Disaster Management and Human Health Risk V C.A. Brebbia, Wessex Institute, UK,2017-09-07 The contents of this book consist of papers presented at the 5th International Conference on Disaster Management and Human Health: Reducing Risk, Improving Outcomes, part of a series of conferences convened to assess the potential risk from various disasters and discuss ways to prevent or alleviate damage. These latest developments, contained in this volume, have been contributed by academics and experts on public health, security and disaster management in order to exchange knowledge and experience on the way to handle the increasing risk of natural and human-made disasters. As the human population has continued to concentrate in urban areas the number of people and the value of property affected by both natural and man-produced disasters has also grown. Earthquakes, floods, hurricanes, cyclones, tornadoes and forest fires have all taken their toll, as have man-made catastrophes such as industrial spillages and terrorist attacks. The included paper cover various subject areas, including: Disaster analysis; Disaster monitoring and mitigation; Emergency preparedness; Risk mitigation; Risk and security; Resilience; Socio-economic issues; Health risk; Human factors; Multi-hazard risk assessment; Case studies; Learning from disasters and man-made disasters.

Mountains, Climate and Biodiversity Carina Hoorn,Allison Perrigo,Alexandre Antonelli,2018-02-22 Mountains, Climate and Biodiversity: A comprehensive and up-to-date synthesis for students and researchers Mountains are topographically complex formations that play a fundamental role in regional and continental-scale climates. They are also cradles to all major river systems and home to unique, and often highly biodiverse and threatened, ecosystems. But how do all these processes tie together to form the patterns of diversity we see today? Written by leading researchers in the fields of geology, biology, climate, and geography, this book explores the relationship between mountain building and climate change, and how these processes shape biodiversity through time and space. In the first two sections, you will learn about the processes, theory, and methods connecting mountain building and biodiversity In the third section, you will read compelling examples from around the world exploring the links between mountains, climate and biodiversity Throughout the 31 peer-reviewed chapters, a non-technical style and synthetic illustrations make this book accessible to a wide audience A comprehensive glossary summarises the main concepts and terminology Readership: Mountains, Climate and Biodiversity is intended for students and researchers in geosciences, biology and geography. It is specifically compiled for those who are interested in historical biogeography, biodiversity and conservation.
