Pints with Aquinas Matt Fradd, 2016-08-10 If you could sit down with St. Thomas Aquinas over a pint of beer and ask him any one question, what would it be? Pints With Aquinas contains over 50 deep thoughts from the Angelic doctor on subjects such as God, virtue, the sacraments, happiness, alcohol, and more. If you've always wanted to read St. Thomas but have been too intimidated to try, this book is for you. So, get your geek on, pull up a bar stool and grab a cold one, here we go! He alone enlightened the Church more than all other doctors; a man can derive more profit in a year from his books than from pondering all his life the teaching of others. - Pope John XXII

iGen Jean M. Twenge, 2017-08-22 As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.

How Do Cell Phones Work? Richard Hantula, 2009 A very basic look at how cell phones work.

Light Phone Arpita Agnihotri, Saurabh Bhattacharya, 2023 Light Phone is a New York-based cell phone company co-founded and led by Joe Hollier and Kaiwei Tang. Light Phone offers a premium phone based on vintage innovation that does not have any anxiety-inducing feeds such as social media. In 2020, one of its phone models, Light Phone II, was awarded Fast Company's most innovative design of the year award. However, Light Phone II's price was USD 350, and low- to mid-range smartphones were also available in the same price range with more advanced features. Nevertheless, the startup experienced success with its crowdfunding campaigns, implying that funders anticipated demand for the Light Phone. Light Phone co-founders were confident that they would not add social media, advertising, email, or news features to the phone under any circumstances. By 2022, traditional cell phone players such as Nokia and newer players like Google were also launching their version of minimalist phones. Are Hollier and Tang charging too much for a cell phone? How can they improve the retro innovation of Light Phone? What is the significance of crowdfunding in the initial boost of sales?

How to Do Nothing Jenny Odell, 2020-12-29 ** A New York Times Bestseller ** NAMED ONE OF THE BEST BOOKS OF THE YEAR BY: Time • The New Yorker • NPR • GQ • Elle • Vulture • Fortune • Boing Boing • The Irish Times • The New York Public Library • The Brooklyn Public Library A complex, smart and ambitious book that at first reads like a self-help manual, then blossoms into a wide-ranging political manifesto.—Jonah Engel Bromwich, The New York Times Book Review One of President Barack Obama's Favorite Books of 2019 Porchlight's Personal Development & Human Behavior Book of the Year In a world where addictive technology is designed to buy and sell our attention, and our value is determined by our 24/7 data productivity, it can seem impossible to escape. But in this inspiring field guide to dropping out of the attention economy, artist and critic Jenny Odell shows us how we can still win back our lives. Odell sees our attention as the most precious—and overdrawn—resource we have. And we must actively and continuously choose how we use it. We might

not spend it on things that capitalism has deemed important ... but once we can start paying a new kind of attention, she writes, we can undertake bolder forms of political action, reimagine humankind's role in the environment, and arrive at more meaningful understandings of happiness and progress. Far from the simple anti-technology screed, or the back-to-nature meditation we read so often, *How to do Nothing* is an action plan for thinking outside of capitalist narratives of efficiency and techno-determinism. Provocative, timely, and utterly persuasive, this book will change how you see your place in our world.

Smartphone Filmmaking Max Schleser, 2021-08-26 Mobile, smartphone and pocket filmmaking is a global phenomenon with distinctive festivals, filmmakers and creatives that are defining an original film form. *Smartphone Filmmaking: Theory and Practice* explores diverse approaches towards smartphone filmmaking and interviews an overview of the international smartphone filmmaking community. Interviews with smartphone filmmakers, entrepreneurs, creative technologists, storytellers, educators and smartphone film festival directors provide a source of inspiration and insights for professionals, emerging filmmakers and rookies who would like to join this creative community. While not every story might be appropriate to be realized with a mobile device or smartphone, if working with communities, capturing locations or working in the domain of personal or first-person filmmaking, the smartphone or mobile device should be considered as the camera of choice. The mobile specificity is expressed through accessibility, mobility and its intimate and immediate qualities. These smartphone filmmaking-specific characteristics and personal forms of crafting experiences contribute to a formation of new storytelling approaches. Stylistic developments of vertical video and collaborative processes in smartphone filmmaking are evolving into hybrid formats that resonate in other film forms. This book not only develops a framework for the analysis of smartphone filmmaking but also reviews contemporary scholarship and directions within the creative arts and the creative industries. *Smartphone Filmmaking: Theory and Practice* initiates a conversation on current trends and discusses its impact on adjacent disciplines and recent developments in emerging media and screen production, such as Mobile XR (extended reality).

Smartphone - Alford Books Combo Douglas J Alford, What makes my s-phone smart? These books gives answers. In Smartphones - Objects Before Apps, I see that today's actions, my s-phone can do, were once separate objects. Before, people listen with CD Players; write letters by hand or with a typewriter and take pictures with a separate camera. When I understand the objects, I better appreciate my smartphone Apps and Sensors today. But smartphones don't grow on trees. It took centuries to discover the science and invent the devices inside my smartphone. With the book, Science of Smartphones, I learn about 7 Waves of my s-phone. 1) Sound waves of my voice shake the air. They also shake a microphone inside my s-phone. Sound changes into electricity e-patterns. 2) The e-patterns become AC electricity waves. Next, I learn that electricity and magnets can make each other. 3) More than this, electricity and magnet micro-bits join together to make EM Waves. 4) In the s-phone antenna, AC Waves change into EM Radio Waves. R Waves send my voice to the people I call. R Waves also enable web searches. 5) Another EM Wave, Light is the language how my s-phone connects with me. 6) My smartphone connects to the Internet. We surf search the sixth wave, the database of linked human information called the world wide web (www). 7) See inside these books for more about the Seventh K-Wave. More people around our world, own or want smartphones than any other device. Many people see s-phones as tech wonders;

others see them as toys. After, we read these books, may understand the science inside s-phones. May we embrace smartphones as tools. With which we learn, connect and share across the wide but today unequal world. Smartphones are global device agents for positive changes.
