Creating Smart Enterprises Vivek Kale, 2017-10-25 Vivek Kale's *Creating Smart Enterprises* goes smack-dab at the heart of harnessing technology for competing in today's chaotic digital era. Actually, for him, it's SMACT-dab: SMACT (Social media, Mobile, Analytics and big data, Cloud computing, and internet of Things) technologies. This book is required reading for those that want to stay relevant and win, and optional for those that don't. —Peter Fingar, Author of *Cognitive Computing and business technology consultant* *Creating Smart Enterprises* unravels the mystery of social media, mobile, analytics and big data, cloud, and Internet of Things (SMACT) computing and explains how it can transform the operating context of business enterprises. It provides a clear understanding of what SMACT really means, what it can do for smart enterprises, and application areas where it is practical to use them. All IT professionals who are involved with any aspect of a SMACT computing project will profit by using this book as a roadmap to make a more meaningful contribution to the success of their computing initiatives. This pragmatic book: Introduces the VUCA (volatility, uncertainty, complexity, and ambiguity) business ecosystem confronted by the businesses today. Describes the challenges of defining business and IT strategies and of aligning them as well as their impact on enterprise governance. Provides a very wide treatment of the various components of SMACT computing, including the Internet of Things (IoT) and its constituting technologies like RFID, wireless networks, sensors, and wireless sensor networks (WSNs). This book addresses the key differentiator of SMACT computing environments and solutions that combine the power of an elastic infrastructure with analytics. The SMACT environment is cloud-based and inherently mobile. Information management processes can analyze and discern recurring patterns in colossal pools of operational and transactional data. Analytics, big data, and IoT computing leverage and transform these data patterns to help create successful, smart enterprises.

Artificial Intelligence Applications to Smart City and Smart Enterprise Donato Impedovo, Giuseppe Pirlo, 2020-11-23 Smart cities operate under more resource-efficient management and economy than ordinary cities. As such, advanced business models have emerged around smart cities, which led to the creation of smart enterprises and organizations that depend on advanced technologies. This book includes 21 selected and peer-reviewed articles contributed in the wide spectrum of artificial intelligence applications to smart cities. Chapters refer to the following areas of interest: vehicular traffic prediction, social big data analysis, smart city management, driving and routing, localization, safety, health, and life quality.

Smart Business Ming Zeng, 2018-08-14 How Strategy Works in an Interconnected, Automated World Leaders already know that the classic approach to strategy--analyze, plan, execute--is losing relevance. But they don't yet know what replaces it. As everyone and everything becomes more interconnected and digitized, how do you operate, compete, and win? Ming Zeng, the former Chief of Staff and strategy adviser to Alibaba Group's founder Jack Ma, explains how the latest technological developments, such as artificial intelligence, machine learning, the mobile internet, and cloud computing are redefining how value is created. Written especially for those outside the technology industry or the startup arena, this book introduces a simple, overarching framework to guide strategy formulation and execution in this data-rich and highly interactive environment. Revealing the revolutionary practices that he and his team have developed at Alibaba, Zeng shows how to: Automate decisions through machine learning Create products informed by real-time data from customers Determine the right strategic positioning to maximize value from platforms and suppliers Repurpose your organization to further human insight and enable creativity Lead your company's transformation into a smart business With insights into the strategies and tools used by leaders at Alibaba and other companies such as Ruhan and Red Collar, in a variety of industries from furniture making to banking to custom tailoring, Smart Business outlines a radically new approach to strategy that can be applied everywhere.

AI-Aided IoT Technologies and Applications for Smart Business and Production Alex Khang, Anuradha Misra, Shashi Kant Gupta, Vrushank Shah, 2023-12-01 This book covers the need for Internet of Things (IoT) technologies and artificial intelligence (AI)-aided IoT solutions for business and production. It shows how IoT-based technology uses algorithms and AI models to bring out the desired results. AI-Aided IoT Technologies and Applications for Smart Business and Production shows how a variety of IoT technologies can be used toward integrating data fabric solutions and how intelligent applications can be used to greater effect in business and production operations. The book also covers the integration of IoT data-driven financial technology (fintech) applications to fulfill the goals of trusted AI-aided IoT solutions. Next, the authors show how IoT-based technology uses algorithms and AI models to bring out the desired results across various industries including smart cities, buildings, hospitals, hotels, homes, factories, agriculture, transportation, and more. The last part focuses on AI-aided IoT techniques, data analytics, and visualization tools. This book targets a mixed audience of specialists, analysts, engineers, scholars, researchers, academics, and professionals. It will be useful to engineering officers, IoT and AI engineers, engineering and industrial management students, and research scholars looking for new ideas, methodologies, technologies, models, frameworks, theories, and practices to resolve the challenging issues associated with leveraging IoT technologies, data-driven analytics, AI-aided models, IoT cybersecurity, 5G, sensors, and augmented and virtual reality techniques for developing smart systems in the era of Industrial Revolution 4.0.

Prototyping a Scalable Smart Village to Simultaneously Create Sustainable Development and Enterprise Growth Opportunities Solomon Darwin, Henry William Chesbrough, 2017 This case focuses on the development of a Smart Village in the village of Mori, in the state of Andhra Pradesh, India. The Chief Minister of the state, N. Chandrababu Naidu, has recently completed a series of visits to rural villages in his state of 60 million residents, 35 million of whom live in rural areas. Minister Naidu seeks to create a new policy mechanism to address the many unmet needs of his constituents in Andhra Pradesh. He has decided to launch an experiment called Smart Villages. The case describes the many unmet needs of rural villagers in India, and also discusses some of the approaches that the Chief Minister had tried in an earlier period, before his party lost power. Back in office as Chief Minister, he is now motivated to try something new.

