluminum-clad Sears Tower occupies three acres in the West Loop. The bundled-tube construction allowed for more windows and more corner offices per square foot. The total area within the Tower is 4.4 million square feet; the Sky Deck on the 103rd floor offers tremendous views and welcomes more than 1 million visitors yearly. When SOM realized that their design was only ten stories short of what was supposed to be the record-breaking height of the World Trade Center then under construction (1,368 feet), they broke the record, coming in at 1,454 feet. The move of Sears and Roebuck employees into the Tower was the biggest corporate move in American history. In the late 1980s Sears and Roebuck left the building, but it continues to thrive, a timeless monument to American ingenuity.

Higher Neal Bascomb,2004-09-21 The Roaring Twenties in New York was a time of exuberant ambition, free-flowing optimism, an explosion of artistic expression in the age of Prohibition. New York was the city that embodied the spirit and strength of a newly powerful America. In 1924, in the vibrant heart of Manhattan, a fierce rivalry was born. Two architects, William Van Alen and Craig Severance (former friends and successful partners, but now bitter adversaries), set out to imprint their individual marks on the greatest canvas in the world--the rapidly evolving skyline of New York City. Each man desired to build the city's tallest building, or 'skyscraper.' Each would stop at nothing to outdo his rival. Van Alen was a creative genius who envisioned a bold, contemporary building that would move beyond the tired architecture of the previous century. By a stroke of good fortune he found a larger-than-life patron in automobile magnate Walter Chrysler, and they set out to build the legendary Chrysler building. Severance, by comparison, was a brilliant businessman, and he tapped his circle of downtown, old-money investors to begin construction on the Manhattan Company Building at 40 Wall Street. From ground-breaking to bricklaying, Van Alen and Severance fought a cunning duel of wills. Each man was forced to revamp his architectural design in an attempt to push higher, to overcome his rival in mid-construction, as the structures rose, floor by floor, in record time. Yet just as the battle was underway, a third party entered the arena and announced plans to build an even larger building. This project would be overseen by one of Chrysler's principal rivals--a representative of the General Motors group--and the building ultimately became known as The Empire State Building. Infused with narrative thrills and perfectly rendered

historical and engineering detail, Higher brings to life a sensational episode in American history. Author Neal Bascomb interweaves characters such as Al Smith and Governor Franklin Delano Roosevelt, leading up to an astonishing climax that illustrates one of the most ingenious (and secret) architectural achievements of all time.

Twin Memoirs Robert W. Parsons, 2018-01-30 The continuing saga of the DeMarco brothers begins with book 3 as they both struggle through college. The inheritance the twins received from some mystery man would not only bring change in their lives but also in the life of their mother. This event will forever change their future, their journey and their story. Years of intense study at college prepare the boys for this new global adventure. New people enter their lives which results in great friendships and eventually business associates. Book 4 continues as the DeMarco brothers run the gauntlets of Wounded Knee in the early '70s, the building of the town of Eagleton, Colorado high in a valley of the Rocky Mountains in the late '70s and the sky tower, the DeMarco international headquarters in downtown Denver being built in the early '80s. Several deaths occur, natural deaths, because we all grow old. But as one dies, others are birthed and the story of the brothers continue. Within the same family, to be quite honest and somewhat crude, out with the old and in with the new.
