3D Basketball 2 in 1 Tacticboard and Training Book Theo von Taane, 2016-01-18 The 2 in 1 Tacticboard & Training Workbook for fast creation of coaching instructions/game tactics and schemes, doesn't only offer sport specific preprints (playing field and space for notes), but also a cover, usable as a dry erase panel (whiteboard pen is needed).

ADVANTAGES: *** notebook with sport specific preprints (playing field) for fast and simple sketching of coaching instructions/game tactics and schemes *** If all pages of the notebook are used, the cover is still a dry erase panel (tacticboard) *** Due to a handy format, the notebook can be comfortably used in any situation (e.g. on the way or on the playing field) *** Perfect for spontaneous collection of ideas or as a memorization tool *** Practical handling due to easy pocket format

Stuff Good Players Should Know Dick DeVenzio, 2011-10-24 Original publication date: January 15, 1983.

Stuff Good Players Should Know DeVenzio, 2014-03-03 Stuff Good Players Should Know may very well be the best book ever written for basketball players. It is conversational and easy to understand, yet filled with subtle insights into the game of basketball. STUFF is page after page of creative concepts, common sense, and special tips that can not be found anywhere else. STUFF is like having a coach right beside you, in your room, discussing the fine points of the game. Basketball fans will enjoy it, but players won't do without it.

Learning STEM from Basketball Marne Ventura, 2021-06-15 Get your sports-loving kid excited about Science, Technology, Engineering, and Math By integrating the thrill of learning into the context of basketball, Learning STEM from Basketball presents an educational slam dunk. Unleash the inner scientist, engineer, and mathematician in your child as they learn that sports and STEM aren't so separate after all. You'll both love finding out the answers to questions such as: Why does a basketball bounce? What's a shot clock? Why does a basketball rim have a net? What's the math behind a free throw? And so much more! This easy-to-follow introduction to STEM topics sets kids up to make connections across subjects, discover new facts about basketball, and grow curious about academic fields!

The Science of Basketball Norman D. Graubart, 2015-07-15 Executing a dunk in a National Basketball League game takes a lot of practice. It also takes a lot of science! Readers discover the many areas of science that can be seen in action during a basketball game, including physics and biology. They also explore the ways science, technology, engineering, and math come together in the world of basketball. Colorful photographs, fact-filled sidebars, and helpful graphic organizers keep readers engaged as they explore basic STEM curriculum topics in a fresh way. Readers will be eager to visit the basketball court and see science in action after turning the final page.

Slam Dunk! Basketball Facts and Stats Mark Woods, Ruth Owen, 2011-01-01 The game of basketball involves speed, strength, and skill—and numbers. Readers learn the many ways that math is used in b-ball, from keeping score to comparing players. Quizzes on each page help readers practice math skills just like basketball players practice their skills.

Basketball: learnig by coaching Coachelp, 2015-10-23 You can't claim to know every aspect of basketball when you start as a coach. You have collected some clips here and there: something from the coaches you had, no matter what level you played at. You have seen matches, heard comments discussing with friends. That is your knowledge, we have to begin from that; organizing it, correcting it, deepening it in order to transmit it. Driving a team is much more than having knowledge about basketball. It means know how to convince, communicate, take responsibilities. If you know the game just in theory you can certainly be a commentator, not the coach. If you don't learn to build up solid

relationships, to understand your players, to handle the crisis, if you don't face a loss frustration and enthusiasm of a win, you are to far away from your target. Here we would like to propose a simple method. As you buy a new smart phone you will read the instructions later on, but immediately you turn it on, you start to use apps, choosing ring tones, making calls and surfing the web. You slowly discover the possibilities and notice functions never imagined before and you want to know more and more. We want to be just like that friend who can provide you with some suggestions as he already has the same smart phone or at least the same operating system. Everybody uses the smart phone his own way, personalizing it with the favorite cover. Also in the basketball world you will find the best suited road, your way or your philosophy as the big experts would say.

Transactions on Edutainment XII Zhigeng Pan, Adrian David Cheok, Wolfgang Müller, Mingmin Zhang, 2016-05-10 This journal subline serves as a forum for stimulating and disseminating innovative research ideas, theories, emerging technologies, empirical investigations, state-of-the-art methods, and tools in all different genres of edutainment, such as game-based learning and serious games, interactive storytelling, virtual learning environments, VR-based education, and related fields. It covers aspects from educational and game theories, human-computer interaction, computer graphics, artificial intelligence, and systems design. The 17 papers presented in the 12th issue were organized in four parts dealing with: games; human-computer interaction; image and graphics; and applications.

Intelligent Technologies for Interactive Entertainment Dennis Reidsma, 2014-06-20 This book constitutes the proceedings of the 6th International Conference on Intelligent Technologies for Interactive Entertainment, INTETAIN 2014. The 8 full papers presented together with 4 special session papers, 4 panels and 6 extended abstracts were carefully selected from 26 submissions. The papers present interdisciplinary research, covering topics such as creativity applied to technology, AI, cognition and models of engagement and play. The special session papers address the topic of humor in intelligent environments.

