Slide a Note Howard Richman,2012-04-17 Slide-a-Note musical slide rule helps you to learn to read piano sheet music with bass and treble clefs. Shows the 90° correlation between the musical staff and the piano keyboard. Moving to the right on the keyboard is higher on the staff and vice versa. The primary benefit of using the Slide-a-Note is as a way to test your knowledge of the notes. The names of the notes on the keyboard and the staff are purposely left off, to encourage the student to learn them. Made in USA. Heavy white card stock with clear, REMOVABLE plastic slider. Packed in Zip-Lok bag with hang tag for easy display.

Works Well with Others Ross McCammon, 2016-10-04 A hilarious and indispensable guide to the weirdness of the workplace from Esquire editor and Entrepreneur etiquette columnist Ross McCammon Ten years ago, Ross McCammon made an incredible and unexpected transition from working at an in-flight magazine in suburban Dallas to landing his dream job at Esquire in New York. What followed was a period of almost debilitating anxiety and awkwardness—interspersed with minor instances of professional glory—as McCammon learned how to navigate the workplace while feeling entirely ill-equipped for achieving success in his new career. Works Well with Others is McCammon’s “relentlessly funny and soberingly insightful”* journey from impostor to authority, a story that reveals the workplace for what it is: an often absurd landscape of ego and fear guided by social rules that no one ever talks about. By mining his own experiences at the magazine, McCammon provides advice on everything from firm handshakes to small talk in elevators to dealing with jerks and underminers. Here is an inspirational new way of looking at your job, your career, and success itself; an accessible guide for those of us who are smart, talented, and ambitious but who aren’t well-“leveraged” and don’t quite feel prepared for success . . . or know what to do once we’ve made it. *Entertainment Weekly

Numerical Analysis II Ralph E. Morganstern, 2014-11-03 These Lecture Slide Notes have been used over the past several years for a two-quarter graduate level sequence in numerical analysis. Part 1 covers introductory material on the Nature of Numerical Analysis, Root Finding Techniques, Polynomial Interpolation, Derivatives, and Integrals. Part 2 covers Ordinary Differential Equations and Numerical solutions to Linear Systems of Equations. Each slide stands alone to encapsulate a complete concept, algorithm, or theorem using a combination of equations, graphs, diagrams, illustrative tableaux, and comparison tables. The explanatory notes are placed directly below each slide in order to reinforce and give additional insight into the particular numerical technique or concept illustrated in the slide. Students have found this Lecture Slide Note format to be extremely useful in reviewing the concepts in preparation for an exam. This format is convenient for self-study; it covers the subject matter in a concise and easily accessible form using many visualizations. The Table of Contents serves to organize the slides in terms of the main numerical analysis topics covered and gives a complete list of slide Titles and their page numbers. A selection of Illustrative MatLab scripts is given in Appendix A. Finally, references to a number of standard text books are given, but there has been no attempt to make an exhaustive bibliography.
