Smart Business and Digital Transformation Sándor Gyula Nagy, Tamás Stukovszky, 2023-06-15

Beginning in the mid-2010s, the Fourth Industrial Revolution has seen remarkable changes in information technology that have blurred the boundaries between the physical, digital and biological worlds. Industry 4.0 has enabled so-called smart factories in which computer systems equipped with machine learning algorithms can learn and control robotics with minimal need for human input. While smart technology has enabled many manufacturing businesses to increase efficiency and cut costs, many others are still struggling with implementing it. This book aims to help students, practitioners and industry leaders to become change agents and take their first steps on the path of transformation. Smart Business and Digital Transformation addresses the challenge of becoming smart from three different perspectives: smart factory, smart industry and smart environment. Covering technologies including the Internet of Things (IoT), cloud, artificial intelligence (AI), mobility, 5G and big data analytics, the book shows how enterprises can take advantage of them and ultimately beat the competition. The book considers the importance of operational processes, business models and organisational culture. The contributing authors and editors, based at Corvinus University, present a multidimensional picture of Industry 4.0 which is both diverse in its voices and unified in its vision. Smart Business and Digital Transformation meets the growing demand for a textbook that not only presents the latest concepts and theories but is also practical for planning, managing and implementing digital transformation in practice. The chapters include case studies to demonstrate the practical applications, and each chapter ends with review and discussion questions to develop students' skills and competencies. Students of business and digital transformation on advanced undergraduate and MBA courses will find it an indispensable guide to a vibrant and

challenging topic.

Personal Data-Smart Cities: How cities can Utilise their Citizen's Personal Data to Help them Become Climate Neutral Shaun Topham,Paolo Boscolo,Michael Mulquin,2023-05-01 This book sets out to address some of the issues that a smart city needs to overcome to make use of both the data currently available to them and how this can be enhanced by using emerging technology enabling a citizen to share their personal data, adding value. It provides answers for those within a smart city, advising their mayors or leaders on introducing new technology. We will cover the topic so as to enable many different public officials to be able to understand the situation from their own perspective, be they lawyers, financial people, service providers, those looking at governance

structures, policy makers, etc. We are contributing to the new model for the European Data Economy. Case studies of existing best practice in the use of data are augmented with examples of embracing a citizen's personal data in the mix, to enable better services to develop and potential new revenue streams to occur. This will enable new business models and investment opportunities to emerge. We will address the topic of how to put a value on data and will conclude by looking at what new technologies will be emerging in the coming years, to help cities with carbon-neutral targets to have more chance of succeeding.

Handbook of Research on Smart Management for Digital Transformation Barbosa, Belem,Filipe, Sandra,Santos, Claudia Amaral,2022-03-11 In a global and digital society, businesses are constantly being challenged by innovative and disruptive management strategies. The dramatic changes that took place in all corners of the world during the COVID-19 pandemic confirmed that companies need to update their resources and anticipate trends. The current changes introduced by digitalization offer endless innovation scenarios and strategic opportunities to companies but also demand an accurate and structured analysis of drivers, motivations, and determinants for success in this transformation. The Handbook of Research on Smart Management for Digital Transformation analyzes the drivers of digital transformation in businesses and assesses digital transformation success factors in the short, medium, and long run. This critical reference source is comprised of theoretical and empirical chapters as well as case studies on digital adoption by companies in different business sectors. Covering topics such as brand messaging, digital media platforms, and success determinants, this book is an essential resource for managers, researchers, educators of higher education, business students, digital strategists, business associations, communication and marketing agencies, entrepreneurs, and academicians.

Value Proposition Design Alexander Osterwalder, Yves Pigneur, Gregory Bernarda, Alan Smith, 2015-01-28 The authors of the international bestseller Business Model Generation explain how to create value propositions customers can't resist Value Proposition Design helps you tackle the core challenge of every business — creating compelling products and services customers want to buy. This highly practical book, paired with its online companion, will teach you the processes and tools you need to create products that sell. Using the same stunning visual format as the authors' global bestseller, Business Model Generation, this sequel explains how to use the "Value Proposition Canvas" to design, test, create, and manage products and services customers actually want. Value Proposition Design is for anyone who has been frustrated by new product meetings based on hunches and intuitions; it's for anyone who has watched an expensive new product launch fail in the market. The book will help you understand the patterns of great value propositions, get closer to customers, and avoid wasting time with ideas that won't work. You'll learn the simple process of designing and testing value propositions, that perfectly match customers' needs and desires. In addition the book gives you exclusive access to an online companion on Strategyzer.com. You will be able to assess your work, learn from peers, and download pdfs, checklists, and more. Value Proposition Design is an essential companion to the "Business Model Canvas" from Business Model Generation, a tool embraced globally by startups and large corporations such as MasterCard, 3M, Coca Cola, GE, Fujitsu, LEGO, Colgate-Palmolive, and many more. Value Proposition Design gives you a proven methodology for success, with value propositions that sell, embedded in profitable business models.

