Gender Based Violence in University Communities Anitha, Sundari, Lewis, Ruth, 2018-06-27 Until recently, higher education in the UK has largely failed to recognise gender-based violence (GBV) on campus, but following the UK government task force set up in 2015, universities are becoming more aware of the issue. And recent cases in the media about the sexualised abuse of power in institutions such as universities, Parliament and Hollywood highlight the prevalence and damaging impact of GBV. In this book, academics and practitioners provide the first in-depth overview of research and practice in GBV in universities. They set out the international context of ideologies, politics and institutional structures that underlie responses to GBV in elsewhere in Europe, in the US, and in Australia, and consider the implications of implementing related policy and practice. Presenting examples of innovative British approaches to engagement with the issue, the book also considers UK, EU and UN legislation to give an international perspective, making it of direct use to discussions of 'what works' in preventing GBV.

Climate Change Litigation Jacqueline Peel, Hari M. Osofsky, 2015-04-09 This examination of the role of litigation in addressing the problem of climate change focuses not only on how the massive and growing number of lawsuits influences regulation directly, but also on how the lawsuits shape corporate behaviour and public opinion. It provides readers with an understanding of how these lawsuits have shaped approaches to mitigation and adaptation, and have been used to try to force and to block regulation. There is a particular emphasis on lawsuits in the United States and Australia, the two jurisdictions which have had the most climate change litigation in the world, and the lessons provide broader insights into the role of courts in addressing climate change.

Healing from Abuse Carla van Raay, 2016-05-27 Healing from Abuse: A Practical Spiritual Guide is a balm for the soul. The path of healing is awesome, yet the author, who has advanced along that very same journey herself, maintains that everyone who takes it up is somehow given the power and support to make a success out of it. This book is presented as a part of that support and that empowerment. In its pages the reader is introduced and gradually made familiar with the Spirit of their inner being, the reality so easily ignored and yet so powerful once engaged. The Spirit Within is not confined to any religion - it is within all of us, whether we know it or not, and nothing we can do or experience can get rid of it. To heal means taking back the power to love and to receive love, that

great purpose worth living for. It is this love that will restore self-worth and self-esteem from the ground up and from the inside out.

Peacekeeping and the African Union Jude Cocodia, 2017-09-27 This book offers a detailed examination of the effectiveness of the peacekeeping operations of the African Union. Despite its growing reputation in peacekeeping and its status as the oldest continental peacekeeper, the performance of the African Union (AU) has hitherto not been assessed. This book fills that gap and analyses six case studies: Burundi, Comoros, Somalia, Mali, Darfur and the Central African Republic. From a methodological perspective it takes a problem-solving approach and utilises process tracing in its analysis, with its standard for success resting on achieving negative peace (the cessation of violence and provision of security). Theoretically, this study offers a comprehensive list of factors drawn from peace literature and field experience which influence the outcome of peacekeeping. Beyond the major issues, such as funding, international collaboration and mandate, this work also examines the impact of largely ignored factors such as force integrity and territory size. The book modifies the claim of peace literature on what matters for success and advocates the indispensability of domestic elite cooperation, local initiative and international political will. It recognises the necessity of factors such as lead state and force integrity for certain peace operations. In bringing these factors together, this study expands the peacekeeping debate on what matters for stability in conflict areas. This book will be of much interest to students of peacekeeping, African politics, war and conflict studies, and International Relations in general.

Working on the front lines of ruin, today's coral scientists are struggling to save these important coral reef ecosystems from the imminent threats of rapidly warming, acidifying, and polluted oceans. *Coral Whisperers* captures a critical moment in the history of coral reef science. Gleaning insights from over one hundred interviews with leading scientists and conservation managers, Irus Braverman documents a community caught in an existential crisis and alternating between despair and hope. In this important new book, corals emerge not only as signs and measures of environmental catastrophe, but also as catalysts for action.
