29th Divisional Artillery: War Record and Honours Book 1915-1918 Lt Col R.M.

Johnson, 2012-03-26 The 29th Division ("The Incomparable 29th") was formed between January and March 1915 and took part in the Gallipoli campaign from the landings in April 1915 till evacuated in January 1916, and then went to the Western Front where it remained for the rest of the war. In all it won twenty-three VCs, the highest number awarded to any division, one of them to Capt Walford of the divisional artillery. This record originated in the Honours Book kept by 29th Division's GOC, Maj-Gen de Lisle (June 1915 - March 1918), and continued by his successor, Maj-Gen D.S Cayley. The original intention had been to provide the recipients of honours with some record of the deeds for which they had been awarded. The Honours Book, however, did not include the text of the recommendations, obviously impracticable on active service, but the task was undertaken, as far as the divisional artillery was concerned, after the division had settled in Germany as part of the Army of Occupation. Then it was decided to improve on the original idea and include a short history of the

doings of the divisional artillery, a list of casualties, and a record of officers' services. Part I contains the list of honours to officers and men, grouped separately and arranged in alphabetical order with citations, followed by the same list (less citations) arranged according to units, in chronological order. Part II is the list of all those who were killed, wounded or missing, arranged in alphabetical order, officers and other ranks grouped separately. Details include the battery, date and nature of casualty. Part III contains the record of services of all officers who served in the divisional artillery between the Gallipoli Landing (25th April 1915) and the Armistice. The names are arranged alphabetically. Part IV is the short history (75 pages) of the divisional artillery, what it did from mobilization to the occupation of the Rhineland in March 1919. This history includes a table showing the artillery organization at Cape Helles on 23rd August 1915 and the divisional artillery staff and commanders at the evacuation. The narrative itself is in diary form, based on the War Diaries, and concludes with copies of some of the congratulatory messages received by the divisional artillery.

Classical Social Theory in Use Robert Bickel,2012-12-01 This book provides an introduction to classical social theory through discussion, application, and synthesis of the work of Karl Marx, Emile Durkheim, and George Herbert Mead. Rather than merely summarizing and evaluating their continuing influence, their ideas and ways of reasoning are applied in thoroughly developed fashion to contemporary issues and historical events of enduring importance. In the process, contributions of these three very different authors are used to complement each other and are eventually synthesized,

making clear that they can be melded into one multilevel, even if tentative and rudimentary, theoretical perspective. The book is intended to systematically and compactly introduce the most useful concepts of the three classical theorists. However, new concepts are typically introduced as part of the narrative, rather than in box-text definitional fashion. This is consistent with the books primary purpose: to enable the reader to begin to think like Marx, Durkheim, and Mead, especially insofar as their work can be synthesized into one point of view, dealing with inter-related macro-level, middle range, and micro-level social phenomena. The section on Marx will be longer than the sections on Durkheim and Mead. In part, the length of the discussion of Marx's work is due to use of this section to begin introducing pertinent ideas of Durkheim and Mead.

Intelligent Network Video Fredrik Nilsson, Communications Axis, 2023-12-22 The third edition traces the trajectory of video surveillance technology from its roots to its current state and into its potential future role in security and beyond. For the reader, it is an opportunity to explore what the latest technology has to offer, as well as to gain some insight into the direction that surveillance will take us

in the years ahead. The revised edition of Intelligent Network Video is more comprehensive in every area than the first and second editions, printed in over 25,000 copies. There is also a new chapter on cybersecurity, as well as thoroughly revised chapters on cloud and analytics. The book takes the reader on a tour through the building blocks of intelligent network video – from imaging to network cameras and video encoders, through the IT technologies of network and storage and into video management, analytics, and system design.

Intelligent Data Analytics for Power and Energy Systems Hasmat Malik, Md. Waseem Ahmad, D.P. Kothari, 2022-02-17 This book brings together state-of-the-art advances in intelligent data analytics as

driver of the future evolution of PaE systems. In the modern power and energy (PaE) domain, the increasing penetration of renewable energy sources (RES) and the consequent empowerment of consumers as a central and active solution to deal with the generation and development variability are driving the PaE system towards a historic paradigm shift. The small-scale, diversity, and especially the number of new players involved in the PaE system potentiate a significant growth of generated data. Moreover, advances in communication (between IoT devices and M2M: machine to machine, man to machine, etc.) and digitalization hugely increased the volume of data that results from PaE components, installations, and systems operation. This data is becoming more and more important for PaE systems operation, maintenance, planning, and scheduling with relevant impact on all involved entities, from producers, consumers and aggregators to market and system operators. However, although the PaE community is fully aware of the intrinsic value of those data, the methods to deal with it still necessitate substantial enhancements, development and research. Intelligent data analytics is thereby playing a fundamental role in this domain, by enabling stakeholders to expand their

decision-making method and achieve the awareness on the PaE environment. The editors also included demonstrated codes for presented problems for better understanding for beginners.