Sustainable and Environmental Development of Energy Economics based on Smart Grids and EnergyTech Elena G. Popkova, Bruno Sergi, Aleksei V. Bogoviz, 2023-04-25

Design a Better Business Patrick van der Pijl, Justin Lokitz, Lisa Kay Solomon, 2016-09-21 This book

stitches together a complete design journey from beginning to end in a way that you've likely never seen before, guiding readers (you) step-by-step in a practical way from the initial spark of an idea all the way to scaling it into a better business. Design a Better Business includes a comprehensive set of tools (over 20 total!) and skills that will help you harness opportunity from uncertainty by building the right team(s) and balancing your point of view against new findings from the outside world. This book also features over 50 case studies and real life examples from large corporations such as ING Bank, Audi, Autodesk, and Toyota Financial Services, to small startups, incubators, and social impact organizations, providing a behind the scenes look at the best practices and pitfalls to avoid. Also included are personal insights from thought leaders such as Steve Blank on innovation, Alex Osterwalder on business models, Nancy Duarte on storytelling, and Rob Fitzpatrick on questioning, among others.

Product Lifecycle Management Enabling Smart X Felix Nyffenegger, José Ríos, Louis Rivest, Abdelaziz Bouras, 2020-11-19 This book constitutes the refereed post-conference proceedings of the 17th IFIP WG 5.1 International Conference on Product Lifecycle Management, PLM 2020, held in Rapperswil, Switzerland, in July 2020. The conference was held virtually due to the COVID-19 crisis. The 60 revised full papers presented together with 2 technical industrial papers were carefully reviewed and selected from 80 submissions. The papers are organized in the following topical sections: smart factory; digital twins; Internet of Things (IoT, IIoT); analytics in the order fulfillment process; ontologies for interoperability; tools to support early design phases; new product development; business models; circular economy; maturity implementation and adoption; model based systems engineering; artificial intelligence in CAx, MBE, and PLM; building information modelling; and industrial technical contributions.

Smart Product-Service Systems Pai Zheng, Chun-Hsien Chen, Zuoxu Wang, 2021-06-23 Smart Product-Service Systems draws on innovative practice and academic research to demonstrate the unique benefits of Smart PSS and help facilitate its effective implementation. This comprehensive guide explains how Smart PSS reshapes product-service design in several unique aspects, including a closed-loop product design and redesign manner, value co-creation with integrated human-machine intelligence, and solution design context-awareness. Readers in industry as well as academia will find this to be an invaluable guide to the current body of technical knowledge on Smart Product-Service Systems (Smart PSS), future research trajectories, and experiences of implementation. Rapid development of information and communication technologies, artificial intelligence, and digital technologies have driven today's industries towards the so-called digital servitization era. As a result, a promising IT-driven business paradigm, known as Smart Product-Service Systems (Smart PSS) has emerged, where a large amount of low cost, high performance smart, connected products are leveraged, together with their generated on-demand services, as a single solution bundle to meet individual customer needs. Explains what factors a company needs to consider in their transition towards digital servitization and its advantages Describes how this field relates to the sustainability movement, and how Smart PSS can be implemented in a sustainable way Includes detailed case studies from different industries, including DELTA Electronics Inc. Singapore (smart commercialization), COMAC aviation industry (smart manufacturing servitization), and Van High Tech (smart building services)

Smart Flexibility Andy Lake, 2016-04-01 Smart Flexibility: Moving Smart and Flexible Working from Theory to Practice is an engaging and practical management book to help organisations implement Smart Working, and take a business-focused approach to 'Flexible Working'. Written for managers at

the leading edge of change, Andy Lake takes a strategic, comprehensive and integrated approach to Smart and Flexible Working. Taking an evidence-based approach, he sets out how to achieve measurable benefits across the Triple Bottom Line. Starting from the underlying principles and the compelling context for change, he takes a pragmatic approach to delivering change in each of the key areas of People (HR), Property and Technology. The book is designed to help professionals understand the vital connecting points across disciplines as well as innovations in their own fields. And there are separate chapters that look at the real impacts for sustainability, the impacts for 'Smart Government', how to manage the 'Anywhere Anytime Team' and how to take people on the journey towards a Smart Flexibility organisational culture. The book includes many insights based on the author's experience and the latest research, many practical techniques for implementing change plus ten new case studies. Smart Flexibility is essential reading for anyone involved in workplace change and increasing the efficiency of organisations. It is aimed at managers who need to deliver change, and will be of great interest to consultants in the fields of workplace design, new technologies and HR/OD/Training.

