Icon Design Steve Caplin,2001 Though design for computer applications is a relatively new phenomenon, the boom in the home computer marketplace means that this is now the fastest-growing area of design. While providing boundless creative opportunities for the graphic designer, the challenge of designing interface icons – the symbols that represent applications, documents, functionality, and any other facet of the software that gives it a graphic identity – has often been underestimated. icon design offers practical, comprehensible, jargon-free advice for designing cutting-edge icons, and includes an inspirational showcase of contemporary icon designs.

Mac Basics, Snow Leopard (Macworld Superguides) , Need a crash course in the basics of operating and working with your Snow Leopard Mac? This 126-page guide will help teach you the ins and outs to get you up to speed and computing like a pro. The readers of Macworld are amazingly diverse. Among our audience are some incredibly tech-savvy folks, and we're glad to have them. There are also some people among us who are relatively novice Mac users, who avidly read what we write in order to flex and improve their Mac skills. For the past few years we've offered a book, the Mac Basics Superguide, that's been a hit with both audiences. And I'm happy to announce that we've just updated that book for Snow Leopard. If you're someone who's struggling with the basics of operating a Mac, or someone who's a new user of Mac OS X (perhaps you've made the switch from Windows to Mac) this new 126-page guide will get you up to speed. Written in an easy-to-follow style, the Mac Basics Superguide, Snow Leopard Edition will give you detailed tips and information about using the Finder and the Dock, switching between programs, using Apple's Spotlight search tool, opening and saving your files, and setting up system preferences and user accounts. We've tossed in some basic security and troubleshooting advice to keep your Mac up and running smoothly. And our own Dan Frakes, who pens our Mac Gems blog and magazine column, has assembled a list of 20 great low-cost programs that will enhance your Mac experience. But I said this book was for the Mac experts among us, too. Here's what I mean by that: It's the book you give to the people you know who need a leg up on using their Mac—all of your friends and family members who use you as the be-all, end-all Mac resource. The reality is, a Mac expert can only be in one place at any given time. This book can always be around as a

handy reference when there's no flesh-and-blood expert nearby. (I sent my mom a copy of the first edition of this book, and I like to think it's reduced the number of questions she asks of me.) You Mac experts out there might also appreciate the writers who contributed to this book: Christopher Breen, Dan Frakes, Glenn Fleishman, Rob Griffiths, Joe Kissell, Ted Landau, Harry McCracken, and Kirk McElhearn.

Digital Innovations for Mass Communications Paul Martin Lester, 2013-11-12
In every field of mass communications—advertising, entertainment studies, journalism, public relations, radio-television-film, tourism, and visual reporting—professionals understand the importance of storytelling. Regardless of whether the finished product is a commercial, an in-depth investigative piece, a public service campaign, an independent documentary, a travelogue, or a collection of photographs, effective storytelling requires a combination of creativity, empathy, and expertise. Through the innovative technologies and techniques described in this textbook, students will learn how to turn passive readers and viewers into engaged and regular users. The sixteen chapters each include a brief introduction, assignments, simple-to-follow step-by-step exercises, and sources for additional information in which users will learn to produce apps, informational graphics, quick response codes, quizzes, simulations, smartphone and tablet icons, social media campaigns, three-dimensional pictures, and video. Students will work with the following programs: Blogger, Dreamweaver, Excel, Facebook, GeoCommons, Google Maps, Illustrator, Imgur, iMovie, Infogram, iShowU, JavaScript, JustGive, Kaywa, Kickstarter, LinkedIn, Onvert, Photoshop, Pixel Resort, QuickTime, Reddit, Second Life, SurveyMonkey, TheAppBuilder, Twitter, Vizualize, Wikipedia, Word, WordPress, and YouTube. When digital innovations are added to traditional print and screen presentations, a media user is not only allowed to interact with the information but can also physically engage with the story displayed. Giving students the tools they need to transform their storytelling in this manner is the ultimate goal of this textbook.
