Knee Howdy: Challenge Chinese Vocabulary to a Duel and Bury it 'Six Feet Under' inside your Brain! Nathan Cain,2012-04-04 Read a whole sample chapter on KneeHowdy.com Knee Howdy and other micro-stories in this book will help you learn to memorize how to say any difficult Chinese word with no need for flashcards or rote memorization techniques. The mission of this book is not only to help you memorize how to say your first words of Mandarin Chinese, but to also inspire you to learn hundreds or even thousands more. You shouldn't have to use flashcards, just use your imagination instead. When children memorize all the names of the characters in an animated feature film, it isn't because they study long and hard, it's because they actively engage in these stories with their imaginations. We will use this same technique to help us conquer two major obstacles to learning Chinese words. The first problem with Chinese vocabulary is that there are very few words that sound similar to their English counterparts. An example of one such rare cognate is kafei, which sounds similar to coffee. It makes that word easy to remember, but most Chinese words sound nothing like their English counterparts. Unless you stretch your imagination and twist the words a little, there will be no hook on which to hang your new words. To that end, in each chapter there are brief dialogs followed by wacky little micro-stories stories that will stimulate your imagination and make the new vocabulary words practically unforgettable. You can improve your memory even further if you tell your friends about them when you are away from the book. Retelling the stories in your own words and laughing out loud with friends will embed the words deeper in your mind. A second problem we will conquer is the often-intimidating 4 tones. You have to stand up and get your body moving. For instance, if a word you are trying to remember is a 4th tone word, you might stomp your foot when you say that word. Make the tone hint movements described in this book and you can stay physically active while you at the same time build mental muscle memory. A Word of Caution: Please, do not fall into the trap of thinking that it would be easier to just memorize these words by rote. Don't be a fuddy duddy! It has been scientifically proven that if you are having fun while learning, then you will produce better results. So stand up and face your enemy. Get ready to learn to be a quick draw.

I collected comprehensive 220 Chinese Radicals. You can consider radical as the Gene of Chinese Culture! Mastering the Genealogical Charts of Chinese Characters, you can use this key to decipher Chinese Characters, Expand your vocabulary in an Amazing way! (中国汉字部首).A Chinese radical is a graphical component of a Chinese character under which the character is traditionally listed in a Chinese dictionary. This component is often a semantic indicator

similar to a morpheme, though sometimes it may be a phonetic component or even an artificially extracted portion of the character. The most commonly accepted table of radicals for traditional Chinese characters consists of 214 entries. These 214 radicals were popularized back in the reign of Qing emperor Kangxi, who commissioned what is now known as the KangXi Great dictionary. In modern dictionary, the 214 radicals are used as an indexing item for looking up a Chinese character in the Dictionary. Most of the Radicals are associated with a meaning, similar to Latin Root Words used in English. There are few Radicals ㄅㄆㄇㄏㄏㄏㄏㄏ which only used for indexing and has no meanings. In our Origin of Chinese Characters series, only the Radicals which associate with meanings will be collected. The Characters associated with each Radical will be listed out from China Characters Standard Collection (GB 2312, 6763 Characters in total). Hacking Chinese Olle Linge, 2016-03-26 Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study. - Geoff van der Meer, VP engineering This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision. - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, *Hacking Chinese*, where I write regularly about how to learn Mandarin.