Smart Cities and Smart Spaces: Concepts, Methodologies, Tools, and Applications

Management Association, Information Resources, 2018-09-07 As populations have continued to grow and expand, many people have made their homes in cities around the globe. With this increase in city living, it is becoming vital to create intelligent urban environments that efficiently support this growth and simultaneously provide friendly and progressive environments to both businesses and citizens alike. Smart Cities and Smart Spaces: Concepts, Methodologies, Tools, and Applications is an innovative reference source that discusses social, economic, and environmental issues surrounding the evolution of smart cities. Highlighting a range of topics such as smart destinations, urban

planning, and intelligent communities, this multi-volume book is designed for engineers, architects, facility managers, policymakers, academicians, and researchers interested in expanding their knowledge on the emerging trends and topics involving smart cities.

Business Model Generation Alexander Osterwalder,Yves Pigneur,2013-02-01 Business Model Generation is a handbook for visionaries, game changers, and challengers striving to defy outmoded business models and design tomorrow's enterprises. If your organization needs to adapt to harsh new realities, but you don't yet have a strategy that will get you out in front of your competitors, you need Business Model Generation. Co-created by 470 Business Model Canvas practitioners from 45 countries, the book features a beautiful, highly visual, 4-color design that takes powerful strategic ideas and tools, and makes them easy to implement in your organization. It explains the most common Business Model patterns, based on concepts from leading business thinkers, and helps you reinterpret them for your own context. You will learn how to systematically understand, design, and implement a game-changing business model--or analyze and renovate an old one. Along the way, you'll understand at a much deeper level your customers, distribution channels, partners, revenue streams, costs, and your core value proposition. Business Model Generation features practical innovation techniques used today by leading consultants and companies worldwide, including 3M, Ericsson, Capgemini, Deloitte, and others. Designed for doers, it is for those ready to abandon outmoded thinking and embrace new models of value creation: for executives, consultants, entrepreneurs, and leaders of all organizations. If you're ready to change the rules, you belong to the business model generation!

Smart Grid Economics and Management Clemens van Dinther,Christoph M. Flath,Reinhard Madlener,2022-05-07 This book focuses on market/regulatory issues concerning smart grid

applications, business cases and use cases. It covers the most relevant aspects of the smart grid—design considerations, economics, legal aspects and system management—and includes exercises at the end of each chapter. Since renewable energy generation is weather-dependent, it is more volatile, which affects market prices and the need for flexibility options including demand side management. In order to balance supply and demand in a sustainable manner also with high shares of renewables, energy systems need to be enhanced by smart grid technologies. This co-evolutionary transformation of the energy system, economic, societal, political and regulatory domains is challenging and calls for an integrated and interdisciplinary approach. This book provides an essential basis to prepare lecturers and students for engaging in the new energy world.

Computer Aided Architectural Design Futures 2005 Bob Martens, Andre Brown, 2005-12-06
MARTENS Bob and BROWN Andre Co-conference Chairs, CAAD Futures 2005 Computer Aided Architectural Design is a particularly dynamic field that is developing through the actions of architects, software developers, researchers, technologists, users, and society alike. CAAD tools in the architectural office are no longer prominent outsiders, but have become ubiquitous tools for all professionals in the design disciplines. At the same time, techniques and tools from other fields and uses, are entering the field of architectural design. This is exemplified by the tendency to speak of Information and Communication Technology as a field in which CAAD is embedded. Exciting new combinations are possible for those, who are firmly grounded in an understanding of architectural design and who have a clear vision of the potential use of ICT. CAAD Futures 2005 called for innovative and original papers in the field of Computer Aided Architectural Design, that present rigorous, high-quality research and development work. Papers should point towards the future, but be based on a thorough understanding of the past and present.

Innovation and Entrepreneurship in Education Pantelis M. Papadopoulos, Roland Burger, Ana Faria, 2016-12-19 This book explores the concepts for innovation and entrepreneurship through multiple lenses in the context of education. Mixing equal parts theory and practice, this volume takes a closer look on how innovation and entrepreneurship are approached around the globe as disciplines, methods, and mindsets.