Smart Algorithms for Multimedia and Imaging Michael N. Rychagov, Ekaterina V. Tolstaya, Mikhail Y. Sirotenko, 2021-05-05 This book presents prospective, industrially proven methods and software solutions for storing, processing, and viewing multimedia content on digital cameras, camcorders, TV, and mobile devices. Most of the algorithms described here are implemented as systems on chip firmware or as software products and have low computational complexity and memory consumption. In the four parts of the book, which contains a total of 16 chapters, the authors address solutions for the conversion of images and videos by super-resolution, depth estimation and control and mono-to-stereo (2D to 3D) conversion; display applications by video editing; the real-time detection of sport episodes; and the generation and reproduction of natural effects. The practical principles of machine learning are illustrated using technologies such as image classification as a service, mobile user profiling, and automatic view planning with dictionary-based compressed sensing in magnetic resonance imaging. The implementation of these technologies in mobile devices is discussed in relation to algorithms using a depth camera based on a colour-coded aperture, the animated graphical abstract of an image, a motion photo, and approaches and methods for iris recognition on mobile platforms. The book reflects the authors' practical experience in the development of algorithms for industrial R&D and the commercialization of technologies. Explains digital techniques for digital cameras, camcorders, TV, mobile devices; Offers essential algorithms for the processing pipeline in multimedia devices and accompanying software tools; Features advanced topics on data processing, addressing current technology challenges.

Words and Phrases , 2005

STEM in Basketball Jacqueline Havelka, 2019 From dribbling and three-pointers to

free throws and slam dunks, basketball is not only a game of athletic strength and skill, but also one of science and energy, angles and math, and high-tech engineering. In *STEM in Basketball* readers explore the science behind their favorite player's best moves on the court and learn about the technology that is changing the game. Why do backboards shatter? What is the best angle for a jump shot? What makes that basketball so smart? The answer is STEM, of course. Every book in the *Connecting STEM and Sports* series provides an in-depth look at how the principles of science, technology, engineering, and math are essential to the sports we love. In classrooms today, STEM curriculum is integrated for real-world learning, and this series shows how all four disciplines work together in the everyday games we watch and play. Each title in this series includes color photos throughout, and back matter including: an index and further reading lists for books and internet resources. Key Icons appear throughout the books in this series in an effort to encourage library readers to build knowledge, gain awareness, explore possibilities and expand their viewpoints through our content rich non-fiction books. Key Icons in this series are as follows: Words to Understand are shown at the front of each chapter with definitions. These words are set in boldfaced type in that chapter, so that readers are able to reference back to the definitions--building their vocabulary and enhancing their reading comprehension. Sidebars are highlighted graphics with content rich material within that allows readers to build knowledge and broaden their perspectives by weaving together additional information to provide realistic and holistic perspectives. Educational Videos are offered in chapters through the use of a QR code, that, when scanned, takes the student to an online video showing a moment in history, a speech, or an instructional video. This gives the readers additional content to supplement the text. Text-Dependent Questions are placed at the end of each chapter. They challenge the reader's comprehension of the chapter they have just read, while sending the reader back to the text for more careful attention to the evidence presented there. Research Projects are provided at the end of each chapter as well and provide readers with suggestions for projects that encourage deeper research and analysis. And a Series Glossary of Key Terms is included in the back matter containing terminology used throughout the series. Words found here broaden the reader's knowledge and understanding of terms used in this field.

Big Data Analytics for Cyber-Physical System in Smart City Mohammed

Atiquzzaman, Neil Yen, Zheng Xu, 2020-01-11 This book gathers a selection of peer-reviewed papers presented at the first Big Data Analytics for Cyber-Physical System in Smart City (BDCPS 2019) conference, held in Shengyang, China, on 28–29 December 2019. The contributions, prepared by an international team of scientists and engineers, cover the latest advances made in the field of machine learning, and big data analytics methods and approaches for the data-driven co-design of communication, computing, and control for smart cities. Given its scope, it offers a valuable resource for all researchers and professionals interested in big data, smart cities, and cyber-physical systems.

Modern Sensing Technologies Subhas Chandra Mukhopadhyay, Krishanthi P.

Jayasundera, Octavian Adrian Postolache, 2018-08-24 This book provides an overview of modern sensing technologies and reflects the remarkable advances that have been made in the field of intelligent and smart sensors, environmental monitoring, health monitoring, and many other sensing and monitoring contexts in today's world. It addresses a broad range of aspects, from human health monitoring to the monitoring of environmental conditions, from wireless sensor networks and the Internet of Things to structural health monitoring. Given its breadth of scope, the book will benefit researchers, practitioners, technologists and graduate students involved in the monitoring of systems within the human body, functions and activities, healthcare technologies and services, the environment, etc.

Emerging Technologies for 3D Video Frederic Dufaux, Béatrice Pesquet-

Popescu,Marco Cagnazzo,2013-04-22 With the expectation of greatly enhanced user experience, 3D video is widely perceived as the next major advancement in video technology. In order to fulfil the expectation of enhanced user experience, 3D video calls for new technologies addressing efficient content creation, representation/coding, transmission and display. Emerging Technologies for 3D Video will deal with all aspects involved in 3D video systems and services, including content acquisition and creation, data representation and coding, transmission, view synthesis, rendering, display technologies, human perception of depth and quality assessment. Key features: Offers an overview of key existing technologies for 3D video Provides a discussion of advanced research topics and future technologies Reviews relevant standardization efforts Addresses applications and implementation issues Includes contributions from leading researchers The book is a comprehensive guide to 3D video systems and services suitable for all those involved in this field, including engineers, practitioners, researchers as well as professors, graduate and undergraduate students, and managers making technological decisions about 3D video.
