Christopher Smart's English Lyrics Rosalind Powell, 2016-05-23 In the first full-length study of Christopher Smart's translations and the place and function of translation in Smart's poetry, Rosalind Powell proposes a new approach to understanding the relationship between Smart's poetics and his practice. Drawing on translation theory from the early modern period to the present day, this book addresses Smart's translations of Horace, Phaedrus and the Psalms alongside the better-known religious works such as *Jubilate Agno* and *A Song to David*. Five recurrent threads run throughout Powell's study: the effect of translation on the identity of a narrative voice in a rewritten text; the techniques that are used to present translated texts to a new literary, cultural and linguistic readership; performance and reading contexts; the translation of great works as an attempt to achieve literary permanence; and, finally, the authorial influence of Smart himself in terms of the overt religiosity and nationalism that he champions in his writing. In exploring Smart's major translation projects and revisiting his original poems, Powell offers insights into classical reception and translation theory; attitudes towards censorship; expressions of nationalism in the period; developments in liturgy and hymnody; and the composition of children's books and school texts in the early modern era. Her detailed analysis of Smart's translating poetics places them within a new, contemporary context and locality to uncover the poet's works as a coherent project of Englishing.

John Ruskin's Political Economy William Henderson, 2012-11-12 This volume offers an exciting new reading of John Ruskin's economic and social criticism, based on recent research into rhetoric in economics. Willie Henderson uses notions derived from literary criticism, the rhetorical turn in economics and more conventional approaches to historical economic texts to reevaluate Ruskin's economic and social criticism. By identifying Ruskin's rhetoric, and by reading his work through that of Plato, Xenophon, and John Stuart Mill, Willie Henderson reveals how Ruskin manipulated a knowledge base. Moreover in analysis of the

writings of William Smart, John Bates Clark and Alfred Marshall, the author shows that John Ruskin's influence on the cultural significance of economics and on notions of economic well-being has been considerable.

The Annotated Letters of Christopher Smart Christopher Smart, 1991 The only collection of all known letters of Christopher Smart provides the best psychological explanation to date of that complex and elusive eighteenth-century poet. The significant characteristics that distinguish Smart's prose letters from his poetry, Betty Rizzo and Robert Mahony note, are that his letters were requests for assistance while his verses were bequests, gifts in which he set great store. Indeed, it was Smart's lifelong conviction that he was a poet of major importance. As Smart biographer Karina Williamson notes, The splendidly informative and vivaciously written accounts of the circumstances surrounding each letter, or group of letters, add up to what is in effect a miniature biography.

How to Translate Nicolae Sfetcu, 2015-04-19 A guide for translators, about the translation theory, the translation process, interpreting, subtitling, internationalization and localization and computer-assisted

translation. A special section is dedicated to the translator's education and associations. The guide include, as annexes, several independent adaptations of the corresponding European Commission works, freely available via the EU Bookshop as PDF and via SetThings.com as EPUB, MOBI (Kindle) and PDF. For a “smart”, sensible translation , you should forget not the knowledge acquired at school or university, but the corrective standards. Some people want a translation with the touch of the source version, while another people feel that in a successful version we should not be able to guess the original language. We have to realize that both people have right and wrong, and that their only fault is to present requirement as an absolute truth. Teachers agree at least on this principle: “If a sentence is ambiguous, the translation must also be“. There is another critical, less easy to argue, based on an Italian phrase with particularly strong wording: “Traduttore, traditore“. This critique argues that any translation will betray the author’s language, spirit, style ... because of the choices on all sides. What to sacrifice, clarity or brevity, if the formula in the text is brief and effective, but impossible to translate into so few words with the exact meaning? One could understand this criticism that it encourages us to read “in the text.” It seems obvious that it is impossible to follow this advice into practice.

New Perspectives on Corpus Translation Studies Vincent X. Wang,Lily Lim,Defeng Li,2021-10-11 The book features recent attempts to construct corpora for specific purposes – e.g. multifactorial Dutch (parallel), Geasy Easy Language Corpus (intralingual), HK LegCo interpreting corpus – and showcases sophisticated and innovative corpus analysis methods. It proposes new approaches to address classical themes – i.e. translation pedagogy, translation norms and equivalence, principles of translation – and brings interdisciplinary perspectives – e.g. contrastive linguistics, cognition and metaphor studies – to cast new

light. It is a timely reference for the researchers as well as postgraduate students who are interested in the applications of corpus technology to solving translation and interpreting problems.
