Cheating and Deception J. Bowyer Bell, Barton Whaley, 2017-09-04 Cheating and deception are terms often used but rarely defined. They summon up unpleasant connotations; even those deeply involved with cheating and deception rationalize why they have been driven to it. Particularly for Americans and much of Western civilization, official cheating, government duplicity, cheating as policy, and conscious, contrived deception, are all unacceptable except as a last resort in response to threat of extinction. As a distasteful

tool, deception is rarely used to achieve national interests, unless in relation to the deployment of military force. As an area of study, it has by and large been ignored. Intrigued by attitudes toward cheating and deception, the authors decided to analyze its roots, structure, and process. They asked fundamental questions: are there categories of deception, general steps in the process of deception, and ways to evaluate its results across time and in different modes? The book that results is a typology of kinds of deception, beginning with military deception, but extending into other categories and stages. In his introduction to this new edition, Bell outlines how the book came to be written, describes the mixed emotions toward the subject displayed by governmental and nongovernmental funding sources, and speculates about its critical and commercial reception. He discusses widespread new interest in the subject, the research that has been undertaken since this book was first published, and its limitations. This book provides a general overview of this complex subject, creating a framework for analysis of specific instances of cheating or deception. It will be of particular interest to political scientists, those interested in military affairs and strategy, and psychologists. The general reader will find the book written with a light touch, drawing examples of cheating and deception in the pursuit of love and money. The specialist reader will be intrigued by its broad-ranging examples drawn from policy and politics,

Addiction by Design Natasha Dow Schüll,2014-05-11 Recent decades have seen a dramatic shift away from social forms of gambling played around roulette wheels and card tables to solitary gambling at electronic terminals. Slot machines, revamped by ever more compelling digital and video technology, have unseated traditional casino games as the gambling industry's revenue mainstay. Addiction by Design takes readers into the intriguing world of machine gambling, an increasingly popular and absorbing form of play that blurs the line between human and machine, compulsion and control, risk and reward.

Drawing on fifteen years of field research in Las Vegas, anthropologist Natasha Dow Schüll shows how the mechanical rhythm of electronic gambling pulls players into a trancelike state they call the machine zone, in which daily worries, social demands, and even bodily awareness fade away. Once in the zone, gambling addicts play not to win but simply to keep playing, for as long as possible--even at the cost of physical and economic exhaustion. In continuous machine play, gamblers seek to lose themselves while the gambling industry seeks profit. Schüll describes the strategic calculations behind game algorithms and machine ergonomics, casino architecture and ambience management, player tracking and cash access systems--all designed to meet the market's desire for maximum time on device. Her account moves from casino floors into gamblers' everyday lives, from gambling industry conventions and Gamblers Anonymous meetings to regulatory debates over whether addiction to gambling machines stems from the consumer, the product, or the interplay between the two. *Addiction by Design* is a compelling inquiry into the intensifying traffic between people and machines of chance, offering clues to some of the broader anxieties and predicaments of contemporary life. At stake in Schüll's account of the intensifying traffic between people and machines of chance is a blurring of the line between design and experience, profit and loss, control and compulsion.