Business Continuity Planning Ralph L. Kliem, Gregg D. Richie, 2015-08-21 If a major event such as a terrorist attack, 7.2 earthquake, tsunami, or hacker attack were to disrupt business operations, would your organization be prepared to respond to the financial, political, and social impacts? In order for your company to be resilient, it must be ready to respond and recover quickly from the impact of such events. Business

Smart Data James A. George, James A. Rodger, 2010-03-15 The authors advocate attention to smart data strategy as an organizing element of enterprise performance optimization. They believe that “smart data” as a corporate priority could revolutionize government or commercial enterprise performance much like “six sigma” or “total quality” as organizing paradigms have done in the past. This revolution has not yet taken place because data historically resides in the province of the information resources organization. Solutions that render data smart are articulated in “technoid” terms versus the language of the board room. While books such as *Adaptive Information* by Pollock and Hodgson ably describe the current state of the art, their necessarily technical tone is not conducive to corporate or agency wide qualitative change.

Smart Business: Technology and Data Enabled Innovative Business Models and Practices Karl R. Lang, Jennifer Xu, Bin Zhu, Xiao Liu, Michael J. Shaw, Han Zhang, Ming Fan, 2021-01-30 This book constitutes revised selected papers from the 18th Workshop on e-Business, WeB 2019, which took place in Munich, Germany, in December 2019. The purpose of WeB is to provide a forum for researchers and practitioners to discuss findings, novel ideas, and lessons learned to address major challenges and map out the future directions for e-Business. The WeB 2019 theme was “Smart Business: Technology and Data Enabled Innovative Business Models and Practices.” The 20 papers included in this volume were carefully reviewed and selected from a total of 42 submissions. The contributions are organized in topical sections as follows: crowdfunding and blockchain; business analytics; digital platforms and social media; managing e-Business projects and processes; and global e-Business.

Smart Business Strategies Richard Tyler, 1996

Smart Business and Digital Transformation Sándor Gyula Nagy, Tamás Stukovszky, 2023-06-15 Beginning in the mid-2010s, the Fourth Industrial Revolution has seen remarkable changes in information technology that have blurred the boundaries between the physical, digital and biological worlds. Industry 4.0 has enabled so-called smart factories in which computer systems equipped with machine learning algorithms can learn and control robotics with minimal need for human input. While smart technology has enabled many manufacturing businesses to increase efficiency and cut costs, many others are still struggling with implementing it. This book aims to help students, practitioners and industry leaders to become change agents and take their first steps on the path of transformation. *Smart Business and Digital Transformation* addresses the challenge of becoming smart from three different perspectives: smart factory, smart industry and smart environment. Covering technologies including the Internet of Things (IoT), cloud, artificial intelligence (AI), mobility, 5G and big data analytics, the book shows how enterprises can take advantage of them and ultimately beat the competition. The book considers the importance of operational processes, business models and organisational culture. The contributing authors and editors, based at Corvinus University, present a multidimensional picture of Industry 4.0 which is both diverse in its voices and unified in its vision. *Smart Business and Digital Transformation* meets the growing demand for a textbook that not only presents the latest concepts and theories but is also practical for planning, managing and implementing digital transformation in practice. The chapters include case studies to demonstrate the practical applications, and each chapter ends with review and discussion questions to develop students’ skills and competencies. Students of business and digital transformation on advanced undergraduate and MBA courses will find it an indispensable guide to a vibrant and challenging topic.

Smart Business Systems for the Optimized Organization Robert J. Thierauf, James J. Hctor, 2002-12-30 One of the first books to probe the latest direction in computing technology, Thierauf’s and Hctor’s innovative text explores ways in which smart business systems can help pick the best, most optimal or near-optimal solutions from among

hundreds, even thousands of possibilities that threaten to swamp organizational decision makers daily. Authors make clear that while past information systems have focused on generating information that is helpful in the production of knowledge over time, smart business systems, utilizing optimizing techniques, can do it quickly, more efficiently, and in ways that can raise organizations to higher levels of competitiveness. Well-illustrated with examples and discussions of typical applications in such areas as strategic planning, marketing, manufacturing, and accounting, the book will help managers at all levels tie their organization's critical success factors into its key performance indicators and financial ratios. The result is a win-win situation within your company's complex of competing needs and goals, and a way to produce directly and immediately measurable benefits on the bottom line. The book is designed for company managers and other decision makers and for information systems professionals. It provides understanding of one of the most important developments in systems-decision making, and how these smart business systems are constructed. It is also suitable in an academic environment, specifically in undergraduate and graduate courses that cover the fundamentals of smart business systems, and which give special emphasis to optimization models. The authors explain that enterprise resource planning and supply-chain management vendors include optimization algorithms in their products and that their book will make software optimization more accessible to developers of business systems. Although optimization is undoubtedly a complicated subject, Thierauf and Hocht go a long way toward simplifying it. In doing so, they enhance its value as an important tool for decision makers in almost all organizational capacities.
